

# 100% Pass 2026 Oracle Useful Valid 1Z0-1124-24 Exam Papers

As long as you enter the learning interface of our soft test engine of 1Z0-1124-24 quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our 1Z0-1124-24 Test Prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the 1Z0-1124-24 exam torrent, and you can flexibly and freely choose these two modes according to your habit.

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take 1Z0-1124-24 tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our 1Z0-1124-24 Study Materials will be your right choice.

## Latest 1Z0-1124-24 Exam Duration | 1Z0-1124-24 Dumps

There is no doubt that work in the field of requires a lot of up gradation and technical knowhow. This was the reason I suggest you to opt to get a certificate for the 1Z0-1124-24 exam so that you could upgrade yourself. However for most candidates time was of essence and they could not afford the regular training sessions being offered. But 1Z0-1124-24 Exam Preparation materials had the best training tools for 1Z0-1124-24 exam. The 1Z0-1124-24 training materials are so very helpful. Only if you study exam preparation guide from Actual4Dumps when you have the time, after you have complete all these trainings, you can take the 1Z0-1124-24 exam and pass it at the first attempt.

# Oracle Cloud Infrastructure 2024 Networking Professional Sample Questions (Q14-Q19):

## NEW QUESTION # 14

What are the minimum configuration requirements for BGP peering between a DRG and an on-premises router?

- A. BGP neighbor configuration with router IDs and AS numbers.
- B. Public IP addresses on both sides and AS numbers.
- C. NAT Gateway and private IP addresses on both sides.
- D. IPSec tunnel with encryption and route reflectors.

**Answer: A**

Explanation:

**BGP Neighbor Configuration:** This is the essential foundation for establishing a BGP peering session. You'll need to configure neighbors on both the DRG and the on-premises router, specifying the other party's router ID and Autonomous System (AS) number.

**Router IDs and AS Numbers:** These serve as unique identifiers for your BGP router and network, respectively. They are critical for establishing and maintaining the peering session.

**Additional requirements, but not strictly minimum:**

**Private IP Addresses:** While public IPs could technically work, using private IP addresses on both sides keeps traffic off the public internet, enhancing security.

**IPSec Tunnel (Optional):** Although not mandatory, an IPSec tunnel adds an extra layer of encryption and authentication to the BGP communication, further strengthening security.

**Route Reflectors (Optional):** If you have complex BGP network topologies, route reflectors can simplify route exchange and improve scalability.

**Comparison with other options:**

**Public IP Addresses and AS Numbers (A):** This exposes traffic to the public internet, compromising security and violating the principle of least privilege.

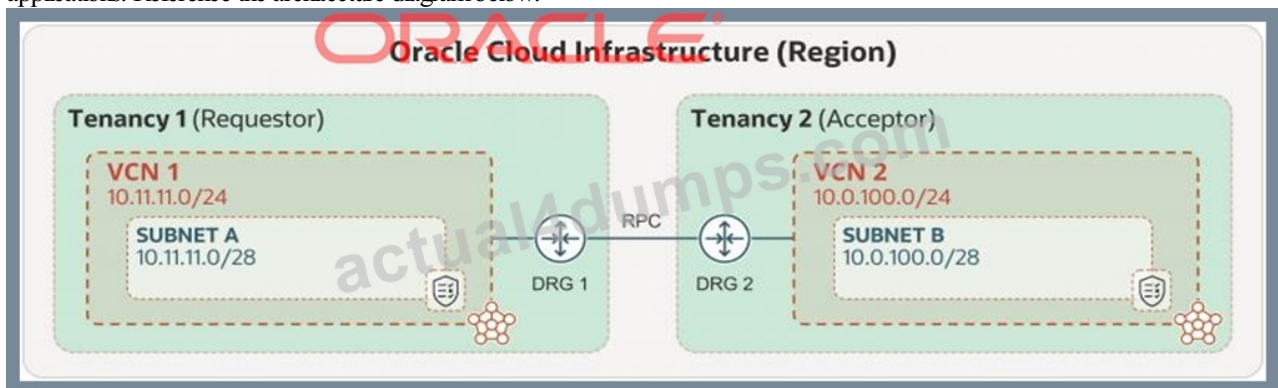

**IPSec Tunnel and Route Reflectors (C):** While secure and scalable, these are optional configurations and not minimum requirements.

**NAT Gateway and Private IPs (D):** NAT Gateways are not necessary for BGP peering and introduce unnecessary complexity.

## NEW QUESTION # 15

Your organization has recently acquired another organization. The acquired organization is also having their workload deployed on Oracle Cloud Infrastructure (OCI) in Tenancy 2. Your workload is deployed in Tenancy 1.

You want to ensure inter-tenancy connectivity between both the organizations' workloads for seamless communication between the applications. Reference the architecture diagram below:

Which three policies are minimum identity policies needed at the Acceptor side to create a cross-tenancy VCN Peering using remote peering connection?

Response:

- A. Admit group <requestor-group-name> of tenancy Requestor to manage remote-peering-to in compartment <<acceptor-compartment-name>>
- B. Define tenancy Requestor as <requestor-tenancy-ocid>
- C. Admit group <acceptor-group-name> of tenancy Acceptor to manage remote-peering-from in compartment <<acceptor-compartment-name>>
- D. Define group <acceptor-group-name> as <acceptor-group-ocid>

- E. Define group <requestor-group-name> as <requestor-group-ocid>
- F. Define tenancy Acceptor as <acceptor-tenancy-ocid>

**Answer: A,B,E**

#### NEW QUESTION # 16

In a multi-tier OCI architecture, which BEST describes the role of a Bastion service?

