If you have any hesitate to buy our products. You can try the trial version from our company before you buy our HPE7-A08 Test Practice files. The trial version will provide you with the demo. More importantly, the demo from our company is free for all people. You will have a deep understanding of the HPE7-A08 preparation materials from our company by the free demo.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q189-Q194):

NEW QUESTION # 189

You recently enabled ARP protection on your CX switches, but many users now complain that they can no longer access the network.

What do you need to configure to resolve the issue?

- A. DHCP reservations
- B. IGMP snooping
- C. Dynamic IP lockdown
- D. DHCP snooping

Answer: D

Explanation:

After enabling ARP protection, many users lose network access because ARP protection relies on DHCP snooping to build IP-to-MAC binding tables. Without DHCP snooping enabled and correctly configured, ARP inspection cannot verify ARP packets, causing legitimate traffic to be dropped.

Enabling DHCP snooping allows ARP inspection to validate ARP requests and responses.

Other options like dynamic IP lockdown, IGMP snooping, or DHCP reservations are unrelated or secondary.

NEW QUESTION # 190

Which CLI command removes a misconfigured QoS shaping rule from an interface?

- A. no qos traffic-shape
- B. unset traffic shaper
- C. delete qos shaping
- D. clear qos policy

Answer: A

Explanation:

The no qos traffic-shape command removes bandwidth shaping restrictions, ensuring network performance is not degraded by unnecessary rate-limiting settings.

NEW QUESTION # 191

Which CLI command displays all VLANs and their assigned ports?

- A. show switchport vlan
- B. show ip interface brief
- C. show vlans
- D. show vlan config

Answer: C

Explanation:

The show vlans command lists all VLANs, their assigned interfaces, VLAN IDs, and status, helping administrators troubleshoot VLAN configurations.

NEW QUESTION # 192

Which CLI command displays the current firmware version of an Aruba CX switch?

- A. show firmware
- B. show system information
- **C. show version**
- D. show running-config

Answer: C

Explanation:

The show version command provides firmware version details, helping administrators verify if the switch is running the required software release.

NEW QUESTION # 193

Which CLI command removes an incorrect static IP address configuration from an interface?

- A. remove static ip
- **B. no ip address**
- C. delete ip configuration
- D. unset interface ip

Answer: B

Explanation:

The no ip address command removes an incorrectly assigned static IP address, ensuring the interface can be reconfigured correctly for proper network communication.

NEW QUESTION # 194

.....

The learning material is open in three excellent formats; HP HPE7-A08 dumps PDF, a desktop HP HPE7-A08 dumps practice test, and a web-based HP HPE7-A08 dumps practice test.
