

# Archer-Expert Dumps Collection & Archer-Expert Test Pattern

No study materials can boost so high efficiency and passing rate like our Archer-Expert exam reference when preparing the test Archer-Expert certification. Our Archer-Expert exam practice questions provide the most reliable exam information resources and the most authorized expert verification. Our test bank includes all the possible questions and answers which may appear in the Real Archer-Expert Exam and the quintessence and summary of the exam papers in the past. You can pass the Archer-Expert exam with our Archer-Expert exam questions.

PassSureExam never hits its customers with any kind of scam instead they are offered with 100% authentic products for Archer Archer-Expert exam preparation. It is our honor to serve you with ever best offering and delivering the core values for your spent pennies. Failure is unusual with Archer-Expert training but if any misfortune leads you towards failure, no issues for financial loss. PassSureExam will repay you all the charges that you have paid for our Archer-Expert exam products.

## Archer-Expert Test Pattern | Valid Archer-Expert Vce Dumps

Through continuous development and growth of the IT industry in the past few years, Archer-Expert exam has become a milestone in the Archer exam, it can help you to become a IT professional. There are hundreds of online resources to provide the Archer Archer-Expert questions. Why do most people to choose PassSureExam? Because PassSureExam has a huge IT elite team. In order to ensure you accessibility through the Archer Archer-Expert Certification Exam, they focus on the study of Archer Archer-Expert exam. PassSureExam ensure that the first time you try to obtain certification of Archer Archer-Expert exam. PassSureExam will stand with you, with you through thick and thin.

## Archer Certified Administrator-Expert Sample Questions (Q61-Q66):

### NEW QUESTION # 61

What happens when an administrator selects to cascade private field permissions for a group?

- A. Only members of the selected group would have access to the field; members of any child groups would NOT have access to the field.
- B. Only members of the selected group and its child groups would have access to the field.
- C. Members of the selected group and members of its child groups would have access to the field.
- D. Members of the selected group would NOT have access to the field; members of child groups would have access to the field.

**Answer: C**

**Explanation:**

In Archer, Private Fields are a high-security feature where access is restricted to specific Users or Groups, regardless of their Access Role permissions. When an administrator manages these permissions, the concept of Cascading is vital for hierarchy management.

As taught in Archer Administration II , if you grant a parent group access to a private field and select the "Cascade" option, Archer automatically extends those permissions to every child group within that hierarchy. This follows the standard inheritance model used throughout the platform's security architecture. Without cascading (Option C), only the direct members of the parent group would see the field data, and administrators would have to manually add every subgroup individually. Selecting cascade ensures that as the organization grows and new subgroups are added under the parent, those new members will automatically inherit the necessary access to view or edit the protected field.

#### NEW QUESTION # 62

Advanced Workflow Actions by E-Mail will allow users to do which of the following?

- A. Add a workflow comment then use action buttons in the email body to move a record through a workflow.
- B. Complete simple drop-down menus for data entry before selecting the workflow action to move a record to the next stage of a workflow.
- C. Complete simple actions using buttons in the email body to move a record through a workflow.
- **D. Complete simple actions using buttons in the email body to move a record through a workflow and append the text typed in the email body to the Workflow Action History field.**

**Answer: D**

Explanation:

Actions by E-mail (ABE) is a feature designed to allow executives and busy stakeholders to progress a workflow without logging into the Archer UI. According to the Advanced Workflow Beyond the Basics course, ABE notifications include specific "action buttons" (e.g., Approve, Reject, Needs More Info).

When a user clicks a button, a new email is generated with a unique encoded string. If the user types a message in that reply email, the Archer Mail Processing Service parses the response. It not only moves the record to the next node based on the button clicked but also captures any text the user typed and appends it to the Workflow Action History (or a designated "Comments") field. This ensures that the rationale for the decision is audited within the record. Option A is incomplete because it ignores the comment-capturing capability, and Option C is incorrect because ABE does not support complex UI elements like drop-down menus within the email client.

