Famous SC-400 Exam Questions Bring You the Most Helpful Learning Dumps - ExamTorrent

With the SC-400 qualification certificate, you are qualified to do this professional job. Therefore, getting the test SC-400 certification is of vital importance to our future employment. And the SC-400 study tool can provide a good learning platform for users who want to get the test SC-400 Certification in a short time. If you can choose to trust us, I believe you will have a good experience when you use the SC-400 study guide, and pass the exam and get a good grade in the test SC-400 certification.

Microsoft Information Protection Administrator Sample Questions (Q324-Q329):

NEW QUESTION # 324

You have a data loss prevention (DLP) policy that has the advanced DLP rules shown in the following table. You need to identify which rules will apply when content matches multiple advanced DLP rules. Which rules should you identify? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

If content matches Rule1, Rule2, and Rule3:

▼
Only Rule1 takes effect
Only Rule2 takes effect
Only Rule3 takes effect
Rule1, Rule2, and Rule3 take effect

If content matches Rule2, Rule3, and Rule4:

▼
Only Rule2 takes effect
Only Rule3 takes effect
Only Rule4 takes effect
Only Rule2 and Rule4 take effect
Rule2, Rule3, and Rule4 take effect

Explanation:

NEW QUESTION # 325

You are implementing Microsoft Office 365 Message Encryption (OME) for a Microsoft 365 tenant named contoso.com.

You need to meet the following requirements:

* All email to a domain named fabrikam.com must be encrypted automatically.

* Encrypted emails must expire seven days after they are sent.

What should you configure for each requirement? To answer, select the appropriate options. NOTE: Each correct selection is worth one point.

All email to a domain named fabrikam.com must be encrypted automatically:	▼			
	<table border="1"><tr><td>A data connector in the Microsoft 365 compliance center</td></tr><tr><td>A data loss prevention (DLP) policy in the Microsoft 365 compliance center</td></tr><tr><td>A mail flow connector in the Exchange admin center</td></tr><tr><td>A mail flow rule in the Exchange admin center</td></tr></table>	A data connector in the Microsoft 365 compliance center	A data loss prevention (DLP) policy in the Microsoft 365 compliance center	A mail flow connector in the Exchange admin center
A data connector in the Microsoft 365 compliance center				
A data loss prevention (DLP) policy in the Microsoft 365 compliance center				
A mail flow connector in the Exchange admin center				
A mail flow rule in the Exchange admin center				
Encrypted emails must expire seven days after they are sent:	▼			
	<table border="1"><tr><td>A custom branding template in Microsoft Exchange Online PowerShell</td></tr><tr><td>A label policy in the Microsoft 365 compliance center</td></tr><tr><td>A mail flow rule in the Exchange admin center</td></tr><tr><td>A sensitive info type in the Microsoft 365 compliance center</td></tr></table>	A custom branding template in Microsoft Exchange Online PowerShell	A label policy in the Microsoft 365 compliance center	A mail flow rule in the Exchange admin center
A custom branding template in Microsoft Exchange Online PowerShell				
A label policy in the Microsoft 365 compliance center				
A mail flow rule in the Exchange admin center				
A sensitive info type in the Microsoft 365 compliance center				

Answer:

Explanation:

All email to a domain named fabrikam.com must be encrypted automatically:

- A data connector in the Microsoft 365 compliance center
- A data loss prevention (DLP) policy in the Microsoft 365 compliance center
- A mail flow connector in the Exchange admin center**
- A mail flow rule in the Exchange admin center

Encrypted emails must expire seven days after they are sent:

- A custom branding template in Microsoft Exchange Online PowerShell**
- A label policy in the Microsoft 365 compliance center
- A mail flow rule in the Exchange admin center
- A sensitive info type in the Microsoft 365 compliance center

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/email-encryption?view=o365-worldwide>

<https://docs.microsoft.com/en-us/microsoft-365/compliance/ome-advanced-expiration?view=o365-worldwide>

NEW QUESTION # 326

You have a data loss prevention (DLP) policy that applies to the Devices location. The policy protects documents that contain States passport numbers.

