This Google Cloud Certified - Professional Google Workspace Administrator (Google-Workspace-Administrator) exam dumps have been inspiring beginners and experienced professionals since its beginning. There are several personal and professional benefits that you can gain after passing the Google Google-Workspace-Administrator Exam. The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of Google certified professional community.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q54-Q59):

NEW QUESTION # 54
Your organization is on Google Workspace Enterprise and allows for external sharing of Google Drive files to facilitate collaboration with other Google Workspace customers. Recently you have had several incidents of files and folders being broadly shared with external users and groups. Your chief security officer needs data on the scope of external sharing and ongoing alerting so that external access does not have to be disabled.
What two actions should you take to support the chief security officer's request? (Choose two.)

- A. Review total external sharing in the Aggregate Reports section.
- B. Create a custom Dashboard for external sharing in the Security Investigation Tool.
- C. Automatically block external sharing using DLP rules.
- D. Create an alert from Drive Audit reports to notify of external file sharing.
- E. Review who has viewed files using the Google Drive Activity Dashboard.

Answer: B,D

Explanation:

NEW QUESTION # 55
Several users in your organization reported an issue with receiving emails from one particular external sender You want to troubleshoot the issue and determine whether Google received these emails What should you do?

- A. Update your MX records to make sure they point to Google mail servers
- B. Check if your Google Workspace domain registration expired
- C. Search for missing email messages by using email Log Search {ELS) and determine why messages weren't delivered
- D. Open a support ticket with Google Workspace Support

Answer: C

Explanation:
Step by Step Comprehensive Detailed Explanation:
Access Email Log Search: Sign in to the Google Admin console and navigate to "Reports" then "Audit" and select "Email Log Search." Perform a Search: Enter the details of the external sender and the date range to search for the missing emails.
Analyze Results: Review the search results to see if the emails were received, bounced, or filtered.
Determine Cause: Identify any issues such as delivery errors or spam filtering that might have affected the emails.

NEW QUESTION # 56
Your organization is implementing a new customer support process that uses Gmail. You need to create a cost-effective solution that allows external customers to send support request emails to the customer support team. The requests must be evenly distributed among the customer support agents. What should you do?

- A. Use delegated access for a specific email address that represents the customer support group, and add the customer support team as delegates for that email address.
- B. Set up an inbox for the customer support team. Provide the login credentials to the customer support team.
- C. Create a Google Group, add the support agents to the group, and set the posting permissions to "Public."
- D. Create a Google Group, enable collaborative inbox settings, set posting permissions to "Anyone on the web", and add the customer support agents as group members.

Answer: D

Explanation:
A Google Group with collaborative inbox settings allows you to evenly distribute support request emails among the team. By setting the posting permissions to "Anyone on the web," external customers can send emails directly to the group, and the emails will be distributed to the support agents as tasks. This is a cost-effective solution that also provides an organized way to manage and track customer support requests.

NEW QUESTION # 57
Your company is using Google Workspace Business Plus edition, and the security team has reported several unsuccessful attempts to sign in to your Google Workspace domain from countries where you have no local employees. The affected accounts are from several executives in the main office.
You are asked to take measures to mitigate this security risk. Although budget is not a concern, your company prefers a minimal financial outlay to fix the issue, which you are tasked with managing. Which two solutions would help you mitigate the risk at minimal cost?
Choose 2 answers

- A. For all executives, create new accounts with random characters to match Google best practices, migrate
- B. Deploy Google Cloud Armor on a dedicated project, and create a rule to allow access to Google Workspace only from specific locations.
- C. Upgrade to Google Workspace Enterprise Plus for all accounts, and define Context-Aware Access levels to only a list of countries where the company has employees.
- D. Deploy 2-Step Verification for all users who have security keys.
- E. Subscribe to Cloud Identity Premium for all accounts, and define Context-Aware Access levels to only a list of countries where the company has employees.

Answer: C,D

Explanation:
data from the former accounts, and then delete them.

NEW QUESTION # 58
Your organization has been on Google Workspace Enterprise for one year. Recently, an admin turned on public link sharing for Drive files without permission from security. Your CTO wants to get better insight into changes that are made to the Google Workspace environment. The chief security officer wants that data brought into your existing SIEM system.
What are two ways you should accomplish this? (Choose two.)

- A. Use the Data Export Tool to export admin audit data to your existing SIEM system
- B. Use the BigQuery export to send admin audit data to the existing SIEM system via custom code
- C. Use Apps Script and the Reports API to export admin audit data to your existing SIEM system.
- D. Use the BigQuery export to send drive audit data to the existing SIEM system via custom code.
- E. Use Apps Script and the Reports API to export drive audit data to the existing SIEM system

Answer: B,C
