IAM-Certificate試験問題はグローバルなものであるとIAM誇らしく言えます。したがって、どんな種類のIAM-Certificateテストトレントを求めても、当社のアフターサービスサービススタッフは、最も専門的な方法でIAM-Certificate練習問題の問題を解決するお手伝いをします。IAM-CertificateのThe Institute of Asset Management Certificate学習ツールを目指しているお客様は世界中のさまざまな国から来ており、間違いなく時間差があるため、IAM-Certificateトレーニングガイドで1日24時間、7日間、思いやりのあるFast2testオンラインアフターサービスを提供します 週に数日、いつでもどこでも気軽にご連絡ください。

IAM The Institute of Asset Management Certificate 認定 IAM-Certificate 試験問題 (Q24-Q29):

質問 # 24

What are the main cost elements of a whole-life cost approach?

- A. Installation, failure and refurbishment costs
- B. maintenance, associated financing costs refurbishment, and disposal costs
- C. Asset deterioration and reliability costs
- **D. Installation, maintenance and operations, and disposal costs**

正解: D

質問 # 25

Which of the following would you consider to be a strategic asset management requirement?

- A. The cost of consultants to support the creation of strategies
- B. The number of capital projects
- **C. The implications of current and forecast asset condition**
- D. The location of capital projects
- E. The cost of tools and equipment to deliver the maintenance regime

正解: C

解説:

The correct answer is D . Strategic asset management requirements are concerned with the factors that shape long-term asset strategy, investment needs, risk exposure, and future performance. The IAM Strategic Planning guidance states that strategic planning includes determining how to address outputs from demand analysis and the processes for determining enhancement, long-term renewal, and maintenance work volumes , together with the associated risks and costs needed to meet asset management objectives. Current and forecast asset condition is directly relevant to those decisions.

The other options are narrower delivery or reporting items, not strategic requirements in themselves.

Consultant costs, tool costs, project counts, and project locations may matter operationally, but they do not best describe a strategic asset management requirement . The implication of present and future asset condition does.

質問 # 26

Which of the following statements is true !

- A. Strategic planning is usually undertaken as part of the overall organisational management
- B. Strategic planning is describes how the organisation will develop and improve its asset management capabilities
- **C. Strategic planning is the process for establishing asset management objectives and developing the asset management**

strategy

- D. Strategic planning explicitly considers the life cycle of the assets and the interdependencies between each of the life cycle stages

正解: C

質問 # 27

The term optimizing describes:

- A. The process of establishing the best value compromise between a set of competing factors, in order to support asset management decision-making
- B. The process of review the best value compromise between a set of competing factors, in order to support asset management decision-making
- C. The process of Maintenance the best value compromise between a set of competing factors, in order to support asset management decision-making
- D. The process of control the best value compromise between a set of competing factors, in order to support asset management decision-making

正解: A

解説:

Optimizing is a core concept in asset management. It refers to establishing a compromise between performance, cost, and risk-across the asset lifecycle. This balancing act is based on data-informed decision-making and scenario analysis.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 4.5 - Decision-Making:

"Optimization is the process of determining the best value compromise between conflicting priorities such as cost, risk, and performance."

質問 # 28

Which of the following types of information would NOT normally be required for the development of an asset management plan?

- A. Organisation's share price
- B. Asset Condition
- C. Asset Criticality
- D. Asset Register

正解: A

解説:

The asset management plan (AMP) focuses on technical and operational data. Financial market information like the organization's share price is not relevant to lifecycle planning or maintenance strategies.

Exact Extract from ISO 55002:2018, Annex A - AMP Inputs:

"Typical inputs to the asset management plan include asset condition, criticality, performance, risk, cost, and lifecycle activities."

質問 # 29
