

Topic 3	<ul style="list-style-type: none"> List a few use cases of cloud computing: This topic presents practical applications and scenarios where cloud computing is implemented across different industries. It demonstrates real-world examples of how organizations utilize cloud services to solve business problems.
Topic 4	<ul style="list-style-type: none"> Understand the differences between virtualization and cloud computing: This section clarifies how virtualization and cloud computing are related yet distinct technologies. It explains that virtualization is a key enabler of cloud computing but cloud encompasses broader service delivery models and characteristics.
Topic 5	<ul style="list-style-type: none"> Describe the characteristics of cloud computing: This section explains the essential attributes and defining features of cloud computing such as on-demand self-service, broad network access, and resource pooling. It outlines what distinguishes cloud computing from traditional computing models.
Topic 6	<ul style="list-style-type: none"> Understand KVM technology: This topic focuses on Kernel-based Virtual Machine (KVM) as a specific virtualization solution for Linux systems. It covers how KVM transforms Linux into a hypervisor to manage virtual machines efficiently.

H13-511_V5.5 Latest Exam Fee - H13-511_V5.5 Reliable Test Camp

If you want to study with computer, then you can try our Software or APP ONLINE versions. These two versions of our H13-511_V5.5 practice guide helps you to test your knowledge and over the exam anxiety. They have various self-assessment and self-learning tools, like timed exam and exam history, test series etc Which help you to manage time during actual H13-511_V5.5 Exam and arrange multiple tests which you can attempt on different intervals. Also you may improve your test skills by attempting H13-511_V5.5 exam questions multiple times.

Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q69-Q74):

NEW QUESTION # 69

Which of the following descriptions about KVM is correct? (Multiple choice)

- A. KVM is a module in the Linux kernel
- B. KVM belongs to type I virtualization
- C. KVM is an open source virtualization technology
- D. KVM belongs to type II virtualization

Answer: A,C,D

NEW QUESTION # 70

Which of the following statements is false about virtual NICs?

- A. Each virtual NIC has its own IP address.
- B. Each virtual NIC has its own MAC address.
- C. In terms of network, a virtual NIC has the same functions as a physical NIC.
- D. A VM can have only one virtual NIC.

Answer: D

Explanation:

In the official Huawei HCIA-Cloud Computing curriculum, specifically the "Virtualization Basics" module, the characteristics of virtualized hardware are clearly defined. Statement D is FALSE because a Virtual Machine (VM) is not limited to a single virtual network interface card (vNIC). In fact, for many enterprise scenarios, a VM must have multiple vNICs. For example, a VM acting as a software firewall or a multi-homed server would require separate vNICs to connect to different logical networks (such as a Management network, a Service network, and a Backup network). Huawei FusionCompute supports the addition of multiple vNICs to a single VM, each capable of being assigned to a different port group or VLAN.

The other statements are correct based on Huawei's technical standards. Statement A is true; every vNIC is assigned a globally

unique MAC address (usually from a prefix reserved for Huawei virtualization) to ensure that Layer 2 switching functions correctly within the DVS. Statement B is true; just like a physical machine, each vNIC can be assigned a unique IP address through static configuration or DHCP to allow for Layer 3 communication. Statement C is also accurate; from the perspective of the Guest Operating System, the vNIC behaves exactly like a physical PCI-E network card. It has a driver, it can be configured with MTU settings, and it can transmit and receive frames. The hypervisor (CNA) is responsible for intercepting the data from this "logical" NIC and forwarding it through the physical NICs of the host server. This transparent emulation is what allows standard operating systems and applications to run in the cloud without modification.

NEW QUESTION # 71

Centralized storage refers to concentrating all physical disks in a hard disk enclosure, and then providing storage services externally through the controller.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 72

In Huawei Fusion Computer, cluster resources consist of hosts and their associated storage and network resources.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 73

In cloud computing, hardware of the same type and different models can form a resource pool.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 74

.....

It is a truth well-known to all around the world that no pains and no gains. There is another proverb that the more you plough the more you gain. When you pass the H13-511_V5.5 exam which is well recognized wherever you are in any field, then acquire the H13-511_V5.5 certificate, the door of your new career will be open for you and your future is bright and hopeful. Our H13-511_V5.5 Guide Torrent will be your best assistant to help you gain your certificate. We believe that you don't encounter failures anytime you want to learn our H13-511_V5.5 guide torrent.
