MSSC CLT Practice Test (Certified Logistics Technician)

New hazmat employees must be trained within one year of their hire. - correct answer False

Which mode of transportation is best for moving items very quickly? - correct answer Air

Costumer requirements as specified by a picking document: - correct answer Order

A pallet of boxes of products is an example of a: - correct answer Transport package

In JIT inventory control, having one item too many is as bad as having one item too few. - correct answer True

Who developed the JIT concept of inventory control? - correct answer Japanese

HAZCOM is another word for: - correct answer The Right to Know law

The process of using materials to contain and protect a product during handling, storage and shipping is called: - correct answer Packaging

Which government agency regulates the import of food and cosmetics into the U.S? - correct answer FDA

Which of the following is a powered storage device that moves either horizontally or vertically to bring stored material to order pickers? - correct answer Carousel

Which mode of transportation is the fastest for long distances? - correct answer Air

As for candidates who will attend the exam, choosing the practicing materials may be a difficult choice. Then just trying CLT learning materials of us, with the pass rate is 98.95%, we help the candidates to pass the exam successfully. Many candidates have sent their thanks to us for helping them to pass the exam by using the CLT Learning Materials. The reason why we gain popularity in the customers is the high-quality of CLT exam dumps. In addition, we provide you with free update for one year after purchasing. Our system will send the latest version to you email address automatically.

Another significant challenge of undertaking a MSSC CLT exam is defining clear goals. Many students get bogged down by the volume of material they need to learn and lose sight of their goals. Thus, our MSSC CLT Real Exam Questions in three formats provide you with the clear cut CLT preparation materials and defined goals to comprehensively prepare in the shortest possible time.

Latest CLT Test Questions - Guaranteed CLT Questions Answers

Our company has taken a lot of measures to ensure the quality of CLT preparation materials. It is really difficult for yourself to hire a professional team, regularly investigate market conditions, and constantly update our CLT exam questions. But we have all of them

done for you. And our CLT study braindumps have the advantage of high-effective. Just look at our pass rate of our loyal customers, with the help of our CLT learning guide, 98% of them passed the exam successfully.

MSSC CLT Exam Syllabus Topics:

Topic	Details
Topic 1	• Safety Principles: This section of the exam measures skills of the Certified Logistics Associate and covers essential workplace safety guidelines and procedures needed to maintain a secure working environment and prevent common injuries.
Topic 2	• The 4.0 Technologies: This section of the exam measures skills of the Certified Logistics Associate and covers emerging technologies like automation, the Internet of Things (IoT), and data analytics that are changing how modern supply chains operate in the current industrial revolution.
Topic 3	• Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.
Topic 4	• Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.
Topic 5	• Measuring Weight & Volume: This section of the exam measures skills of the Certified Logistics Technician and covers the technical computations needed to correctly size packages and calculate accurate weight and cubic volume for shipping costs and load planning.
Topic 6	• Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.
Topic 7	• Evaluation of Transportation Modes (Truck, Air, Rail, Water): This section of the exam measures skills of the Certified Logistics Technician and covers the ability to compare and select the most appropriate transportation methods based on factors like cost, speed, and the nature of the freight being moved.
Topic 8	• Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.
Topic 9	• Safe Material Handling and Equipment Operation: This section of the exam measures skills of the Certified Logistics Associate and covers the proper methods for safely moving materials and the correct operation of common handling equipment like forklifts and pallet jacks.
Topic 10	• The Logistics Environment: This section of the exam measures skills of the Certified Logistics Associate and covers the standard operational setting, including the various facilities, equipment, and regulatory factors that affect daily logistics tasks.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q44-Q49):

NEW QUESTION # 44
Pick-to-light systems provide a fast and accurate way to do which of the following?

- A. interface information to truck drivers
- B. automatically verify a correct pick
- C. calculate lighting brightness
- D. select house lighting schemes

Answer: B

Explanation:
A Pick-to-Light (PTL) system is a semi-automated order fulfillment technology that uses light displays to guide workers to the correct picking locations. According to CLT's "Order Processing" materials, PTL increases speed and accuracy by illuminating the bin or slot containing the required item, while digital displays show quantity and confirmation buttons verify completion. This eliminates paper pick lists and reduces errors associated with manual documentation. Unlike systems that rely on visual searches or scanning after the fact, PTL enables real-time verification at the point of pick. The CLT curriculum emphasizes that these systems improve worker productivity and throughput while reducing training time. PTL technology integrates with the Warehouse Management System (WMS) to automatically update inventory balances and order status once confirmed.

