## Study guide

*National Registry of Emergency Medical Technicians*

**Online Platform**  
**3000+ Test Questions**  
**Downloadable Audiobook**

Comprehensive coverage of financial markets, 3000+ official exam questions, extensive practice examples, and free access to interactive online learning on NREMT. The ultimate resource for mastering the NREMT exam, expertly blending investment knowledge with practical preparation.

After undergoing a drastic change over these years, our EMT actual exam have been doing perfect job in coping with the exam. Up to now our EMT practice materials account for 60 percent of market share in this line for their efficiency and accuracy when dealing with the exam. With the best reputation in the market our EMT Training Materials can help you ward off all unnecessary and useless materials and spend all your limited time on practicing most helpful questions.

## There is the guide to get ready for the Test Prep EMT Exam

if you have a limited time, we are now sure that you can take the exams very easily and in a few hours. Our exam dumps and pdf study materials are valid, best, simple and easy to understand. By using our vendor **Test Prep EMT exam dumps**, you will pass your exams with good grades. To get the certification it is a bit hard work but You don't need to take any worry about it because these Practice exams had been written by our expert team. Which able you to pass your Test Prep EMT Exam easily. And individuals and professionals passed their Test Prep EMT Exams by using our exam dumps.

There are vendors on the market that claim to offer real exam questions, tips, practice exams, study guides, and many other names, but most of them are resellers who don't refresh their stuff regularly. We get the problem of individuals' faces when they spend their time studying outdated content. This is the reason why we update our practice test and exam dumps regularly as experienced in the Real Test. The exam dumps provided by the ActualTorrent are authentic, up-to-date and verified by certified specialists. We maintain a valid question bank that is updated by checking the update daily.

We offer an excellent study guide and excellent solutions for all professionals who wish to pass the certification exams in the first attempt. By taking the practice material designed by our specialists, and after it you'll be able to pass your exams in the first attempt.

We offer a 100% guarantee of success and we are sure you will succeed.

ActualTorrent gives everything you require to pass the certification exam. If you are looking for certification and are not successful, it is time for you to try what we offer.

Obviously, at certificate-questions.com, we give certification practice exams and exam dumps, as we think that practice exams are the most important thing an expert can do when preparing for a certification exam (in the IT certification area or otherwise).

When you start preparing for the certification exam, there are some basic but powerful methods that allow you to identify everything in your preparation. Many experts prepare the certification from books, so they are dissatisfied if unfortunately, they fail in the exam. The fact is that understanding the root of the information is only a tiny part of the preparation that most individuals have to pass the certification exams.

No one likes failure, mostly in such complex fields where certification requires a lot of research, planning and attention. A single attempt is so tough that it could even break the nerves of the students. Our exam dumps are so valid and best which will able you to pass your NREMT 77-420 without any pain.

Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study models to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams.

## **There are some steps to apply for Test Prep EMT Exam**

Step 1: Visit to EMT Exam Registration  
Step 2: Signup/Login to NREMT account  
Step 3: Search for EMT Certifications Exam  
Step 4: Select Date and Center of examination and confirm with payment value of \$80

## **The advent of NREMT certification EMT exam practice questions and answers**

If you don't prepare with real NREMT EMT questions, you fail, lose time and money. ActualTorrent product is specially designed to help you pass the exam on the first try. The study material is easy to use. You can choose from 3 different formats available according to your needs. The 3 formats are NREMT EMT desktop practice test software, browser based practice exam, and PDF.

## **Following is the Test Prep EMT Exam Format**

Format: Multiple choices, multiple answers

- Language: English
- Length of Examination: 120 minutes
- Passing score: 70%
- Number of Questions: 70-120

## **NREMT Emergency Medical Technicians Exam Sample Questions (Q43-Q48):**

### **NEW QUESTION # 43**

When assessing an unresponsive diabetic patient, a finding that is most helpful to differentiate between hyperglycemia and hypoglycemia is

- A. Skin color
- B. Rate and depth of breathing
- C. Pupillary response
- D. Rate and quality of the pulse

### **Answer: A**

Explanation:

In an unresponsive diabetic patient, EMTs must rapidly determine whether the cause is hypoglycemia (low blood glucose) or

hyperglycemia (high blood glucose) because immediate management priorities differ.

According to NREMT education, skin signs are the most reliable and quickly observable indicator when a blood glucose reading is not immediately available.

Hypoglycemia typically presents with cool, pale, and diaphoretic skin due to a sympathetic nervous system response. In contrast, hyperglycemia often presents with warm, dry skin, reflecting dehydration and lack of insulin-mediated glucose uptake.

Option D is correct because skin color and condition provide the most useful differentiation in the field.

Option A may help identify diabetic ketoacidosis (Kussmaul respirations) but is not the most consistent finding.

Option B is unreliable and nonspecific.

