312-38 Book Free & 312-38 Actual Questions

The 312-38 latest exam torrents have different classifications for different qualification examinations, which can enable students to choose their own learning mode for themselves according to the actual needs of users. The 312-38 exam questions offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. Our reasonable price and 312-38 Latest Exam torrents supporting practice perfectly, you will only love our 312-38 exam questions.

EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q355-Q360):

NEW QUESTION # 355

Which of the following is a management process that provides a framework for promoting quick recovery and the capability for an effective response to protect the interests of its brand, reputation, and stakeholders?

- A. Incident handling
- B. Log analysis
- C. Business Continuity Management
- D. Patch management

Answer: C

Explanation:

Business Continuity Management is a management process that determines potential impacts that are likely to threaten an organization. It provides a framework for promoting quick recovery and the capability for an effective response to protect the interests of its brand, reputation, and stakeholders. Business continuity management includes disaster recovery, business recovery, crisis management, incident management, emergency management, product recall, contingency planning, etc.

Answer option D is incorrect. Patch management is an area of systems management that involves acquiring, testing, and installing multiple patches (code changes) to an administered computer system. Patch management includes the following tasks: Maintaining current knowledge of available patches Deciding what patches are appropriate for particular systems Ensuring that patches are installed properly Testing systems after installation, and documenting all associated procedures, such as specific configurations requiredA number of products are available to automate patch management tasks, including RingMaster's Automated Patch Management, PatchLink Update, and Gibraltar's Everguard. Answer option A is incorrect. This option is invalid. Answer option B is incorrect. Incident handling is the process of managing incidents in an Enterprise, Business, or an Organization. It involves the thinking of the prospective suitable to the enterprise and then the implementation of the prospective in a clean and manageable manner. It involves completing the incident report and presenting the conclusion to the management and providing ways to improve the process both from a technical and administrative aspect. Incident handling ensures that the overall process of an enterprise runs in an uninterrupted continuity.

NEW QUESTION # 356

Identify the correct order for a successful black hat operation.

- A. Reconnaissance, Scanning, Gaining Access, Covering Tracks, and Maintaining Access
- B. Reconnaissance, Scanning, Gaining Access, Maintaining Access, and Covering Tracks
- C. Reconnaissance, Gaining Access, Scanning, Maintaining Access, and Covering Tracks
- D. Scanning, Reconnaissance, Gaining Access, Maintaining Access and Covering Tracks

Answer: D

Explanation:

The correct sequence for a black hat operation follows a structured approach that begins with Reconnaissance, where the attacker gathers preliminary data or intelligence on the target. Next is Scanning, where the attacker uses technical tools to understand the network and system vulnerabilities. Gaining Access is the phase where the vulnerabilities are exploited to enter the system or network. Maintaining Access involves establishing a persistent presence within the system, often for data exfiltration or additional exploitation. Finally, Covering Tracks is the phase where the attacker erases evidence of the intrusion to avoid detection.

NEW QUESTION # 357

Maximus Tech Is a multinational company that uses Cisco ASA Firewalls for their systems. Jason is the one of the members of the team that checks the logs at Maximus Tech. As a part of his job, he is going through me logs and he came across a firewall log that looks like this:

May 06 2018 21:27:27 asa 1: %ASA -6-11008: User enable_16' executed the 'configure term' command Based on the security level mentioned in the log, what did Jason understand about the description of this message?

- A. Informational message
- B. Warning condition message
- C. Normal but significant message
- D. Critical condition message

Answer: A

Explanation:

The log entry %ASA-6-11008 indicates that the message is of a severity level 6, which corresponds to an informational message. In the context of Cisco ASA Firewall logs, severity levels range from 0 (emergency) to 7 (debugging), with lower numbers indicating higher severity. A severity level of 6 is used for messages that provide information about normal but significant events. In this case, the log indicates that a user named 'enable_16' executed the 'configure term' command, which is a noteworthy event but does not indicate an error or critical condition.

NEW QUESTION # 358

Which of the following statements are true about an IPv6 network? Each correct answer represents a complete solution. Choose all that apply.

- A. It uses longer subnet masks than those used in IPv4.
- B. For interoperability, IPv4 addresses use the last 32 bits of IPv6 addresses.
- C. It increases the number of available IP addresses.
- D. It provides improved authentication and security.
- E. It uses 128-bit addresses.

Answer: B,C,D,E

Explanation:

IP addressing version 6 (IPv6) is the latest version of IP addressing. IPv6 is designed to solve many of the problems that were faced by IPv4, such as address depletion, security, auto-configuration, and extensibility. With the fast increasing number of networks and the expansion of the World Wide Web, the allotted IP addresses are depleting rapidly, and the need for more network addresses is arising. IPv6 solves this problem, as it uses a 128-bit address that can produce a lot more IP addresses. These addresses are hexadecimal numbers, made up of eight octet pairs. An example of an IPv6 address is 45CF: 6D53: 12CD: AFC7: E654: BB32: 543C: FACE. Answer option C is incorrect. The subnet masks used in IPv6 addresses are of the same length as those used in IPv4 addresses.

NEW QUESTION # 359

Which of the following is the best way of protecting important data against virus attack?

- A. Implementing a firewall.
- B. Taking daily backup of data.
- C. Using strong passwords to log on to the network.
- D. Updating the anti-virus software regularly.

Answer: D

Explanation:

Updating the anti-virus software regularly is the best way of protecting important data against virus attack.

NEW QUESTION # 360

.....

In order to allow our customers to better understand our 312-38 quiz prep, we will provide clues for customers to download in order to understand our 312-38 exam torrent in advance and see if our products are suitable for you. As long as you have questions, you can send us an email and we have staff responsible for ensuring 24-hour service to help you solve your problems. If you use our 312-38 Exam Torrent, we will provide you with a comprehensive service to overcome your difficulties and effectively improve your ability. If you can take the time to learn about our 312-38 quiz prep, I believe you will be interested in our products. Our learning materials are practically tested, choosing our 312-38 exam guide, you will get unexpected surprise.

312-38 Book Free: <https://www.suretorrent.com/312-38-exam-guide-torrent.html>

If you study with our 312-38 practice engine for 20 to 30 hours, then you can pass the exam with confidence and achieve the certification as well, EC-COUNCIL Accurate 312-38 Answers Secondly, our service is 7*24 online working including official holidays, EC-COUNCIL Accurate 312-38 Answers In case you send it to others' email inbox, please check the address carefully before, The printing and convenience of the EC-COUNCIL 312-38 pass guaranteed pdf can give you unexpected experience for preparation.
