C_BCFIN_2502시험패스 인증덤프문제 - C_BCFIN_2502인기자격증 시험덤프공부

Itexamdump에서는 시장에서 가장 최신버전이자 적응율이 가장 높은 SAP인증 C_BCFIN_2502덤프를 제공해드립니다. SAP인증 C_BCFIN_2502덤프는 IT업종에 몇십년간 종사한 IT전문가가 실제 시험문제를 연구하여 제작한 고품질 공부자료로서 시험패스율이 장난 아닙니다. 덤프를 구매하여 시험에서 불합격성적표를 받으시면 덤프비용 전액을 환불해드립니다.

최신 SAP Certified Associate C_BCFIN_2502 무료샘플문제 (Q12-Q17):

질문 # 12

Which key area of Financial Management uses both financial and non-financial data to model effective business scenarios that facilitate steering?

- A. Governance, Risk, & Compliance
- B. Quote-to-Cash
- C. Financial Planning & Analysis
- D. Accounting & Financial Close

정답: C

설명:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Financial Planning & Analysis (FP&A) is the strategic engine of the finance department, responsible for translating corporate strategy into actionable financial targets. A defining characteristic of modern FP&A within the SAP ecosystem—specifically powered by SAP Analytics Cloud—is the ability to integrate both financial data (e.g., revenue, expenses, margins) and non-financial data (e.g., headcount, carbon emissions, units produced, customer satisfaction scores).

By combining these data sets, finance leaders can perform "Extended Planning and Analysis" (xP&A). This allows the CFO to model complex business scenarios that facilitate more accurate "steering" of the enterprise.

For instance, an FP&A professional can model how an increase in raw material costs (financial) combined with a shift in carbon tax regulations (non-financial/regulatory) will impact the overall profitability of a specific product line over the next five years. This holistic view ensures that planning is not done in a vacuum but is grounded in the operational realities of the business. By facilitating real-time "what-if" analysis, FP&A provides the agility needed to adjust course quickly in response to internal performance trends or external market shifts, ensuring the organization remains on track to meet its long-term objectives.

질문 # 13

What are examples of internal barriers to achieving the goals of the finance department?

Note: There are 3 correct answers to this question.

- A. Data silos and poor data quality
- B. Multiple legacy systems
- C. High cost of capital
- D. Manual, error-prone processes
- E. Constant regulatory shifts

정답: A,B,D

설명:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

To position SAP Financial Management Solutions effectively, one must understand the internal friction points that prevent a finance department from becoming a strategic partner to the business. Internal barriers are factors within the organization's control that impede efficiency. The most prevalent barriers include manual, error-prone processes, which consume valuable time and increase the risk of financial misstatement. When employees spend the majority of their time on data entry and spreadsheet manipulation, they cannot focus on value-added analysis.

Furthermore, data silos and poor data quality act as major roadblocks. When financial data is trapped in departmental silos, getting a holistic view of the company's performance is impossible, leading to "multiple versions of the truth." This is often exacerbated by the existence of multiple legacy systems that do not communicate with each other. These legacy systems require expensive maintenance and complex reconciliations. While "High cost of capital" (Option A) and "Constant regulatory shifts" (Option D) are certainly challenges for a CFO, they are considered external market or regulatory forces. SAP's value proposition is centered on removing these internal technical and process-oriented barriers by providing a unified, automated, and modern digital platform.

질문 # 14

Which SAP function within International Trade Management is designed to optimize costs by efficiently handling import and duties?

- A. Compliance Business Partner Management
- B. Customs Management
- C. Trade Preference Management
- D. Sanctioned Party Screening

정답: B

설명:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Within the SAP Global Trade Services (GTS) framework, Customs Management is the specific functional area dedicated to the technical and financial aspects of moving goods across borders. While compliance-focused modules ensure you are "allowed" to trade, Customs Management focuses on the "how" and the "cost." It automates the calculation of duties and taxes based on the Harmonized System (HS) codes and the value of the goods, ensuring that companies pay the correct amount—and not more.

By leveraging Customs Management, organizations can participate in special customs procedures such as bonded warehousing or foreign trade zones (FTZ), which allow for the deferral or reduction of duty payments.

It facilitates direct electronic communication with customs authorities, speeding up the clearance process and reducing the risk of costly storage fees at ports. For the CFO, this represents a significant opportunity for cost optimization and cash flow management. By automating the filing of entry summaries and import declarations, SAP ensures that the organization maintains a high level of accuracy in its financial records related to landed costs, directly impacting the gross margin and overall profitability of international operations.

질문 # 15

Which SAP Finance technology ensures all finance data is available from a Single source?

- A. Document Splitting
- **B. Universal Journal**
- C. Extension Ledger
- D. Actual Costing

정답: B

설명:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The cornerstone of SAP S/4HANA Finance is the Universal Journal (table ACDOCA). Traditionally, financial systems relied on separate tables for General Ledger (GL), Controlling (CO), Asset Accounting (AA), and Material Ledger (ML). This fragmentation led to data silos, necessitated complex reconciliations at period end, and often resulted in "multiple versions of the truth." The Universal Journal revolutionizes this by combining all these components into a single line-item table.

By providing a Single Source of Truth, the Universal Journal ensures that financial and managerial accounting are inherently reconciled. Every transaction captured in the system updates one table with all relevant dimensions-including market segments, cost centers, and functional areas. This eliminates the need for reconciliation between FI and CO and provides immediate, real-time access to granular data. For the CFO, this means faster financial closes and the ability to drill down from high-level financial statements directly to the underlying operational detail without leaving the report. This architecture is the "digital core" that enables all other advanced SAP Financial Management capabilities, such as real-time analytics and predictive forecasting.

질문 # 16

What are some insights that finance provides in SAP Business Suite?

- **A. Cost management**
- **B. Employee performance evaluation**
- C. Technology ROI
- **D. Supply chain optimization**

정답: A,B,D

질문 # 17
