

Exam FCP_FAZ_AD-7.4 Introduction | Latest FCP_FAZ_AD-7.4 Examprep

What's more, part of that UpdateDumps FCP_FAZ_AD-7.4 dumps now are free: <https://drive.google.com/open?id=13Ae5YWwMXMXj-WwHTzFouVCvdJiUguuy>

The 21 century is the information century. So there are many changes in the field of the FCP_FAZ_AD-7.4 exam questions. They are also transforming people's lives and the mode of operation of human society in a profound way. when you are preparing for an FCP_FAZ_AD-7.4 exam, our company can provide the best electronic FCP_FAZ_AD-7.4 Exam Torrent for you in this website. I strongly believe that under the guidance of our FCP_FAZ_AD-7.4 test torrent, you will be able to keep out of troubles way and take everything in your stride.

Fortinet FCP_FAZ_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Logs and Reports Management: This part of the exam measures the candidate's ability to handle log data and generate reports using FortiAnalyzer. Network and security analysts must show proficiency in managing, analyzing, and reviewing logs to ensure effective system monitoring and auditing processes are in place.
Topic 2	<ul style="list-style-type: none">• Device Management: Here, Fortinet network and security analysts are evaluated on their ability to handle devices linked to FortiAnalyzer. This includes adding new devices, managing them efficiently, and troubleshooting communication issues.
Topic 3	<ul style="list-style-type: none">• Administration: This section evaluates the ability of network and security analysts to configure administrative access and manage Administrative Domains (ADOMs). It covers tasks such as setting user permissions, managing backups, and disk quotas, and ensuring secure and efficient management of administrative privileges within FortiAnalyzer systems.
Topic 4	<ul style="list-style-type: none">• System Configuration: This section assesses the capabilities of network and security analysts in managing FortiAnalyzer systems. It includes tasks like performing initial configurations, setting up high-availability systems, and configuring RAID for storage.

Quiz FCP_FAZ_AD-7.4 - FCP - FortiAnalyzer 7.4 Administrator –Professional Exam Introduction

We try our best to provide the most efficient and intuitive learning methods to the learners and help them learn efficiently. Our FCP_FAZ_AD-7.4 exam reference provides the instances to the clients so as to they can understand them intuitively. Based on the consideration that there are the instances to our FCP_FAZ_AD-7.4 test guide to concretely demonstrate the knowledge points. Through the stimulation of the Real FCP_FAZ_AD-7.4 Exam the clients can have an understanding of the mastery degrees of our FCP_FAZ_AD-7.4 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way.

Fortinet FCP - FortiAnalyzer 7.4 Administrator Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which two parameters impact the amount of reserved disk space required by FortiAnalyzer? (Choose two.)

- A. License type
- B. Disk size
- C. Total quota
- D. RAID level

Answer: B,D

Explanation:

RAID level affects how much disk space is reserved for redundancy and fault tolerance. For example, RAID 1 mirrors data, meaning you need more space for redundancy, while RAID 5 or RAID 6 reserves space for parity.

Disk size directly influences the total available and reserved space since the larger the disk, the more space may need to be reserved for system functions, logs, and other operations.

The total quota and license type do not directly impact the reserved disk space, though they do influence other aspects of capacity and functionality.

NEW QUESTION # 60

If a hard disk fails on a FortiAnalyzer that supports software RAID, what should you do to bring the FortiAnalyzer back to functioning normally, without losing data?

- A. Replace the disk and rebuild the RAID manually
- B. Take no action if the RAID level supports a failed disk
- C. Hot swap the disk
- D. Shut down FortiAnalyzer and replace the disk

Answer: D

Explanation:

<https://kb.fortinet.com/kb/documentLink.do?externalID=FD46446#:~:text=On%20FortiAnalyzer%20FortiManager%20devices%20that,to%20exchanging%20the%20hard%20disk.>

If a hard disk on a FortiAnalyzer unit fails, it must be replaced. On FortiAnalyzer devices that support hardware RAID, the hard disk can be replaced while the unit is still running - known as hot swapping. On FortiAnalyzer units with software RAID, the device must be shutdown prior to exchanging the hard disk.

NEW QUESTION # 61

An administrator has moved FortiGate A from the root ADOM to ADOM1.

Which two statements are true regarding logs? (Choose two.)