Users reports that they cannot upload documents to a travel management website because of the policy.

You need to ensure that the users can upload the documents to the travel management website. The solution must prevent the protected content from being uploaded to other locations.

Which Microsoft 365 Endpoint data loss prevention (Endpoint DLP) setting should you configure?

- A. Unallowed apps
- B. File path exclusions
- C. Unallowed browsers
- **D. Service domains**

Answer: D

Explanation:

Explanation

You can control whether sensitive files protected by your policies can be uploaded to specific service domains from Microsoft Edge. If the list mode is set to Block, then user will not be able to upload sensitive items to those domains.

When an upload action is blocked because an item matches a DLP policy, DLP will either generate a warning or block the upload of the sensitive item.

If the list mode is set to Allow, then users will be able to upload sensitive items only to those domains, and upload access to all other domains is not allowed.

NEW QUESTION # 327

You have a Microsoft 365 subscription that has Enable Security defaults set to No in Azure AD.

You have a custom compliance manager template named Regulation1.

You have the assessments shown in the following table.

Name	Score	Status	Group	Product	Regulation
Assessment1	1200	Incomplete	Group1	Microsoft 365	Regulation1
Assessment2	900	Incomplete	Group2	Microsoft 365	Regulation1

Assessment1 has the improvement actions shown in the following table.

Improvement action	Test status	Impact	Points achieved	Action type
Enable multi-factor authentication for admins	Failed high risk	+27 points	0/27	Technical
Enable multi-factor authentication for non-admins	Failed high risk	+27 points	0/27	Technical

Assessment2 has the improvement actions shown in the following table.

Improvement action	Test status	Impact	Points achieved	Action type
Establish a threat intelligence program	None	+9 points	0/9	Operational
Configure a privileged access policy	Failed high risk	+15 points	0/15	Technical

You perform the following actions:

- * For Assessment2, change the Test status of Establish a threat intelligence program to Implemented.
- * Enable multi-factor authentication (MFA) for all users.
- * Configure a privileged access policy.

For each of the following statements, select Yes if the statement is true. Otherwise select No.

NOTE: Each correct selection is worth one point.

Answer Area		Statements	Yes	No
		Establish a threat intelligence program will appear as Implemented in Assessment1.	<input type="radio"/>	<input type="radio"/>
		The Assessment1 score will increase by only 54 points.	<input type="radio"/>	<input type="radio"/>
		The Assessment2 score will increase by only 78 points.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area		Statements	Yes	No
		Establish a threat intelligence program will appear as Implemented in Assessment1.	<input type="radio"/>	<input type="radio"/>
		The Assessment1 score will increase by only 54 points.	<input type="radio"/>	<input type="radio"/>
		The Assessment2 score will increase by only 78 points.	<input type="radio"/>	<input type="radio"/>

Explanation:

Answer Area		Statements	Yes	No
		Establish a threat intelligence program will appear as Implemented in Assessment1.	<input checked="" type="radio"/>	<input type="radio"/>
		The Assessment1 score will increase by only 54 points.	<input checked="" type="radio"/>	<input type="radio"/>
		The Assessment2 score will increase by only 78 points.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION # 328

You have a Microsoft 365 E3 subscription.

You plan to audit all Microsoft Exchange Online user and admin activities.

You need to ensure that all the Exchange audit log records are retained for one year.

What should you do?

- A. Create a custom audit retention policy.
- B. Modify the retention period of the default audit retention policy.
- C. Modify the record type of the default audit retention policy.
- D. Assign Microsoft 365 Enterprise E5 licenses to all users.

Answer: D

Explanation:

Topic 2, Fabrikam, Case Study

Overview

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all included on this exam in the time provided.