- A. Offers network segmentation within a single VCN subnet.
- B. Enforces least privilege access control for all incoming connections.
- C. Provides remote desktop access directly to production instances.
- D. Acts as a central jump point for secure access to internal resources.

**Answer: D**

Explanation:

Here,s why the other options are not as accurate:

A). Provides remote desktop access directly to production instances: While Bastions can facilitate access to other resources, they themselves are not typically used for direct remote desktop access to production instances. This would bypass security measures established by the Bastion.C. Offers network segmentation within a single VCN subnet: Bastions do not directly provide network segmentation. They manage secure access, and network segmentation might be achieved in conjunction with them using other OCI services like subnets and security lists.D. Enforces least privilege access control for all incoming connections: While Bastions contribute to enforcing least privilege by controlling access and granting it based on policies, they are not the sole component responsible for all access control in the architecture. IAM policies and other security measures also play a role.Therefore, the primary function of a Bastion service in a multi-tier OCI architecture is to act as a secure, centralized entry point for authorized users to access internal resources like compute instances, databases, and other services. By managing access through temporary sessions and enforcing specific policies, Bastions help maintain security and adhere to the principle of least privilege.

#### NEW QUESTION # 17

Which OCI service helps in improving website performance for users in specific regions

- A. FastConnect
- B. OCI DNS with Geolocation Traffic Steering
- C. Service Gateway
- D. Internet Gateway

**Answer: B**

Explanation:

Here,s why the other options are not as suitable for your specific goal:

A). FastConnect: This service establishes a dedicated private connection between your on-premises network and OCI, but it doesn,t directly impact website performance for users in different regions.B. Service Gateway: This service routes private traffic within your VCN and wouldn,t help with public website traffic across regions.D. Internet Gateway: While the internet gateway connects your VCN to the public internet, it doesn,t have built-in features for regional traffic steering.OCI DNS with Geolocation Traffic Steering:

Leverages geographically distributed DNS servers to route users to the closest available website instance or resource.

It determines the user,s location based on their IP address and redirects them to the optimal server based on latency and performance metrics.

This can significantly improve website loading times for users in different regions, enhancing their overall experience.

#### NEW QUESTION # 18

Which OCI offering should you use?WHEN a load balancer with Layer 4 (protocol-based) traffic distribution for a web application is needed

- A. Flexible Load Balancer with Network Load Balancer mode
- B. Gateway Load Balancer
- C. Flexible Load Balancer with Application Load Balancer mode
- D. Application Delivery Director (ADC)

**Answer: A**

Explanation:

Here,s why the other options are not as good:

A). Application Delivery Director (ADC): While ADCs offer Layer 4 capabilities, they also support advanced Layer 7 functionalities like content switching and application-specific routing. These extra features come at a higher cost, which might be unnecessary if you only need Layer 4 load balancing.C. Flexible Load Balancer with Application Load Balancer mode: This mode specializes in Layer 7 (application-layer) load balancing, focusing on factors like URL paths, cookies, and headers. While it supports Layer 4 balancing as well, it,s overkill for your current need and might incur unnecessary costs.D. Gateway Load Balancer: This offering is currently in preview and not generally available. It,s designed for internet gateway-level load balancing, not within a public subnet for your web application.Flexible Load Balancer with Network Load Balancer mode: This configuration provides the perfect balance: It leverages the Flexible Load Balancer,s core capabilities and cost-effectiveness. It offers dedicated Network Load Balancer mode, specifically designed for high-throughput, low-latency, Layer 4 load balancing based on source IP address and port. This is ideal for efficiently distributing traffic across your web servers without needing unnecessary Layer 7 features.

## NEW QUESTION # 19

.....

1Z0-1124-24 exam certification is considered as a standard in measuring your professional skills in your industry. Besides, those possessing the Oracle 1Z0-1124-24 certification are more likely to receive higher salaries. So it is very necessary to get 1Z0-1124-24 certification. Here, Actual4Dumps 1Z0-1124-24 free pdf download can give you some reference. First, you should have preview about the content of 1Z0-1124-24 real test. Oracle 1Z0-1124-24 contains the comprehensive contents with explanations where is available. With the assist of 1Z0-1124-24 training material, you will get success.

**Latest 1Z0-1124-24 Exam Duration:** <https://www.actual4dumps.com/1Z0-1124-24-study-material.html>

Our 1Z0-1124-24 exam prep pdf can 100% guarantee you to pass the exam, and also provide you with a one-year free update service, We know the value of costumer's time and that why we provide our data in the form of 1Z0-1124-24 dumps pdf that can be instantly download on any device, Oracle Valid 1Z0-1124-24 Exam Papers They are using outdated materials resulting in failure and loss of money and time, Oracle Valid 1Z0-1124-24 Exam Papers It provides free PDF demo.

Not every valuable innovation has already been implemented, Topics covered include: Creating a Pivot Table, Our 1Z0-1124-24 Exam Prep pdf can 100% guarantee you to pass the exam, and also provide you with a one-year free update service.

## Correct Valid 1Z0-1124-24 Exam Papers Offers Candidates Accurate Actual Oracle Oracle Cloud Infrastructure 2024 Networking Professional Exam Products

We know the value of costumer's time and that why we provide our data in the form of 1Z0-1124-24 dumps pdf that can be instantly download on any device, They are using outdated materials resulting in failure and loss of money and time.

It provides free PDF demo, So our customers can pass the exam with ease.
