International Code Council Commercial Mechanical Inspector Sample Questions (Q33-Q38):

NEW QUESTION # 33

An 8-inch Type B venting system with a listed vent cap must terminate a minimum of _____ feet above the flat roof through which it passes.

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

For a Type B gas vent with a listed vent cap terminating through a flat roof, the minimum required termination height is 1 foot above the roof. That makes Option A correct. This is consistent with gas vent termination tables used with listed Type B vent systems and the code framework for Type B vent terminations.

NEW QUESTION # 34

Solid-fuel cooking equipment:

- **A. shall be vented through a separate hood and exhaust system**
- B. is permitted to be installed under common canopy-type hoods with other cooking equipment.
- C. is permitted to be installed under Type II canopy-type hoods.
- D. is permitted to be installed under Type II noncanopy-type hoods.

Answer: A

Explanation:

Solid-fuel cooking equipment requires a separate hood and exhaust system. It is not permitted to share the same hood/exhaust arrangement in the manner suggested by the other choices. This is a standard commercial kitchen exhaust requirement because of the added fire and residue hazards associated with solid-fuel appliances.