- A. Archived logs will be moved to ADOM1 from the root ADOM automatically.
- B. Logs will be presented in both ADOMs immediately after the move.
- C. Analytics logs will be moved to ADOM1 from the root ADOM automatically.
- D. Analytics logs will be moved to ADOM1 from the root ADOM after you rebuild the ADOM1 SQL database.

Answer: A,D

Explanation:

Reference: <https://community.fortinet.com/t5/Fortinet-Forum/FW-Migration-between-ADOMs/m-p/32683?m=158008>

NEW QUESTION # 62

Which two statements are true regarding fabric connectors? (Choose two.)

- A. Cloud-out connectors allow you to send real-time logs to public cloud accounts like Amazon S3.
- B. The storage connector service does not require a separate license to send logs to the cloud platform.
- C. Using fabric connectors is more efficient than third-party polling information from the FortiAnalyzer API

- D. Fabric connectors allow you to save storage costs and improve redundancy.

Answer: C,D

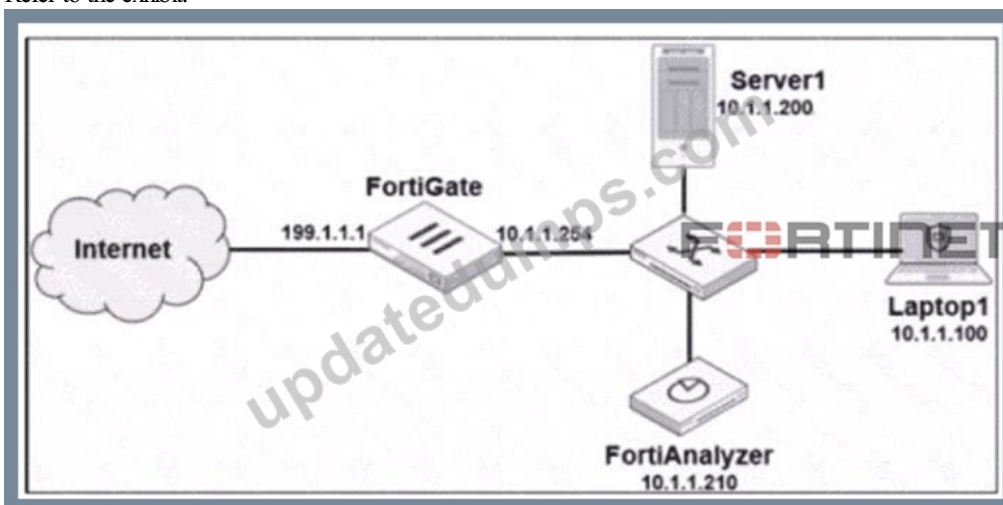

Explanation:

Using fabric connectors is more efficient than third-party polling information from the FortiAnalyzer API - Fabric connectors are designed to integrate directly with the security fabric components and other services, which allows them to operate more efficiently compared to using third-party applications to poll information via APIs. APIs often involve more overhead due to the need for frequent polling and data retrieval operations, which can be resource-intensive.

Cloud-out connectors allow you to send real-time logs to public cloud accounts like Amazon S3. - Cloud- out connectors are specifically designed to facilitate the direct and real-time transfer of logs and other data to cloud services like Amazon S3. These connectors streamline the process by providing a built-in mechanism that bypasses the need for additional scripting or manual configuration.

NEW QUESTION # 63

Refer to the exhibit.

Laptop1 is used by several administrators to manage FortiAnalyzer. You want to configure a generic text filter that matches all login attempts to the web interface generated by any user other than "admin", and coming from Laptop1.

Which filter will achieve the desired result?

- A. operation-login & performed_on="GUI(10.1.1.100)" & user!=admin
- B. operation-login & performed_on="GUI(10.1.1.210)" & user!=admin
- C. operation-login & srcip=10.1.1.100 & dstip=10.1.1.210 & user==admin
- D. operation-login & dstip=10.1.1.210 & user!=admin

Answer: C

NEW QUESTION # 64

.....

It is our promissory announcement that you will get striking by these viable ways. So do not feel giddy among tremendous materials in the market ridden-ed by false materials. With great outcomes of the passing rate upon to 98-100 percent, our FCP_FAZ_AD-7.4 practice materials are totally the perfect one. Different from all other bad quality practice materials that cheat you into spending much money on them, our FCP_FAZ_AD-7.4 practice materials are the accumulation of professional knowledge worthy practicing and remembering.