To answer the questions included in a case study, you will need In reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described In the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Cloud Environment

Fabrikam has a Microsoft 365 tenant that contains the following resources:

- * An Azure Active Directory (Azure AD) tenant that syncs to an on-premises Active Directory domain named corp.fabrikam.com
- * Microsoft Cloud App Security connectors configured for all supported cloud applications used by the company Some users have company Dropbox accounts.

Compliance Configuration

Fabrikam has the following in the Microsoft 365 compliance center:

- * A data loss prevention (DLP) policy is configured. The policy displays a tooltip to users. Users can provide a business justification to override a DLP policy violation.
- * The Azure information Protection unified labeling scanner is installed and configured.
- * A sensitivity label named Fabrikam Confidential is configured.

An existing third-party records management system is managed by the compliance department.

Human Resources (HR) Management System

The HR department has an Azure SQL database that contains employee information. Each employee has a unique 12-character alphanumeric ID. The database contains confidential employee attributes including payroll information, date of birth, and personal contact details.

On-premises Environment

You have an on-premises file server that runs Windows Server 2019 and stores Microsoft Office documents in a shared folder named Data.

All end-user computers are joined to the corp.fabrikam.com domain and run a third-party antimalware application.

Sales Contracts

Users in the sales department receive draft sales contracts from customers by email. The sales contracts are written by the customers and are not in a standard format.

Employment Applications

Employment applications and resumes are received by HR department managers and stored in either mailboxes, Microsoft SharePoint Online sites, OneDrive for Business folders, or Microsoft Teams channels.

The employment application form is downloaded from SharePoint Online and a serial number is assigned to each application. The resumes are written by the applications and in any format.

HR Requirements

You need to create a DLP policy that will notify the HR department of a DLP policy violation if a document that contains confidential employee attributes is shared externally. The DLP policy must use an Exact Data Match (EDM) classification derived from a CSV export of the HR department database.

The HR department identifies the following requirements for handling employment applications:

- * Resumes must be identified automatically based on similarities to other resumes received in the past
- * Employment applications and resumes must be deleted automatically two years after the applications are received.
- * Documents and emails that contain an application serial number must be identified automatically and marked as an employment application.

Sales Requirements

A sensitivity label named Sales Contract must be applied automatically to all draft and finalized sales contracts.

Compliance Requirements

Fabrikam identifies the following compliance requirements:

- * All DLP policies must be applied to computers that run Windows 10, with the least possible changes to the computers.
- * Users in the compliance department must view the justification provided when a user receives a tooltip notification for a DLP violation.

* If a document that has the Fabrikam Confidential sensitivity label applied is uploaded to Dropbox, the file must be deleted automatically. - The Fabrikam Confidential sensitivity label must be applied to existing Microsoft Word documents in the Data shared folder that have a document footer containing the following string: Company use only.

* Users must be able to manually select that email messages are sent encrypted. The encryption will use Office 365 Message Encryption (OME) v2. Any email containing an attachment that has the Fabrikam Confidential sensitivity label applied must be encrypted automatically by using OME.

* Existing policies configured in the third-party records management system must be replaced by using Records management in the Microsoft 365 compliance center. The compliance department plans to export the existing policies, and then produce a CSV file that contains matching labels and policies that are compatible with records management in Microsoft 365. The CSV file must be used to configure records management in Microsoft 365.

Executive Requirements

You must be able to restore all email received by Fabrikam executives for up to three years after an email is received, even if the email was deleted permanently.

NEW QUESTION # 329

.....

SC-400 practice test can be your optimum selection and useful tool to deal with the urgent challenge. With over a decade's striving, our SC-400 training materials have become the most widely-lauded and much-anticipated products in industry. We will look to build up R&D capacity by modernizing innovation mechanisms and fostering a strong pool of professionals. Therefore, rest assured of full technical support from our professional elites in planning and designing SC-400 Practice Test.
