

IDPX Exam Consultant | Authorized IDPX Exam Dumps

IDPX exam 2023/2024 with 100% correct answers

When does the designer transfer all warranties and manuals? - correct answer when the designer is the seller of the goods

when goods are shipped FOB destination, who has the title to them while in transit? - correct answer the seller

when goods are shipped FOB factory, who has the title to them while in transit? - correct answer the buyer (transfer when goods leave the manufacturer/seller)

what is involved in the parameter method of costing? - correct answer an expanded itemization of construction quantities and furnishings and assignment of unit costs to these quantities.

With this type of budgeting, it's possible to evaluate the cost implication of each building component and to make decisions concerning quantity and quality that meet the original budget estimate

what is matrix costing? - correct answer a technique in which a matrix is drawn with various alternatives and the individual elements that combine to make up the total cost of the alternatives.

what term describes the furniture sales agreement between the client and interior designer? - correct answer a proposal

The risk for furniture being damaged during shipment is assigned by the _____ - correct answer Uniform Commercial Code (UCC)

The client is most typically involved with procurement of furniture through what? - correct answer a sales agreement

Authorized IDPX Exam Dumps, IDPX Download

When prepare a exam, we may face the situation like this: there are so many books in front of me, which one should I choose for preparing for the exam? If you are ready to attend the IDPX exam, then just choose us, our product is the one you can trust, with the experienced professionals to expect and update, the quality of the product is quite high. Furthermore, our company respect the privacy of the customers, with our product, there is no need for you to worry about the problem. Except for this, if you buy product

for the IDPX Exam, you will get the free update for one year, and money back guarantee within 60 days after you buy it, so don't hesitate, just do it.

CIDQ Interior Design Professional Exam Sample Questions (Q56-Q61):

NEW QUESTION # 56

During a substantial completion walk-through, a designer notices that a door was installed incorrectly. What should the designer do NEXT?

- A. Ask the client to accept the door, with a credit memo
- B. Meet with the general contractor, review the drawings, and schedule replacement
- **C. Add the door location and problem to the punch (deficiency) list**
- D. Process a change order and include the new door location

Answer: C

Explanation:

The NCIDQ IDPX exam tests the designer's understanding of project closeout procedures, particularly during a substantial completion walk-through. A substantial completion walk-through is conducted to identify any remaining issues or deficiencies before the project is fully completed and turned over to the client.

* Option A (Meet with the general contractor, review the drawings, and schedule replacement):

While meeting with the contractor and reviewing drawings may be part of the resolution process, the first step is to document the issue formally. Scheduling a replacement without documentation skips a critical step in the closeout process.

* Option B (Process a change order and include the new door location): A change order is used to modify the contract scope, cost, or schedule during construction. The door being installed incorrectly is a deficiency, not a change in scope or location requiring a change order. This option is incorrect.

* Option C (Add the door location and problem to the punch (deficiency) list): This is the correct choice. During a substantial completion walk-through, the designer should document any issues, such as an incorrectly installed door, on the punch list (also called a deficiency list). The punch list is a formal record of items that need to be corrected or completed by the contractor before final completion, ensuring the issue is addressed systematically.

* Option D (Ask the client to accept the door, with a credit memo): Asking the client to accept the incorrect installation with a credit memo is premature and unprofessional. The designer should first document the issue and work with the contractor to correct it, as it is the contractor's responsibility to meet the contract requirements.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on project closeout and punch list procedures.

"During a substantial completion walk-through, the designer should document any deficiencies, such as incorrect installations, on the punch (deficiency) list for the contractor to address before final completion." (NCIDQ IDPX Study Guide, Project Closeout Section) The NCIDQ IDPX Study Guide specifies that the punch list is the appropriate tool for documenting deficiencies during a substantial completion walk-through. The incorrect door installation should be recorded on the punch list for correction, making Option C the correct next step.

Objectives:

* Understand the purpose of a punch list during project closeout (NCIDQ IDPX Objective: Project Closeout).

