Salesforce Salesforce-Slack-Administrator 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Workspace Administration: This domain assesses the competencies of Salesforce administrators in creating and managing Slack workspaces to meet organizational needs. Candidates will determine when a new workspace should be created and manage the approval process for workspace creation.

주제 2	<ul style="list-style-type: none"> • Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
주제 3	<ul style="list-style-type: none"> • Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
주제 4	<ul style="list-style-type: none"> • Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.
주제 5	<ul style="list-style-type: none"> • App Administration: This section evaluates the skills of Slack Administrators in managing applications within Slack. Candidates will summarize the value of interoperability for both decision-makers and end-users while learning to use Workflow Builder for automating tasks.
주제 6	<ul style="list-style-type: none"> • User Lifecycle Management: This area focuses on managing user accounts throughout their lifecycle in Slack. Candidates will implement authentication options based on organizational requirements and recommend processes for new account creation.

어떻게 하면 가장 편하고 수월하게 Salesforce Salesforce-Slack-Administrator 시험을 패스할 수 있을까요? 그 답은 바로 PassTIP에서 찾아볼 수 있습니다. Salesforce Salesforce-Slack-Administrator 덤프로 시험에 도전해보지 않으실래요? PassTIP는 당신을 위해 Salesforce Salesforce-Slack-Administrator 덤프로 Salesforce Salesforce-Slack-Administrator 인증시험이라는 높은 벽을 순식간에 무너뜨립니다.

최신 Salesforce Administrator Salesforce-Slack-Administrator 무료 샘플문제 (Q89-Q94):

질문 # 89

In Large Inc's Enterprise Grid design, each business unit has its own workspace, and everyone is also a member of the Global workspace. The Sales team at Large Inc are slow adopters of Slack and have been using email instead of Slack to communicate with peers.

Which of these strategies should the Sales team AVOID using to connect cross-functionally more effectively with Slack?

- A. Create an org-wide #sales-wins channel so that account representatives can share updates on new customers and celebrate big deals.
- B. Create a #customer-feedback channel for Sales to convey customer concerns to the Product and Engineering teams.
- C. Move their channels into the Global workspace and convert the default channels to private, to ease the Sales team's fears about privacy.
- D. Create an org-wide #help-sales channel where cross-functional partners can turn to Sales with Questions and requests for help.

정답: B

질문 # 90

Your company uses Slack Enterprise Grid.

An employee loses an office device that is logged into Slack.

What should an Org Admin do to mitigate risk?

- A. Ask the user to log out of the device by clicking End all sessions in their Slack settings.
- B. Deactivate the user in Slack, and reactivate them once the device is located.
- C. Notify the Workspace Owner(s) for the workspace(s) the user is a member of so they can temporarily remove the user from their workspace(s).
- **D. Sign member out of the Enterprise Grid org by selecting Sign out of Slack in the admin dashboard.**

정답: D

설명:

Slack's Enterprise Grid security recommendations state:

"Org Admins can remotely sign a member out of all sessions (desktop, mobile, web) via the admin dashboard to immediately prevent further access without deactivating the user." Asking the user (A) is unreliable because they lost the device. Deactivation (B) is extreme if the device may be recovered. Workspace-level action (D) is insufficient for org-wide risk.

-

질문 # 91

What is a way to determine if an external person outside of your organization also uses Slack?

- A. Ask your Workspace Primary Owner if they can confirm if the person uses Slack.
- B. Invite them to a Slack Connect channel first to verify whether or not they use Slack.
- **C. Search for the person's email in the "Slack Connect" section of your sidebar.**
- D. Search for the person's email in the "People" section of your sidebar.

정답: C

설명:

Slack Connect allows you to:

"Search for external users by entering their email address in the Slack Connect section of your sidebar to verify if their organization uses Slack." Inviting first (B) is less efficient. Asking your Workspace Owner (A) is manual. The "People" section (D) only searches internal directory members.

(Reference: Slack Administration Study Guide - Using Slack Connect Discovery)

-

질문 # 92

In which scenario would the Clips feature be the most useful to support asynchronous work?

(Select the best answer.)

- A. A service representative is troubleshooting a time-sensitive issue in channel with their tier support team.
- **B. A project manager is showing their work to the rest of their project team and asking for feedback before the end of the week.**
- C. A manager schedules time to thoroughly review a product release with their team.
- D. A manager is actively brainstorming with the leadership team on new department initiatives.

정답: B

설명:

Slack Clips are designed for:

"Recording and sharing video, voice, and screen recordings asynchronously to allow teams to consume and respond on their own schedule." A project manager sharing updates for review (B) is a perfect use case. Time-sensitive troubleshooting (A) and active brainstorming (D) are better suited for synchronous tools like Huddles. Scheduling reviews (C) suggests a live meeting rather than asynchronous communication.

(Reference: Slack Administration Study Guide - Using Clips for Asynchronous Collaboration)

-

질문 # 93

Your organization is in the process of determining its Slack Enterprise Grid design.

The latest draft proposal is a multi-workspace design that includes:

- * Focused workspaces for each major business function,
- * Global and Social workspaces where all organization members will be added,
- * Separate workspaces for each major external partner.

You need to evaluate the current proposal and communicate potential issues to the team leading the Enterprise Grid design and launch.

What is the most relevant issue to communicate to the team about the challenges of the current proposal?

- A. It presents challenges from both admin control and user management perspectives.
- B. It has high risk of notification and message noise compared to a single workspace design.
- C. It presents issues from a Slack Connect security perspective.
- **D. It creates challenges related to context switch and scalability in your Enterprise Grid.**

정답: D

설명:

Slack warns that:

"Having too many workspaces can create challenges with context switching, where users need to frequently switch between workspaces to find information, reducing efficiency. It also impacts scalability as the organization grows." While admin and user management complexity (C) can exist, context-switching (D) is the most relevant and critical issue in multi-workspace designs like the one proposed.
