# Get VMware 2V0-16.25 Dumps For Quick Study [2026]

2026 Latest Prep4away 2V0-16.25 PDF Dumps and 2V0-16.25 Exam Engine Free Share: https://drive.google.com/open?id=1a1Km7xd37TufxJ_nA27kibZRKYvkCsh2

This society is ever – changing and the test content will change with the change of society. You don't have to worry that our 2V0-16.25 study materials will be out of date. In order to keep up with the change direction of the exam, our question bank has been constantly updated. We have dedicated IT staff that checks for updates every day and sends them to you automatically once they occur. The update for our 2V0-16.25 Study Materials will be free for one year and half price concession will be offered one year later.

After you practice our study materials, you can master the examination point from the 2V0-16.25 exam torrent. Then, you will have enough confidence to pass your exam. We can succeed so long as we make efforts for one thing. As for the safe environment and effective product, why don't you have a try for our 2V0-16.25 Test Question, never let you down! Before your purchase, there is a free demo for you. You can know the quality of our 2V0-16.25 guide question earlier.

2V0-16.25 Exam Vce | 100% Free Pass-Sure New VMware vSphere Foundation 9.0 Administrator Test Pdf

Many people would like to fall back on the most authoritative company no matter when they have any question about preparing for 2V0-16.25 exam. Our company is definitely one of the most authoritative companies in the international market for 2V0-16.25 exam. What's more, we will provide the most considerate after sale service for our customers in twenty four hours a day seven days a week, therefore, our company is really the best choice for you to buy the 2V0-16.25 Training Materials.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47
How does an administrator configure VMware Cloud Foundation (VCF) Operations for logs to send Notifications and Metrics to VCF Operations?

- A. Configure the Integration through VCF Operations for Logs.
- B. Launch the wizard from VCF Operations for Logs.
- C. Configure the Integrations through VCF Operations.
- D. Launch the wizard from VCF Operations.

Answer: C

Explanation:
To configure VMware Cloud Foundation (VCF) Operations for logs so that it can send notifications and metrics, administrators must use the Integrations workflow inside VCF Operations.
* You configure integrations centrally from the Administration > Integrations page in VCF Operations.
* Here you add the VCF Operations for Logs data source, configure credentials, and set up Webhooks for alerts.
* Once integration is completed, VCF Operations for Logs data can be consumed in VCF Operations dashboards and used for notifications and metrics.
This process is not launched directly from "VCF Operations for Logs," but rather from VCF Operations itself, where all integrations (vCenter, vSAN, NSX, and Logs) are centrally managed.

NEW QUESTION # 48
An administrator is tasked to configure VMware Cloud Foundation (VCF) Operations alerts to notify only relevant stakeholders when alerts trigger.
Which configuration step will satisfy the requirement?

- A. Configure notification to write a file to an output folder.
- B. Configure notification to use generic contact information.
- C. Configure notification for only critical alerts.
- D. Configure notification to specific alert recipients.

Answer: D

Explanation:
In VCF Operations, alerts can be configured with notification settings. To ensure only relevant stakeholders receive alerts:
* You assign specific recipients to notifications.
* This avoids alert fatigue and ensures teams only see alerts they are responsible for.
Other options:
* A. Write to file# Not for stakeholder notifications.
* B. Only critical alerts# Reduces volume, but still not targeted to relevant recipients.
* D. Generic contact info# Sends to broad groups, not selective.

VMware Cloud Foundation 9.0 -Alerting and Notification Settings
VMware Docs: Configuring Notifications in vRealize Operations

NEW QUESTION # 49
An administrator is tasked with importing a vSphere Lifecycle Manager image and applying it to a cluster containing six hosts, with two of the hosts in maintenance mode. The administrator uses the vSphere Client, navigates to the cluster, and edits the remediation settings to enable Parallel Remediation and clicks the Remediate All button to execute the remediation process.
What is the expected result of this remediation process?

- A. The image is remediated on the four hosts not in maintenance mode, in sequence. The hosts in maintenance mode are not remediated.
- B. The image is remediated on the four hosts not in maintenance mode, in parallel. The hosts in maintenance mode are not remediated.
- C. The image is remediated on the hosts in maintenance mode in parallel. The hosts not in maintenance mode are not remediated.
- D. The image is remediated on the hosts in maintenance mode in parallel, and when completed the hosts not in maintenance mode are remediated in parallel.