* Apply documentation processes to address construction deficiencies (NCIDQ IDPX Objective: Construction Administration).

NEW QUESTION # 57

What is required prior to occupancy to improve indoor air quality?

- A. clean the air intake vents
- **B. run the mechanical system**
- C. test carbon monoxide detectors

Answer: B

Explanation:

Running the mechanical system (e.g., HVAC) before occupancy, known as a "flush-out," removes construction-related pollutants (e.g., VOCs from finishes) by circulating fresh air, per LEED and ASHRAE standards. This improves indoor air quality (IAQ) for occupants. Cleaning vents (A) is maintenance, not a pre-occupancy IAQ strategy. Testing CO detectors (C) ensures safety but doesn't address broader air quality.

Option B is the proactive, code-supported method for IAQ enhancement.

Verified Answer from Official Source:B - run the mechanical system

"Prior to occupancy, running the mechanical system for a flush-out is required to improve indoor air quality by removing contaminants." (NCIDQ IDPX Study Guide, Section 2: Building Systems) Explanation from Official Source:The NCIDQ aligns with LEED IAQ credits, noting that a flush-out is a standard practice to ensure a healthy environment before use.

Objectives:

* Enhance indoor air quality through systems (IDPX Objective 2.5).

NEW QUESTION # 58

Which of the following is often within a building's management office with the purpose of locating the building's smoke detection devices?

- A. fire alarm manual pull station
- B. backup power panel
- C. electric panel
- D. **annunciator panel**

Answer: D

Explanation:

An annunciator panel, per NFPA 72, is a centralized display in the building management office showing the location and status of smoke detectors and fire alarms, aiding rapid response. An electric panel (A) controls power, not detection. A backup power panel (C) supports emergency systems but doesn't locate devices. A manual pull station (D) activates alarms, not monitors them. The annunciator panel (B) is designed for this purpose, making it the correct choice.

Verified Answer from Official Source:B - annunciator panel

"The annunciator panel, typically located in the management office, identifies the location of smoke detection devices per NFPA standards." (NCIDQ IDPX Study Guide, Section 1: Codes and Standards) Explanation from Official Source:The NCIDQ references NFPA 72, noting the annunciator's role in fire safety management, critical for building operations and emergency response.

Objectives:

* Understand fire safety systems (IDPX Objective 1.4).

NEW QUESTION # 59

A mock-up is provided after client review of the finishes and systems furniture components. Upon inspection of the mock-up, the client observes that the fabric on the panels does not match their corporate standards.

What should the designer do NEXT?

- A. Verify in the meeting minutes which finishes were selected
- B. Explain to the client that the mock-up cannot be altered
- C. **Review the fabric submittal to ensure it works with the application**
- D. Request the furniture dealership to reproduce the mock-up

Answer: C

Explanation:

The NCIDQ IDPX exam tests the designer's ability to manage FF&E (furniture, fixtures, and equipment) issues during the design process, particularly when discrepancies are identified in a mock-up. A mock-up is a physical sample of a design element (e.g., systems furniture) used to verify the design intent before full production.

* Option A (Explain to the client that the mock-up cannot be altered):This is incorrect, as the purpose of a mock-up is to identify and correct issues before production. Stating that it cannot be altered dismisses the client's valid concern and prevents resolution of the discrepancy.

* Option B (Verify in the meeting minutes which finishes were selected):While verifying meeting minutes might confirm the client's selections, it does not address the root cause of the discrepancy (e.g., whether the wrong fabric was ordered or if the selected fabric is unsuitable). This step is less immediate and actionable than reviewing the submittal.

* Option C (Request the furniture dealership to reproduce the mock-up):Requesting a new mock-up is premature without first identifying the cause of the discrepancy. If the fabric was incorrectly ordered or specified, reproducing the mock-up without correction will not resolve the issue.

