## Salesforce-Data-Cloud Real Exam Questions, Latest Salesforce-Data-Cloud Practice Materials

Most of the brands that offer Salesforce Salesforce-Data-Cloud study material provide it at high rates. However, ActualTestsIT

saves your money by offering Salesforce Salesforce-Data-Cloud Real Questions at an affordable price. In addition, we offer up to 12 months of free Salesforce-Data-Cloud exam questions.

## Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q120-Q125):

### NEW QUESTION # 120

Which consideration related to the way Data Cloud ingests CRM data is true?

- A. The CRM Connector's synchronization times can be customized to up to 15-minute intervals.
- B. Formula fields are refreshed at regular sync intervals and are updated at the next full refresh.
- C. CRM data cannot be manually refreshed and must wait for the next scheduled synchronization.
- **D. The CRM Connector allows standard fields to stream into Data Cloud in real time.**

**Answer: D**

Explanation:

The correct answer is D. The CRM Connector allows standard fields to stream into Data Cloud in real time.

This means that any changes to the standard fields in the CRM data source are reflected in Data Cloud almost instantly, without waiting for the next scheduled synchronization. This feature enables Data Cloud to have the most up-to-date and accurate CRM data for segmentation and activation<sup>1</sup>.

The other options are incorrect for the following reasons:

A). CRM data can be manually refreshed at any time by clicking the Refresh button on the data stream detail page<sup>2</sup>. This option is false.

B). The CRM Connector's synchronization times can be customized to up to 60-minute intervals, not 15- minute intervals<sup>3</sup>. This option is false.

C). Formula fields are not refreshed at regular sync intervals, but only at the next full refresh<sup>4</sup>. A full refresh is a complete data ingestion process that occurs once every 24 hours or when manually triggered. This option is false.

1: Connect and Ingest Data in Data Cloud article on Salesforce Help

2: Data Sources in Data Cloud unit on Trailhead

3: Data Cloud for Admins module on Trailhead

4: [Formula Fields in Data Cloud] unit on Trailhead

[Data Streams in Data Cloud] unit on Trailhead

### NEW QUESTION # 121

During discovery, which feature should a consultant highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile?

- A. Data Cleansing
- B. Data Consolidation
- C. Harmonization
- **D. Identity Resolution**

**Answer: D**

Explanation:

The feature that the consultant should highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile is D. Identity Resolution. Identity Resolution is the process of identifying, matching, and reconciling data about individuals across different data sources and creating a unified profile that represents a single view of the customer. Identity Resolution uses various methods and rules to determine the best match and reconciliation of data, such as deterministic matching, probabilistic matching, reconciliation rules, and identity graphs. Identity Resolution enables the customer to have a complete and accurate understanding of their customers and their interactions across different channels and touchpoints.

### NEW QUESTION # 122

When can the data types be changed during ingestion?

- A. After the DSO is created

- B. Data type can be changed at any time
- **C. Before DSO is created**
- D. Data type can never be changed

**Answer: C**

Explanation:

The data types can be changed during ingestion before the Data Source Object (DSO) is created. A DSO is a container for ingested data that defines the schema, format, and metadata of the data. Data types can be changed in the Data Explorer before creating a DSO by using the Edit Schema option. Once a DSO is created, the data types cannot be changed. References: Create a Data Source Object

### NEW QUESTION # 123

To which Data Model entity should the Email field from a CRM Contact object be mapped?

- A. Individual
- B. Account Contact
- C. Lead
- **D. Contact Point Email**

**Answer: D**

Explanation:

The Email field from a CRM Contact object should be mapped to the Contact Point Email entity in the Customer 360 data model. This entity represents an email address that is associated with an individual or an account contact. Reference: [Contact Point Email Entity]

### NEW QUESTION # 124

What happens if no file name is specified in AWS S3 data stream during ingestion?

- A. The system chooses the first file found in the S3 bucket
- B. The ingestion setup is completed but the data stream shows 0 records
- C. The ingestion setup can't be completed without specifying the filename.
- **D. The system does not fetch any file and the data stream shows an error.**

**Answer: D**

Explanation:

If no file name is specified in AWS S3 data stream during ingestion, the system does not fetch any file and the data stream shows an error. AWS S3 data stream is a feature that allows you to stream data from Amazon Web Services Simple Storage Service (AWS S3) to Data Cloud in near real time. You need to specify the file name or prefix of the files that you want to ingest from your S3 bucket. If you leave this field blank, the system cannot find any matching files and returns an error message. Reference: AWS S3 Data Stream

### NEW QUESTION # 125

.....

Dare to pursue, we will have a good future. Do you want to be successful people? Do you want to be IT talent? Do you want to pass Salesforce Salesforce-Data-Cloud certification?
