# The best UiPath-TAEPv1 Real Test Dumps: UiPath Test Automation Engineer Professional v1.0 are suitable for you - Itbraindumps

Our UiPath-TAEPv1 exam question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Our UiPath-TAEPv1 exam questions boost varied functions and they include the self-learning and the self-assessment functions, the timing function and the function to stimulate the UiPath-TAEPv1 Exam to make you learn efficiently and easily. There are many advantages of our UiPath-TAEPv1 study tool. To understand the details of our UiPath-TAEPv1 practice braindump, you can visit our website Itbraindumps.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	- Environments, Applications, and - or Tools: This section of the exam measures the skills of RPA Developers and evaluates comfort with various tools and environments commonly used with UiPath. These include Microsoft Excel, JSON, XML, ERPs, web elements, browsers, virtual machines, version control systems, and UiPath components such as Studio, Orchestrator, and Robots.
Topic 2	UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 3	UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 4	Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.

Topic 5	• CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 6	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:
Topic 7	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 8	• UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 9	• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.

Itbraindumps UiPath UiPath-TAEPv1 preparation material is a comprehensive solution for UiPath UiPath-TAEPv1 test preparation, with a variety of features aimed to help you earning the UiPath-TAEPv1. The UiPath-TAEPv1 test is a required step in getting the UiPath Test Automation Engineer Professional v1.0 certification badge. With Itbraindumps, you will get access to UiPath UiPath-TAEPv1 Actual Questions that will allow you to focus on important concepts and prepare for the UiPath exam in a short period of time.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q27-Q32):

NEW QUESTION # 27
How are test cases added dynamically to a Test Set based on labels in UiPath Test Manager?

- A. Test Cases with all of the selected labels are assigned to the Test Set.
- B. Test Cases with any of the selected labels are assigned to the Test Set.
- C. Test Cases with a specified number of the selected labels are assigned to the Test Set.
- D. Only the manual and automated labels are used to assign Test Cases to the Test Set.

Answer: B

Explanation:
In UiPath Test Manager, when using labels to dynamically assign test cases to a Test Set, any test case that matches any of the selected labels will be added. This enables flexible grouping based on shared characteristics.

NEW QUESTION # 28
In which of the following cases is the Self-Hosted agent needed when creating a pipeline using the UiPath Integration for Azure DevOps?

- A. In cases where the Orchestrator is not accessible from the public internet.
- B. In cases where UiPath Orchestrator is not available.
- C. In cases where Cross-Platform projects are built and deployed.
- D. In cases where an External Application cannot be created in order to connect to UiPath Orchestrator.

Answer: A

Explanation:
A Self-Hosted agent is required when creating a pipeline using the UiPath Integration for Azure DevOps in cases where Orchestrator is not accessible from the public internet. This agent acts as an intermediary to facilitate communication between the DevOps pipeline and Orchestrator when direct internet access is not available.

NEW QUESTION # 29
In software testing what does the term "test case" refer to?

- A. It's the process of executing the system to reveal bugs.
- B. It's a written document outlining the detailed process of software development.
- C. It's a set of conditions under which a tester determines if a system under test satisfies requirements and functions correctly.
- D. It's the maximum load that the system can tolerate without crashing.

Answer: C

Explanation:
A test case is a set of conditions, inputs, and expected results used to determine whether a system under test behaves correctly and meets its specified requirements. It helps validate functionality and detect defects.

NEW QUESTION # 30
What is the purpose of the 'Verify Expression' activity in the UiPath.Testing.Activities package of UiPath?

- A. It verifies and asserts the output of a specific activity.
- B. It verifies if a given expression falls within a specific range.
- C. It verifies the truth value of a given expression.
- D. It verifies an expression by comparing it with another expression using a defined operation.

Answer: C

Explanation:
The 'Verify Expression' activity in the UiPath.Testing.Activities package is used to evaluate the truth value of a given VB expression. If the expression evaluates to True, the test continues; if False, it results in a failed assertion.

NEW QUESTION # 31
What kind of changes can be made to test sets linked from Orchestrator in Test Manager?

- A. The name description, or version can not be edited. Any changes need to be made in Orchestrator.
- B. The description can not be edited, but the name and version can be edited in Test Manager.
- C. The version can not be edited, but the name and description can be edited in Test Manager.
- D. The name can not be edited, but the version and description can be edited in Test Manager.

Answer: C

Explanation:
When test sets are linked from Orchestrator in Test Manager, the version cannot be edited in Test Manager. However, the name and description of the test set can be modified within Test Manager to support better project documentation or categorization.

NEW QUESTION # 32