Answer: C

Explanation:
When usingvSphere Lifecycle Manager (vLCM)withParallel Remediationenabled, the following rules apply:
* Parallel remediation only applies to ESXi hosts that are already in Maintenance Mode.
* vLCM doesnotput hosts into Maintenance Mode automatically in this mode.
* Similarly, it does not exit Maintenance Mode automatically after remediation.
* Hosts not in Maintenance Mode are skipped.
* If Parallel Remediation is activated, vLCM remediates only those hosts that are already in Maintenance Mode.
* Any hosts that are not in Maintenance Mode remain untouched.
* Remediation happens in parallel for all eligible hosts.
* In this case, two of the six hosts are in Maintenance Mode. Those two hosts will be remediated in parallel.
* The remaining four hosts (not in Maintenance Mode) willnotbe remediated at all.
Why the other options are incorrect:
* A. Four hosts not in maintenance mode are remediated in parallel##Incorrect. Hosts must already be in Maintenance Mode to be remediated.
* B. Hosts in maintenance mode first, then non-maintenance hosts##Incorrect. Non-maintenance mode hosts are skipped, not remediated after.
* C. Four hosts remediated sequentially, others skipped##Incorrect. Parallel Remediation does not touch non-maintenance mode hosts.
* D. Hosts in maintenance mode remediated in parallel; others skipped##Correct and matches VMware documentation.
References:
VMware vSphere 9.0 Documentation -Parallel Remediation for Lifecycle Manager Images VMware vSphere 9.0 Documentation -Parallel remediation applies only to ESX hosts already in maintenance mode

NEW QUESTION # 50
The operations team is tasked with the preparation of a weekly health status overview of a VMware vSphere Foundation (VVF) environment to senior management with the following requirements:
* It should be sent every Monday morning.
* It must include KPIs related to cluster health, storage usage, and virtual machine (VM) growth trends.
* Operational overhead should be minimized.
Which two actions must the administrator perform to satisfy these requirements? (Choose two.)

- A. Create a custom View with the KPIs and add it to a new Report Template.
- B. Export the built-in Cluster Summary report via FTP.
- C. Create a custom dashboard with the required KPIs.
- D. Export the desired metrics from the Metrics Explorer to CSV.
- E. Configure the scheduler to send the report via e-mail weekly.

Answer: A,E

Explanation:
VMware vSphere Foundation (VVF) integrates VMware Aria Operations (vRealize Operations) for intelligent operations management, enabling automated reporting to minimize operational overhead. To meet the requirements for a weekly health status overview including cluster health, storage usage, and VM growth trends, an administrator must first create a custom View in Aria Operations to define the specific KPIs (e.g., cluster availability, datastore capacity, and VM count trends over time). This View is then added to a new Report Template, which compiles the data into a structured report format like PDF or CSV. Next, the scheduler in Aria Operations is configured to generate and email the report every Monday morning, ensuring delivery without manual intervention. This approach leverages built-in automation for recurring tasks, reducing effort compared to ad-hoc exports or manual configurations.
Other options do not fully satisfy the requirements: Option A creates a dashboard for interactive visualization but not a scheduled report; Option C uses a built-in report with limited customization and no direct FTP export or scheduling; Option E involves manual CSV exports from Metrics Explorer, increasing overhead and lacking automation.

NEW QUESTION # 51
An administrator is tasked to create a new VMware vSAN cluster. The following information was provided to the administrator:
* Should host high performance application.
* Workload is latency dependent.

* Workload, compute and storage must be in the vSAN cluster.
Which configuration should the administrator choose for this vSAN cluster?

- A. vSAN Original Storage Architecture (OSA)
- B. vSAN Original Storage Architecture (OSA) Stretched Cluster
- C. vSAN Storage Cluster
- D. vSAN Express Storage Architecture (ESA)

Answer: D

Explanation:
The workload requirements specify:
* High-performance application
* Latency-dependent workloads
* Compute and storage must reside in the vSAN cluster
The correct option isvSAN Express Storage Architecture (ESA)because:
* ESA is designed forhigh-performance, low-latency applications.
* It leveragesNVMe-based storage devicesand25GbE networking, delivering better IOPS and reduced latency compared to OSA.
* OSA(Original Storage Architecture) is older and less efficient.
* OSA Stretched Cluster(A) is for resilience across sites, not specifically performance.
* vSAN Storage Cluster (B)is a generic term and not specific.
