We provide a demo version of the real product to our customers to clear their doubts about the truthfulness and accuracy of Palo Alto Networks XSOAR Engineer (XSOAR-Engineer) preparation material. You can try the product before you buy it.

### Palo Alto Networks XSOAR Engineer Sample Questions (Q141-Q146):

#### NEW QUESTION # 141

What is the correct way to install different engines on the same Ubuntu machine for a Dev/Prod setup?.

- A. Create a DEB installer and modify in the JSON configuration.
- B. Use Shell installer and create a custom JSON configuration file.
- C. Use different docker instances in the machine to install each engine.
- **D. Use Shell installer with "Allow running multiple engines."**

**Answer: D**

Explanation:

The XSOAR Engine Installation Guide explains that a single Linux host can run multiple engines using the Shell Installer with the "Allow running multiple engines" option enabled. This method is specifically intended for Dev/Prod, HA, and multi-tenant scenarios. When this option is selected, the installer configures separate engine services and directories, preventing conflicts in ports, logs, or runtime environments.

Using Docker containers (option B) is not an officially supported or documented deployment method for running multiple XSOAR engines. Creating custom JSON or DEB installers (options A and D) applies to advanced engine deployments but does not enable multiple engines on the same host.

The Admin Guide explicitly states that the Shell Installer includes a built-in prompt allowing multiple engines to coexist safely, and this is the approved and supported mechanism provided by Palo Alto Networks.

Therefore, the correct answer is C.

#### NEW QUESTION # 142

To avoid exceeding API quotas for third-party services, indicators are only updated after the indicator cache expiration period. What is the default cache expiration period for indicators in XSOAR (minutes/days)?

- **A. 4,320 minutes (3 days)**
- B. 21,600 minutes (15 days)
- C. 20,160 minutes (14 days)
- D. 10,080 minutes (7 days)

**Answer: A**
