

Valid CCDAK Study Guide - CCDAK Practice Exams

P.S. Free 2026 Confluent CCDAK dumps are available on Google Drive shared by Exam4PDF: <https://drive.google.com/open?id=1dah84i2x-O9mEBhvKrfNr73TYxEXQmk->

In this circumstance, if you are the person who is willing to get CCDAK exam prep, our products would be the perfect choice for you. Here are some advantages of our CCDAK exam prep, our study materials guarantee the high-efficient preparing time for you to make progress is mainly attributed to our marvelous organization of the content and layout which can make our customers well-focused and targeted during the learning process. As a result, our CCDAK Study Materials raise in response to the proper time and conditions while an increasing number of people are desperate to achieve success and become the elite.

The Exam4PDF is one of the top-rated and renowned platforms that have been offering real and valid Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) practice test questions for many years. During this long time period countless Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam candidates have passed their dream Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) certification exam and they are now certified Confluent professionals and pursuing a rewarding career in the market.

Valid CCDAK Study Guide Exam Pass Once Try | Confluent CCDAK Practice Exams

Developing your niche is very easy in the presence of the CCDAK dumps. The credentials are not very difficult to achieve because like CCDAK the acclaimed vendors are highly successful in the industry. If you need a boost in your career, then Exam4PDF is the site you have to opt for taking CCDAK Certification exams. Some of the vital features of the CCDAK dumps of Exam4PDF are given below. CCDAK dumps are the most verified and authentic braindumps that are used to pass the CCDAK certification exam. The whole CCDAK study material is approved by the expert.

Confluent CCDAK (Confluent Certified Developer for Apache Kafka Certification Examination) Certification Exam is a valuable certification for developers who work with Kafka. CCDAK exam tests the skills and knowledge of developers in various aspects of Kafka, and passing it demonstrates proficiency in working with Kafka. Candidates can prepare for the exam by gaining theoretical knowledge and practical experience, and there are many resources available to help them do so.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q54-Q59):

NEW QUESTION # 54

(You have a Kafka Connect cluster with multiple connectors deployed. One connector is not working as expected. You need to find logs related to that specific connector to investigate the issue. How can you find the connector's logs?)

- A. Modify the log4j.properties file to add a dedicated log appender for the connector.
- B. Modify the log4j.properties file to enable connector context.
- C. Make no change; there is no way to isolate connector logs.
- D. Change the log level to DEBUG to include connector context information.

Answer: A

Explanation:

The official Apache Kafka Connect documentation explains that connectors run within the same worker JVM, and all logs are written through the worker's logging framework (Log4j or Log4j2). To isolate logs for a specific connector, Kafka Connect supports connector-specific logging contexts, which can be routed to separate log files using logging configuration.

By modifying the log4j.properties (or log4j2.xml) file to define a dedicated logger and appender for the connector's package or class name, you can direct logs from that connector to a separate file. This is the recommended and documented approach for debugging individual connectors in a shared Connect cluster.

Option A is incorrect because there is no generic "enable connector context" switch. Option B may increase verbosity but does not isolate logs per connector. Option D is false; Kafka Connect explicitly supports connector-level log separation through logging configuration.

Therefore, the correct approach is to configure a dedicated log appender for the specific connector.

NEW QUESTION # 55

You are using JDBC source connector to copy data from 3 tables to three Kafka topics. There is one connector created with max.tasks equal to 2 deployed on a cluster of 3 workers. How many tasks are launched?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

here, we have three tables, but the max.tasks is 2, so that's the maximum number of tasks that will be created

NEW QUESTION # 56

(You are developing a Kafka Streams application with a complex topology that has multiple sources, processors, sinks, and sub-topologies.

You are working in a development environment and do not have access to a real Kafka cluster or topics.

You need to perform unit testing on your Kafka Streams application.

Which should you use?)

- A. TopologyTestDriver
- B. TestProducer, TestConsumer
- C. KafkaUnitTestDriver
- D. MockProducer, MockConsumer

Answer: A

Explanation:

The official Apache Kafka Streams developer documentation clearly states that TopologyTestDriver is the recommended and supported tool for unit testing Kafka Streams applications without requiring a running Kafka cluster. It is specifically designed to test complex topologies consisting of multiple sources, processors, state stores, sinks, and even sub-topologies.

TopologyTestDriver allows developers to instantiate the Kafka Streams topology directly in memory and feed test records into input topics while reading results from output topics. This makes it ideal for fast, deterministic, and isolated unit tests. As documented, it supports testing stateful and stateless operations, windowed aggregations, joins, and exactly-once behavior at the topology level.

Option A is incorrect because TestProducer and TestConsumer are not official Kafka Streams testing utilities.

Option B is invalid because KafkaUnitTestDriver does not exist in Apache Kafka. Option D (MockProducer and MockConsumer) belongs to the Kafka Clients API and is suitable for producer/consumer testing, but it does not support Kafka Streams topologies or state stores.

Therefore, TopologyTestDriver is the only fully supported and officially documented solution for unit testing Kafka Streams

applications without a real Kafka cluster.

NEW QUESTION # 57

How will you set the retention for the topic named my-topic to 1 hour?

- A. Set the broker config log.retention.ms to 3600000
- B. Set the consumer config retention.ms to 3600000
- C. Set the topic config retention.ms to 3600000
- D. Set the producer config retention.ms to 3600000

Answer: C

Explanation:

retention.ms can be configured at topic level while creating topic or by altering topic. It shouldn't be set at the broker level (log.retention.ms) as this would impact all the topics in the cluster, not just the one we are interested in

NEW QUESTION # 58

A bank uses a Kafka cluster for credit card payments. What should be the value of the property unclean.leader.election.enable?

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Setting unclean.leader.election.enable to true means we allow out-of-sync replicas to become leaders, we will lose messages when this occurs, effectively losing credit card payments and making our customers very angry.

NEW QUESTION # 59

.....

Considering all customers' sincere requirements, CCDAK test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products. Numerous advantages of CCDAK training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing. From the customers' point of view, our CCDAK Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal CCDAK practice test.
