Microsoft Azure Security Technologies Sample Questions (Q367-Q372):

NEW QUESTION # 367

You have been tasked with configuring an access review, which you plan to assigned to a new collection of reviews. You also have to make sure that the reviews can be reviewed by resource owners.

You start by creating an access review program and an access review control.

You now need to configure the Reviewers.

Which of the following should you set Reviewers to?

- A. Members (Self).
- B. Selected users.
- C. Anyone.
- D. Group Owners.

Answer: D

Explanation:

In the Reviewers section, select either one or more people to review all the users in scope. Or you can select to have the members review their own access. If the resource is a group, you can ask the group owners to review.

Graphical user interface, application Description automatically generated with medium confidence

NEW QUESTION # 370

From the Azure portal, you are configuring an Azure policy.

You plan to assign policies that use the DeployIfNotExist, AuditIfNotExist, Append, and Deny effects.

Which effect requires a managed identity for the assignment?

- A. Append
- **B. DeployIfNotExist**
- C. AuditIfNotExist
- D. Deny

Answer: B

Explanation:

Explanation

When Azure Policy runs the template in the deployIfNotExists policy definition, it does so using a managed identity.
