You will receive an email attached with Arch-303 exam study guide within 5-10 min after you pay. It means that you do not need to wait too long to get the dumps you want. Besides, you will have free access to the updated Salesforce Arch-303 study material for one year. If there is any update, our system will send the update Arch-303 Test Torrent to your payment email automatically. Please pay attention to your payment email for the latest Salesforce Arch-303 exam dumps. If there is no any email about the update, please check your spam.

Salesforce Certified B2C Commerce Architect Sample Questions (Q36-Q41):

NEW QUESTION # 36

There Is an Issue with the site when the domain Is opened from Google search results. After researching the problem. It turns out that the site returns * 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add this snippet to the aliases configuration for the domain
- **B. Add dynamic catch-all rule to redirect to home page.**
- C. Add dynamic redirect if the URL contains parameter to Home Show. Add this snippet to the aliases configuration for the domain
- D. Add this snippet to the aliases configuration for the domain:

Answer: B

Explanation:

To address the issue of the site returning a 404 error when accessed with a parameter from Google search results, a dynamic catch-all rule to redirect such requests to the homepage is an effective solution (Answer A).

This approach ensures that users landing from external links with appended parameters, which might not match any configured route or alias, are redirected to a valid page instead of seeing an error page. This improves the user experience and minimizes potential bounce rates caused by broken links or outdated URLs.

NEW QUESTION # 37

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations.

Which environment should be used as the ideal environment for this kind of load test?

- A. The Production instance of the existing Realm
- B. The Production Instance of a rental Realm
- C. The Development Instance of a rental Realm
- **D. The Development Instance of the existing Realm.**

Answer: D

Explanation:

For conducting load testing of new integrations with a payment provider and Order Management System, it is recommended to use the Development Instance of the existing Realm (Option B). This approach ensures that any issues found during testing do not affect the live production environment, while still allowing tests to be conducted in an environment that mirrors the production setup as closely as possible. This minimizes the risk of disruptive downtime or customer-facing errors when the integration goes live.

NEW QUESTION # 38

During discovery, the customer required a feature that is not included in the standard Storefront Reference Architecture (SFRA). In order to save budget, the Architect needs to find the quickest way to implement this feature.

What is the primary resource the Architect should use to search for an existing community Implementation of the requested feature?

- A. Salesforce B2C Commerce Documentation
- B. Salesforce Trailblazer Portal
- **C. Salesforce Commerce Cloud GitHub repository**
- D. Salesforce Commerce Cloud Trailblazer community

Answer: C

Explanation:

When seeking a community implementation of a feature not included in the standard Storefront Reference Architecture (SFRA), the primary resource should be the Salesforce Commerce Cloud GitHub repository (Answer A). This repository often contains projects and code samples contributed by other developers in the community, which might include custom implementations that could be adapted to meet the customer's requirements. This approach not only leverages existing solutions that have been shared publicly but also can significantly save time and resources in development.

NEW QUESTION # 39

The Client has requested an Architect's help in documenting the architectural approach to a new home page.

The requirements provided by the business are:

* Multiple areas of static image content, some may need text shown at well

- * The content page must be Realizable
 - * A carousel of featured products must be shown below a banner 101191
 - * Recommended categories will be featured based on the time of year
- Which two solutions would fulfil these requirements?
Choose 2 answers

- A. Leverage B2C Commerce ContentManagement Service
- **B. Leverage B2C Commerce content slots and assets**
- C. Leverage B2C Commerce locales in Business Manager
- **D. Leverage B2C Commerce Page Designer with a dynamic layout.**

Answer: B,D

Explanation:

To fulfill the requirements of having multiple static image content areas, a carousel of featured products, and dynamic content adjustments based on the time of year:

* Option C (Leverage B2C Commerce content slots and assets): This solution allows for dynamic content management where different assets and slots can be used to manage and display static images, text overlays, and other content variations effectively.

* Option D (Leverage B2C Commerce Page Designer with a dynamic layout): Using the Page Designer with a dynamic layout enables the easy assembly of complex page designs, including carousels and responsive elements that adjust based on viewing device or other criteria like time of year. This tool provides the flexibility required for real-time customization and resizability of page elements.

These solutions provide robust and flexible management of site content that meets the business's needs for a visually engaging and adaptable homepage.

NEW QUESTION # 40

Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job that updates this tracking number for exported orders, which were last modified yesterday.

Part of this job's code looks like the following:

Based on the above description and code snippet, which coding best practice should the Architect enforce?

- **A. Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.**
- B. Standard order import should be used instead of modifying multiple order objects with custom code.
- C. The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.
- D. Post-processing of search results is a bad practice that needs to be corrected.

Answer: A

Explanation:

Given that the OMS provides a web-service interface and updates tracking numbers for orders modified the previous day, it is crucial to manage the potential risks of service unavailability or delays that could lead to thread exhaustion in Salesforce Commerce Cloud. Implementing a circuit breaker pattern helps to manage failures gracefully by halting the interaction with the OMS if it becomes unresponsive, thereby preventing the service from impacting the entire system. Additionally, configuring timeouts ensures that the service calls do not hold up resources indefinitely. These strategies help maintain system stability and responsiveness, particularly when dealing with external systems over which there may be limited control.

NEW QUESTION # 41

.....

The TestKingFree guarantees their customers that if they have prepared with Salesforce Arch-303 practice test, they can pass the Salesforce Arch-303 certification easily. If the applicants fail to do it, they can claim their payment back according to the terms and conditions. Many candidates have prepared from the actual Salesforce Arch-303 Practice Questions and rated them as the best to study for the examination and pass it in a single try with the best score.