#### NEW QUESTION # 63

In multi-host Archer installation, same Archer configuration certificate should be used in:

- A. Web and SQL servers
- **B. Web and Services servers**
- C. Web, SQL, Services servers
- D. Web and DC servers

**Answer: B**

Explanation:

In a distributed Archer environment, the Archer Configuration Certificate is used to encrypt and secure communication between the Archer Control Panel (ACP) and the various server nodes. As taught in Archer Administration II , this certificate ensures that only authorized servers can join the instance and access the encrypted configuration files (like settings.config).

The certificate must be installed on all Web and Services servers. The Web server requires it to process user requests and communicate with the ACP, while the Services server (which handles the Job Engine, Indexing, and Workflow) requires it to decrypt the task instructions it receives. The SQL Server (Option B and C) does not require the Archer Configuration Certificate because it interacts with Archer via standard SQL authentication or Windows Authentication protocols at the database layer; it does not run the Archer Configuration Service. "DC servers" (Domain Controllers) are also outside the scope of this certificate requirement.

#### NEW QUESTION # 64

What feature in the Administration Menu allows you to troubleshoot users' record permissions?

- A. Admin Notifications
- B. Access Control Reports
- **C. Investigate Access**

- D. Manage Users

**Answer: C**

Explanation:

In the Archer security model, record-level access is determined by the complex intersection of Access Roles , Groups , and Record Permission Fields . According to the Archer Administration II curriculum, the Investigate Access tool is the primary diagnostic utility for troubleshooting "Why can't User X see Record Y?" Unlike standard reports, Investigate Access allows an administrator to select a specific user and a specific record (or application) and run a simulation. The tool then provides a detailed breakdown of the "Final Access" (Read, Update, Delete) and, crucially, explains how that access was derived. It will highlight if the user is being granted access via a specific Group, if a Record Permission field is restricting them, or if their Access Role lacks the necessary rights. This is more efficient than the Access Control Reports (Option C), which provide a broad overview of permissions but do not provide the record-specific context that "Investigate Access" offers for pinpoint troubleshooting.

#### NEW QUESTION # 65

Which would be an accurate function(s) description for Archer LDAP Synchronization?

- A. None of these answers are correct
- **B. Updates user profile data and deactivates accounts based on LDAP changes**
- C. Only creates accounts for new users found on the LDAP server
- D. Only associates Archer users/groups with domain users/groups

**Answer: B**

Explanation:

This question reinforces a critical security concept in Archer Administration II . LDAP Synchronization is not just a "one-time" user creation tool; it is a lifecycle management service. While it does create accounts and associate groups, its most vital ongoing function is the synchronization of state .

If a user's title changes in Active Directory, the next LDAP sync will update that title in Archer, ensuring that reports and workflows based on user attributes remain accurate. Furthermore, if a user is removed from the corporate directory, the LDAP sync identifies them as a "Missing Person" based on the administrator's configuration and can automatically deactivate the Archer account. This automated deactivation is a core compliance requirement for most organizations to ensure that terminated employees lose access to sensitive GRC data immediately. Options A and C are incorrect because they use the word "Only," which ignores the broader, dynamic maintenance capabilities of the service.

#### NEW QUESTION # 66

.....

The free demo Archer-Expert practice question is available for instant download. Download the Archer Archer-Expert exam dumps demo free of cost and explores the top features of Archer Archer-Expert Exam Questions and if you feel that the Archer Certified Administrator-Expert exam questions can be helpful in Archer-Expert exam preparation then take your buying decision.

**Archer-Expert Test Pattern:** <https://www.passsureexam.com/Archer-Expert-pass4sure-exam-dumps.html>

A good Archer-Expert valid exam prep will make you half the work with doubt the results, Actually, the people who are qualified with Archer-Expert exam certification are more welcome in the job hunting, You just have to study with valid and accurate Archer Archer-Expert practice material that is according to sections of the present Archer Archer-Expert exam content, In addition to the free download of sample questions, we are also confident that candidates who use Archer-Expert study materials will pass the exam at one go.

Or you could push your new image to the Docker Hub or to a private registry, Using an External Audio Interface, A good Archer-Expert valid exam prep will make you half the work with doubt the results.