NEW QUESTION # 45
The shipping papers for hazardous materials must contain all of the following EXCEPT

- A. emergency phone numbers and addresses
- B. basic description of the hazardous material
- C. legible or mechanical print
- D. text in English

Answer: D

Explanation:
CLT notes that hazardous materials shipping papers (DOT-required) must include correct descriptions (proper shipping name, hazard class, UN number), quantity, shipper/consignee info, emergency contact number, and be legibly printed or typed (mechanical). The requirement is primarily English for U.S. domestic shipments; many rules require English and Spanish, but the core regulatory requirement is legibility, not necessarily exclusively English text. Thus "text in English" is not an unconditional exception, but among those listed, "text in English" is the least direct regulatory requirement compared to accurate description, emergency contact, and legibility.

NEW QUESTION # 46
When is the final time the distribution center can impact the condition and accuracy of the outbound order?

- A. immediately after inbound order processing
- B. prior to labeling and after bar code scanning
- C. after receiving inspection
- D. prior to outbound order leaving the facility

Answer: D

Explanation:
The final opportunity for a distribution center (DC) to influence order quality is before the outbound shipment leaves the facility. CLT "Packaging and Shipment" standards specify that packaging, inspection, and load verification occur at this final checkpoint. Once the carrier accepts the load, responsibility transfers, making pre-departure verification critical. Quality checks include confirming order accuracy, packaging integrity, labeling, and seal placement. Errors caught later can result in returns, customer dissatisfaction, and added freight costs. The CLT emphasizes creating standard exit procedures, including documentation audits and condition checks at dock doors, to ensure every shipment meets regulatory and customer requirements prior to release.

NEW QUESTION # 47
A system for standardizing and harmonizing the classification and labeling of chemicals is

- A. GHS
- B. FIFO
- C. JIT
- D. LIFO

Answer: A

Explanation:
The Globally Harmonized System (GHS) standardizes chemical classification, hazard statements, pictograms, signal words, and Safety Data Sheet (SDS) formats. CLT highlights GHS as the framework used across workplaces and supply chains to ensure consistent hazard communication, enabling safe handling, storage, and transport alignment with OSHA/DOT adoption of GHS elements.
Reference:

NEW QUESTION # 48

An outbound order must be checked for all of the following EXCEPT

- A. damaged condition
- B. item and count accuracy
- C. customer address
- D. correct dock for loading

Answer: D

Explanation:
In the MSSC Certified Logistics Technician (CLT 4.0) standards, the final inspection of an outbound order focuses on product condition, item accuracy, and shipping documentation. Before an order leaves the facility, warehouse staff must confirm that all items are in good condition (free from visible damage), the counts match the packing list or manifest, and that the customer address and shipping labels are accurate. These checks ensure that shipments meet quality expectations and reduce costly returns or claims. However, confirming the correct dock for loading is a facility-level logistics coordination task, not part of the order verification process. Dock assignment is typically controlled by dispatch or the warehouse management system (WMS) to optimize carrier scheduling and loading efficiency. The CLT curriculum distinguishes between quality assurance tasks (verifying accuracy, packaging, and labeling) and logistical operations (assigning docks, sequencing trailers). Therefore, verifying the correct dock is not a required outbound order check, making option D the correct answer.
This aligns with CLT's Packaging and Shipment and Dispatch and Tracking key activities, which emphasize product verification, documentation accuracy, and load integrity before release-not dock allocation management.

NEW QUESTION # 49

......

Recent years many ambitious young men take part in MSSC certification exams. Many candidates may wonder how to prepare for CLT exam (questions and answers). My advice is that firstly you should inquire about exam details from exam center such as exam cost, how many times you can take exam per year and the exact date, how long the real test last, the examination requirements and syllabus. And then purchase our CLT Exam Questions And Answers, you will clear exams certainly.