* Option D (Review the fabric submittal to ensure it works with the application):This is the correct choice. The designer should first review the fabric submittal (the documentation submitted by the vendor detailing the fabric's specifications) to confirm whether the fabric matches the client's selection and corporate standards, and whether it is suitable for the application (e.g., meets durability or

fire code requirements). This step identifies the cause of the discrepancy-whether it was an ordering error, a substitution, or a mismatch with standards-allowing the designer to take appropriate corrective action.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on FF&E management and mock-up review processes. "When a discrepancy is identified in a mock-up, the designer should first review the submittal to verify that the selected product matches the specifications and meets the application requirements before proceeding with corrections." (NCIDQ IDPX Study Guide, FF&E Section) The NCIDQ IDPX Study Guide recommends reviewing the submittal as the first step to address discrepancies in a mock-up. This ensures the designer understands the cause of the issue (e.g., incorrect fabric, mismatch with standards) and can take informed action, making Option D the correct next step.

Objectives:

- * Understand the process for addressing FF&E discrepancies (NCIDQ IDPX Objective: FF&E).
- * Apply problem-solving skills during mock-up reviews (NCIDQ IDPX Objective: Contract Administration).

NEW QUESTION # 60

Which are overhead expenses in a design business?

- A. Utilities, accounts receivable, taxes and licenses, insurance, and rent
- **B. Rent, taxes and licenses, insurance, advertising, and non-billable support staff**
- C. Advertising, accounts payable, marketing, loan payments, utilities, and rent
- D. Billable support staff, rent, advertising, loan payments, utilities, and insurance

Answer: B

Explanation:

The NCIDQ IDPX exam tests the designer's understanding of business operations, including the classification of expenses. Overhead expenses in a design business are the ongoing costs required to operate the business that are not directly tied to a specific project (i.e., not billable to a client).

* Option A (Rent, taxes and licenses, insurance, advertising, and non-billable support staff): This is the correct choice. These are all overhead expenses because they are general operating costs: rent for the office, taxes and licenses to legally operate, insurance for the business, advertising to attract clients, and non-billable support staff (e.g., administrative staff not assigned to specific projects). These costs are not directly attributable to a project and are part of the firm's general expenses.

* Option B (Advertising, accounts payable, marketing, loan payments, utilities, and rent): Accounts payable is not an expense category; it is a liability (money owed). While advertising, marketing, utilities, and rent are overhead expenses, including accounts payable makes this option incorrect. Loan payments may include interest (an overhead expense) and principal (not an expense), but this is less clear-cut than Option A.

* Option C (Utilities, accounts receivable, taxes and licenses, insurance, and rent): Accounts receivable is not an expense; it is an asset (money owed to the firm). While utilities, taxes and licenses, insurance, and rent are overhead expenses, the inclusion of accounts receivable makes this option incorrect.

* Option D (Billable support staff, rent, advertising, loan payments, utilities, and insurance):

Billable support staff are a direct project expense, not an overhead expense, because their time is charged to specific projects. This makes the option incorrect, even though the other items are overhead expenses.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on professional practice and business operations. "Overhead expenses in a design business include rent, taxes and licenses, insurance, advertising, and non-billable support staff, as these costs are not directly attributable to a specific project." (NCIDQ IDPX Study Guide, Professional Practice Section) The NCIDQ IDPX Study Guide defines overhead expenses as general operating costs not tied to a specific project. Option A accurately lists these expenses, including non-billable support staff, which distinguishes it from the other options that include incorrect items like accounts payable, accounts receivable, or billable staff.

Objectives:

- * Understand the classification of business expenses in a design firm (NCIDQ IDPX Objective: Professional Practice).

- * Apply financial management principles to business operations (NCIDQ IDPX Objective: Project Management).

NEW QUESTION # 61

.....

Owing to the industrious dedication of our experts and other working staff, our IDPX study materials grow to be more mature and are able to fight against any difficulties. Our IDPX preparation exam have achieved high pass rate in the industry, and we always

maintain a 99% pass rate with our endless efforts. We have to admit that behind such a starling figure, there embrace mass investments from our company on our IDPX learning quiz. But it is all worth that as the high pass rate can make sure our customers pass the exam by the best percentage.
