Salesforce Certified OmniStudio Developer Sample Questions (Q77-Q82):

NEW QUESTION # 77
A developer creates an Integration Procedure with a Set values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and executes the preview. The developer sees the data extracted by the DataRaptor in the Debug Log, but the response is empty.
What is the likely cause of this issue?

- A. The AccountId used for the preview is invalid.
- B. The DataRaptor Action did not have the Add Response To Response JSON property set to true.
- C. The Response cannot be previewed directly.
- D. A Response Action was not added to the Integration Procedure.

Answer: D

NEW QUESTION # 78
What are two items you can include on a flyout action? Choose 2 answers

- A. Another flyout
- B. A link to an Integration Procedure
- C. A link to a DataRaptor Load
- D. An OS Action

Answer: B,D

NEW QUESTION # 79
A customer sets up two LWC OmniScripts, one embedded into another. AccountId is set in a Set Values element in the parent OmniScript. The Accountid set in the parent OmniScript is used to set another Set values element ContextAccountId in the

emvedded OmniScript. The embedded OmniScript is activated.

While previewing the OmniScript flow from the parent, it is found that Account I set correct in the parent OmniScript. However ContextAccount in the embedded OmniScript is not set with the Accountid from parent OmniScript. On previewing the embedded OmniScript individually. It is found that ContextAccountId is set correctly.

What is the reason for this? Refer to the exhibit below.

- A. The flag passData.JSON in the parent OmniScript in not configured correctly.
- B. The WLC PubSub Messge flag in the Set Values action of the parent OmniScript has not been set.
- C. Both parent and embedded OmniScripts have the same element name for the Set Values element.
- D. A developer failed to include a Navigate Action Element to pass data from the parent OmniScript.

Answer: B

NEW QUESTION # 80
in a DataRaptor Extract JSON Path, which option below has the correct syntax for a relationship query for a native Salesforce record?

- A. Contact: Caseld:Subject
- B. Contact:Caseld__rSubject
- C. Contact:Caseld__r-Subject
- D. ContactCaseld. Subject

Answer: C

NEW QUESTION # 81
A developer is creating aFlex Cardfor a new Community page. The FlexCard will display case information along with action to close

the case and update the case. And it will be styled using the Community's theme.
What must be developer do to configure the FlexCard for deployment in a community?

- A. Configure the Component visibility in the custom Component.
- B. Set the Target property in publishing Options to the Community page"
- C. Set the Developer property in Card Configuration to "Community"
- D. Add the FlexCard's API name to FlexCard Player component

Answer: B

Explanation:
Explanation
The Target property in publishing Options determines where the FlexCard will be displayed. Setting it to the Community page will make the FlexCard available in the community
