You will need to pass the FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam to achieve the Fortinet FCSS_SDW_AR-7.4 certification. Due to extremely high competition, passing the Fortinet FCSS_SDW_AR-7.4 exam is not easy; however, possible. You can use Exam-Killer products to pass the FCSS_SDW_AR-7.4 Exam on the first attempt. The Fortinet practice exam gives you confidence and helps you understand the criteria of the testing authority and pass the FCSS - SD-WAN 7.4 Architect (FCSS_SDW_AR-7.4) exam on the first attempt.

Fortinet FCSS_SDW_AR-7.4 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> SD-WAN Configuration: This section of the exam measures the skills of network engineers and covers configuring a basic SD-WAN setup. Candidates are expected to demonstrate their ability to define SD-WAN members and zones effectively, ensuring foundational network segmentation and management. |
| Topic 2 | <ul style="list-style-type: none"> SD-WAN Troubleshooting: This part assesses the troubleshooting skills of network support specialists. Candidates should be able to diagnose and resolve issues related to SD-WAN rules, session behaviors, routing inconsistencies, and ADVPN connectivity problems to maintain seamless network operations. |
| Topic 3 | <ul style="list-style-type: none"> Advanced IPsec: Intended for security engineers, this section covers the deployment of advanced IPsec topologies for SD-WAN, including hub-and-spoke models, ADVPN configurations, and complex multi-hub or multi-region deployments. Candidates need to demonstrate expertise in securing wide-area networks using IPsec technologies. |
| Topic 4 | <ul style="list-style-type: none"> Configure Performances SLAs: Designed for network administrators, this part focuses on setting up performance Service Level Agreements (SLAs) within SD-WAN environments. Candidates must show proficiency in defining criteria to monitor and maintain network performance and reliability. |

100% Pass Quiz 2026 Fortinet FCSS_SDW_AR-7.4 Realistic Standard Answers

Some people are not good at operating computers. So you might worry about that the FCSS_SDW_AR-7.4 certification materials are not suitable for you. Try to believe us. Our experts have taken your worries seriously. They have made it easy to operate for all people. Even if you know little about computers, you can easily begin to do exercises of the FCSS_SDW_AR-7.4 real exam

dumps. Also, we have invited for many volunteers to try our study materials. The results show our products are suitable for them. In addition, the system of our FCSS_SDW_AR-7.4 test training is powerful. You will never come across system crashes. The system we design has strong compatibility. High speed running completely has no problem at all.

Fortinet FCSS - SD-WAN 7.4 Architect Sample Questions (Q18-Q23):

NEW QUESTION # 18

Refer to the exhibit.

```

BGP configuration

config router bgp
  set as 65000
  set router-id 10.200.99.253
  set ibgp-multipath enable
  set additional-path enable
  set additional-path-select 3
  config neighbor-group
    edit "VPN1"
      set soft-reconfiguration enable
      set remote-as 65000
    next
    edit "VPN2"
      set soft-reconfiguration enable
      set remote-as 65000
    next
    edit "VPN3"
      set soft-reconfiguration enable
      set remote-as 65000
    next
  end
  config neighbor-range
    edit 1
      set prefix 192.168.1.0 255.255.255.192
      set neighbor-group "VPN1"
    next
    edit 2
      set prefix 192.168.1.64 255.255.255.192
      set neighbor-group "VPN2"
    next
    edit 3
      set prefix 192.168.1.128 255.255.255.192
      set neighbor-group "VPN3"
    next
  end
  ...
end
```

The exhibit shows the BGP configuration on the hub in a hub-and-spoke topology. The administrator wants BGP to advertise prefixes from spokes to other spokes over the IPsec overlays, including additional paths.

However, when looking at the spoke routing table, the administrator does not see the prefixes from other spokes and the additional paths. Which three settings must the administrator configure inside each BGP neighbor group so spokes can learn the prefixes of other spokes and their additional paths? (Choose three.)

- A. Enable route-reflector-client.
- B. Set additional-path to forward
- C. Set adv-additional-path to the number of additional paths to advertise.
- D. Set additional-path to send
- E. Enable route-reflector-server

Answer: A,C,D

Explanation:

The hub must send additional paths to spokes (set additional-path send).

The hub must treat each spoke as a route-reflector client so spoke routes are reflected to other spokes.

The hub must specify how many additional paths to advertise (set adv-additional-path <n>).

NEW QUESTION # 19

Which statement about SD-WAN zones is true?

- A. You can configure up to 32 SD-WAN zones per VDOM.
- B. An SD-WAN zone can contain only one type of interface.
- C. You cannot use an SD-WAN zone in static route definitions.
- D. An SD-WAN zone can contain between 0 and 512 members.

Answer: D

NEW QUESTION # 20

Refer to the exhibits. The administrator configured a device blueprint and CLI scripts as shown in the exhibits, to prepare for onboarding FortiGate devices in the company's stores. Later, a technician prepares a FortiGate 51G with a basic configuration and connects it to the network.

