Our MuleSoft MCD-Level-1 training materials are compiled by professional experts. All the necessary points have been mentioned in our MuleSoft Certified Developer - Level 1 (Mule 4) MCD-Level-1 practice engine particularly. About some tough questions or important points, they left notes under them. Besides, our experts will concern about changes happened in MuleSoft Certified Developer - Level 1 (Mule 4) MCD-Level-1 study prep all the time.

MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q177-Q182):

NEW QUESTION # 177

Refer to the exhibits.

The mule application is debugged in Anypoint Studio and stops at the breakpoint as shown in below exhibit. What is the value of the payload displayed in the debugger at this breakpoint?

- **A. Start**
- B. Process
- C. Payload is always empty at the breakpoint
- D. Finished

Answer: A

Explanation:

Setting Breakpoints

To set breakpoints, right-click a building block, then select Toggle Breakpoint.

Studio applies a red dot to the building block's icon on the canvas.

When you run your application in Debug mode, Studio stops the flow execution at the breakpoint you have set, allowing you to check the Mule Event content in the Mule Debugger View.

NEW QUESTION # 178

What MuleSoft API-led connectivity layer is intended to expose part of a backend database without business logic?

- **A. System layer**
- B. Experience layer
- C. Process layer
- D. Data layer

Answer: A

Explanation:

Correct answer is System layer

System APIs provide a means for insulating the data consumers from the complexity or changes to the underlying backend systems. MuleSoft recommends three-layered approach to API-led connectivity, highlighting the three layers:

* System APIs

* Process APIs

* Experience APIs

System APIs are the core systems of record underlying core systems of record (e.g. ERPs, key customer and billing systems, databases, etc.). Process APIs allow you to define a common process which the organization can share, and these APIs perform specific functions, provide access to non-central data, and may be built by either Central IT or Line of Business IT. And finally, the Experience APIs are the means by which data can be reconfigured so that it is most easily consumed by its intended audience, all from a common data source.

The three-layered structure allows for a seamless flow of data from systems of record to new experiences, and allows for reusability of assets rather than point to point connections. This approach provides a distributed and tailored approach to architecture, greater

flexibility through loose coupling, and deeper operational visibility into what is being built.

NEW QUESTION # 179

Refer to the exhibits.

The input array of strings is processed by the batch job that processes, filters, and aggregates the values. What is the last message logged by the Logger component after the batch job completes processing?

- A. ["D", "E"]
- B. ["A", "C", "D"], ["E"]
- C. ["E"]
- D. ["A", "C", "D", "E"]

Answer: B

NEW QUESTION # 180

Refer to the exhibits. A web client sends a POST request to the HTTP Listener and the Validation component in the Try scope throws an error.

What response message is returned to the web client?

- A. "ERROR1"
- B. "ERROR2"
- C. "ERROR2"
- D. "ERROR1"
- E. "END"
- F. "END"
- G. Validation Error
- H. Validation Error

Answer: B

NEW QUESTION # 181

Refer to the exhibits.

What payload and quantity are toggled at the end of the main flow?

- A. [[1,2,3,4], 14]
- B. [order1order2order3order4, 14]
- C. [[order1, order2, order3, order4], 14]
- D. [[1,2,3,4], 10]

Answer: A

NEW QUESTION # 182

.....
