UiPath-ASAPv1 Reasonable Exam Price - UiPath-ASAPv1 Test Free

You have seen Actualtests4sure's UiPath UiPath-ASAPv1 Exam Training materials, it is time to make a choice. You can choose other products, but you have to know that Actualtests4sure can bring you infinite interests. Only Actualtests4sure can guarantee you 100% success. Actualtests4sure allows you to have a bright future. And allows you to work in the field of information technology with high efficiency.

UiPath Automation Solution Architect Professional v1.0 Exam Sample Questions (Q141-Q146):

NEW QUESTION # 141

What are the two main delivery options for the UiPath Platform?

- A. UiPath Automaton Studio and UiPath Automation Hub
- B. **UiPath Automaton Cloud and UiPath Automaton Suite**
- C. UiPath Automaton Enterprise and UiPath Automaton Express
- D. UiPath Automaton Web and UiPath Automaton Desktop

Answer: B

Explanation:

UiPath offers two main delivery options for the UiPath Platform, which are designed to provide customers with flexibility and choice

on how to deploy and manage their automation solutions. These options are:

UiPath Automation Cloud: This is a cloud-based service that provides the complete UiPath Platform as a software as a service (SaaS) offering. Customers can access all the UiPath products and services from a single web portal, without having to worry about infrastructure, maintenance, or updates. UiPath Automation Cloud is scalable, secure, and compliant with various standards and regulations.

UiPath Automation Suite: This is a self-hosted solution that delivers the same cloud-native platform architecture and functionality as UiPath Automation Cloud, but on-premises or in a public cloud of the customer's choice. Customers can install and configure UiPath Automation Suite on Linux-based hardware or virtual machines, and benefit from the containerized and microservices-based design, the unified user experience, and the platform services. UiPath Automation Suite also includes tools for managing and monitoring the Kubernetes and Linux infrastructure, as well as periodic updates for the entire package.

NEW QUESTION # 142

In machine learning, what is the process of allowing a model to adjust its parameters based on data to improve its performance?

- A. Feature engineering.
- B. **Model training.**
- C. Model deployment.
- D. Hyperparameter tuning.

Answer: B

Explanation:

In the context of machine learning, as described in UiPath's AI Fabric documentation, model training is the process where a machine learning model learns from the data provided to it, allowing it to adjust its parameters to improve its performance in making predictions or decisions based on new data. This is a fundamental step in developing AI capabilities within UiPath solutions. (Source: <https://docs.uipath.com/ai-fabric/docs/about-ai-fabric>)

NEW QUESTION # 143

What is the purpose of the UiPath Automation Hub within the UiPath ecosystem?

- A. Construct process maps and accelerate the adoption of automations
- B. Digitization data integration and management for automations.
- C. **Opportunity identification and pipeline management for automations**
- D. Streamline communications between teams and orchestration of automations

Answer: C

Explanation:

UiPath Automation Hub is a collaborative tool that helps users discover and manage automation opportunities and process improvements, prioritized by impact and ROI. It also facilitates collaboration across SMEs, developers, and the CoE, and provides a central repository for process documentation and reusable components.

NEW QUESTION # 144

Automating company-wide processes will often require a combination of long-running workflows, ensuring workflow context persistence, calling various services, adding humans in the loop, and asynchronous processing.

What is the role of Orchestration Processes in this context?

- A. To coordinate the Orchestrator Packages that are used by each Robot.
- B. To coordinate which Processes are performed by which Robots.
- C. **To coordinate these processes using business rules and conditions and to monitor the execution.**
- D. To only perform actions in UiPath Orchestrator and to monitor the execution.

Answer: C

Explanation:

Orchestration Processes in UiPath are designed to manage complex workflows that involve long-running operations, human interactions, and integration with various services. They coordinate different parts of the process according to business logic and monitor the execution to ensure that the workflow progresses smoothly.

NEW QUESTION # 145

What are the two main delivery options for the UiPath Platform?

- A. UiPath Automaton Studio and UiPath Automation Hub
- B. **UiPath Automaton Cloud and UiPath Automaton Suite**
- C. UiPath Automaton Enterprise and UiPath Automaton Express
- D. UiPath Automaton Web and UiPath Automaton Desktop

Answer: B

Explanation:

UiPath offers two main delivery options for the UiPath Platform, which are designed to provide customers with flexibility and choice on how to deploy and manage their automation solutions. These options are:

UiPath Automation Cloud: This is a cloud-based service that provides the complete UiPath Platform as a software as a service (SaaS) offering. Customers can access all the UiPath products and services from a single web portal, without having to worry about infrastructure, maintenance, or updates. UiPath Automation Cloud is scalable, secure, and compliant with various standards and regulations.

UiPath Automation Suite: This is a self-hosted solution that delivers the same cloud-native platform architecture and functionality as UiPath Automation Cloud, but on-premises or in a public cloud of the customer's choice. Customers can install and configure UiPath Automation Suite on Linux-based hardware or virtual machines, and benefit from the containerized and microservices-based design, the unified user experience, and the platform services. UiPath Automation Suite also includes tools for managing and monitoring the Kubernetes and Linux infrastructure, as well as periodic updates for the entire package.