The basic configuration contains the port1 configuration and the minimal configuration required to allow the device to connect to FortiManager.

After the device first connects to FortiManager, FortiManager updates the device configuration.

Based on the exhibits, which actions does FortiManager perform?

Device blueprint

| Setting | Value/Status |
|-----------------------------------|--|
| Name | Stores |
| Device Model | FortiGate-51G |
| Automatically Link to Real Device | <input checked="" type="checkbox"/> |
| Enforce Firmware Version | <input type="checkbox"/> |
| Enforce Device Configuration | <input checked="" type="checkbox"/> |
| Add to Device Group | <input type="checkbox"/> |
| Add to Folder | <input type="checkbox"/> |
| Fabric Authorization Template | <input type="checkbox"/> |
| Pre-Run CLI Template | <input checked="" type="checkbox"/> 5G-links |
| Assign Policy Package | <input checked="" type="checkbox"/> default |
| Provisioning Templates | <input checked="" type="checkbox"/> corp_st <input checked="" type="checkbox"/> LAN-interface |
| HA | <input type="checkbox"/> |

CLI script LAN-interface

Edit CLI Template – LAN interface

Name: LAN-interface

Type: CLI

Comments:

Script details

```
1 config system interface
2   edit port1
3     set mode dhcp
4     set allowances ping https ssh fgfm
5   next
6   edit port2
7     set mode dhcp
8   next
9   edit port5
10      set ip 10.0.$(branch_id).254 255.255.255.0
11      set allowaccess ping
12 end
13 end
```

- A. FortiManager updates the configuration of port1, port2, and port5. The three ports might get new IP addresses.
- B. FortiManager updates access rights only for port1. FortiManager cannot update the IP address because it was already set manually.
- C. FortiManager does not update the port1 configuration because FortiManager does not change the configuration of interfaces with fgfm access.
- D. FortiManager updates the device configuration according to the selected templates. It applies the corp_st template first.

Answer: A

Explanation:

Enforce Device Configuration is enabled and the blueprint applies the provisioning CLI templates.

The LAN-interface script sets port1 and port2 to DHCP and assigns a static IP to port5 (using the branch_id variable). Therefore, when FortiManager pushes the blueprint, it updates the configurations of port1, port2, and port5 - and their IP addresses may change accordingly.

NEW QUESTION # 21

The SD-WAN overlay template helps to prepare SD-WAN deployments. To complete the tasks performed by the SD-WAN overlay template, the administrator must perform some post-run tasks.

What are two mandatory post-run tasks that must be performed? (Choose two.)

- A. Assign an sdwan_id metadata variable to each device (branch and hub).
- B. Configure routing through the overlay tunnels created by the SD-WAN overlay template.
- C. Create policy packages and assign them to the branch devices.
- D. Assign a hub id metadata variable to each hub device.
- E. Configure SD-WAN rules.

Answer: C,E

Explanation:

On page 76 in the Study Guide:

"You must define a unique branch ID value for each branch device"

"Mandatory . . .

- Configure the SD-WAN rules by editing the SD-WAN template
- Create policy packages for branch and hub devices"

NEW QUESTION # 22

As an IT manager for a healthcare company, you want to delegate the installation and management of your SD-WAN deployment to a managed security service provider (MSSP). Each site must maintain direct internet access and ensure that it is secure. You expected significant traffic flow between the sites and want to delegate as much of the network administration and management as possible to the MSSP.

Which two MSSP deployment blueprints best address the customer's requirements? (Choose two.)

- A. Install the hub and spokes at the customer premises and enable the MSSP to manage the SD-WAN deployment using FortiManager with a dedicated ADOM.
- **B. Install a dedicated hub at the MSSP premises for the new customer, and install the spokes at the customer premises.**
- C. Use a shared hub at the MSSP premises and a dedicated hub at the customer premises and install the spokes at the customer premises.
- **D. Use a shared hub at the MSSP premises with a dedicated VDOM for the new customer, and install the spokes at the customer premises.**

Answer: B,D

Explanation:

Hosting the hub at the MSSP centralizes installation, security, and ongoing management while each site (spoke) keeps local DIA. This can be done multi-tenant with a shared hub using a dedicated VDOM or with a fully dedicated hub per customer for stricter isolation and control, both meeting the requirement to delegate administration to the MSSP and support high inter-site traffic.

NEW QUESTION # 23

.....

Our FCSS_SDW_AR-7.4 study guide in order to allow the user to form a complete system of knowledge structure, the qualification examination of test interpretation and supporting course practice organic reasonable arrangement together, the FCSS_SDW_AR-7.4 simulating materials let the user after learning the section, and each section between cohesion and is closely linked, for users who use the FCSS_SDW_AR-7.4 training quiz to build a knowledge of logical framework to create a good condition.