Option C may vary but does not clearly distinguish between the two conditions.

NREMT emphasizes treating unresponsive diabetics as hypoglycemic until proven otherwise, while using skin findings to guide clinical suspicion.

#### NEW QUESTION # 44

A 9-year-old patient who was injured in an MCI is brought to the treatment area with a delayed triage tag. Which of the following signs or symptoms would the EMT expect to find? Select the three correct options.

- A. Follows simple commands
- B. Breathing only after opening the airway
- C. Mottled skin
- D. Ability to ambulate
- E. Palpable pulses being present
- F. Respiratory rate of 16

**Answer: A,D,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In pediatric START orJumpSTARTtriage, a "delayed" status is appropriate if the child is breathing adequately, has palpable pulses, and follows commands. The respiratory rate of 16 is normal for a 9-year-old, and being able to walk also supports the "delayed" tag.

"Mottled skin" and "breathing only after airway opening" would more likely lead to "immediate" or even "expectant" categories depending on associated symptoms.

#### NEW QUESTION # 45

A 74-year-old patient has epigastric pain without relief from three doses of prescribed nitroglycerin. The patient is anxious, nauseated, and diaphoretic. The vital signs are BP 180/90 mmHg, P 62/min, R 20/min and shallow, and SpO# 92% on room air. What actions should the EMT prioritize for this patient? Select the two answer options that are correct.

- A. Administer additional nitroglycerin.
- B. Apply oxygen.
- C. Give aspirin.
- D. Acquire and transmit a 12-lead ECG.
- E. Place in a position of comfort.

**Answer: B,C**

Explanation:

This patient's presentation is highly suspicious for acute coronary syndrome (ACS). NREMT education emphasizes that epigastric pain, especially in elderly patients, may represent myocardial ischemia. The lack of relief after three doses of nitroglycerin further increases concern for an evolving myocardial infarction.

Option A (Give aspirin) is correct because aspirin inhibits platelet aggregation and is a cornerstone of early ACS management.

NREMT guidelines recommend administering aspirin as soon as possible unless contraindications exist.

Option B (Apply oxygen) is correct because the patient's oxygen saturation is 92%, which is below normal.

NREMT recommends supplemental oxygen for patients with suspected cardiac ischemia who are hypoxic or in respiratory distress.

Option C may provide comfort but does not address the underlying ischemia.

Option D is incorrect because the patient has already taken the maximum recommended prehospital doses of nitroglycerin.

Option E is outside the EMT scope of practice in many systems and is not a priority EMT intervention.

NREMT emphasizes early aspirin administration, oxygenation, continuous monitoring, and rapid transport for suspected ACS.

#### NEW QUESTION # 46

A 78-year-old female tripped and fell while walking. Her left leg is rotated externally and shorter than her right leg. You should suspect

- A. Pelvic fracture
- B. Posterior hip dislocation
- **C. Proximal femur fracture**
- D. Colles' fracture

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

An externally rotated, shortened leg is a classic sign of proximal femur fracture, specifically a femoral neck or intertrochanteric fracture, commonly seen in elderly fall patients. This presentation reflects muscle pull and fracture displacement.

\* Posterior hip dislocations cause internal rotation.

\* Pelvic fractures may cause instability but not specific leg rotation/shortening.

\* Colles' fracture is a distal radius (wrist) injury, unrelated to leg trauma.

#### NEW QUESTION # 47

The crew is requested to respond by law enforcement to a riot scene in a large downtown area. Upon arrival, the EMT notices the police are in full riot gear, with multiple persons lying on the ground under arrest. There is a strong odor of chemicals in the air. What actions should the EMT prioritize during the scene survey?

Select the two answer options that are correct.

- **A. Determine the control agent being used.**
- B. Have the police remove the patients' restraints.
- C. Remove the patients' clothing prior to triaging.
- D. Flush the patients' eyes with water or saline.
- **E. Identify the number of patients.**

**Answer: A,E**

Explanation:

Comprehensive and Detailed Explanation (Based on NREMT standards):

This scenario strongly suggests a hazardous environment involving chemical crowd-control agents such as tear gas or pepper spray.

During the scene survey, NREMT prioritizes scene safety, hazard recognition, and incident size-up before any patient contact.

Option D (Determine the control agent being used) is correct because identifying the chemical agent helps determine the level of risk, appropriate personal protective equipment, and whether EMS can safely operate in the area.

Option E (Identify the number of patients) is correct because determining the number of patients is essential for assessing the scope of the incident and requesting additional resources if needed.

Option A is incorrect because removing restraints is not part of the initial scene survey and must be coordinated with law enforcement.

Option B is incorrect because patient decontamination occurs only after scene safety is ensured.

Option C is not a priority until hazards are identified and the scene is safe.

NREMT teaches that EMTs must never compromise their own safety and must fully assess hazards before providing care.
