Reliable Plat-Con-201 Mock Test | New Plat-Con-201 Exam Topics

In the 21 Century, the Plat-Con-201 certification became more and more recognized in the society because it represented the certain ability of examinees. However, in order to obtain Plat-Con-201 certification, you have to spend a lot of time preparing for the Plat-Con-201 Exam. Many people gave up because of all kinds of difficulties before the examination, and finally lost the opportunity to enhance their self-worth. As a thriving multinational company, we are always committed to solving this problem.

Evaluate your own mistakes each time you attempt the desktop Salesforce Certified Omnistudio Consultant (Plat-Con-201) practice exam. It expertly is designed Plat-Con-201 practice test software supervised by a team of professionals. There is 24/7 customer service to help you in any situation. You can customize your desired Plat-Con-201 Exam conditions like exam length and the number of questions.

Free PDF 2026 Salesforce Plat-Con-201: The Best Reliable Salesforce Certified Omnistudio Consultant Mock Test

Achieving the Salesforce Plat-Con-201 certificate is an excellent way of paying your way in the tech field. However, to become Salesforce Plat-Con-201 certified, you will have to crack the Salesforce Plat-Con-201 exam. This is a challenging task since preparation for the Salesforce Plat-Con-201 Exam demands an inside-out understanding of Plat-Con-201 domains and many Salesforce Plat-Con-201 test applicants do not have enough time due to their busy routines.

Salesforce Certified Omnistudio Consultant Sample Questions (Q59-Q64):

NEW QUESTION # 59
A company needs to create a process that allows call center admins to retrieve all open cases that have a case type of "network issue" and submit the case data "as-is" to a back-office system for validation in batch on a daily basis. Once the cases have been submitted, the process should trigger an email to the supervisor.
Which three OmniStudio tools should the consultant recommend to meet these requirements?
Choose 3 answers

- A. Integration Procedure
- B. DataRaptor Load
- C. OmniScript
- D. FlexCard
- E. DataRaptor Turbo Extract

Answer: A,B,E

Explanation:
The three tools that should be used in the solution are DataRaptor Turbo Extract, Integration Procedure, and DataRaptor Load.
DataRaptor Turbo Extract can be used to retrieve all open cases that have a case type of
"network issue" from Salesforce in batch mode. Integration Procedure can be used to orchestrate the data flow between Salesforce

and the back-office system, as well as trigger an email to the supervisor after the cases have been submitted. DataRaptor Load can be used to write data to the back-office system using REST or SOAP APIs. OmniScript is not needed for this scenario, as there is no user interface involved. FlexCard is not relevant for this scenario, as it is used to display contextual data on record pages.

NEW QUESTION # 60

An existing OmniScript used to capture and update customer information displays the following information on the same page:
* Name
* Age
* Street
* Last name
* Postal code
* Gender
* State
* Phone
* City
* Country
* Email

Users report that the information displays in no specific order. Users experience errors when filling the information because it is not categorized. The process fails after submission because the mandatory fields are blank.
How can the consultant improve the user experience of the OmniScript?

- A. Use a Section to break the information and Headline to the title and a required icon in the input
- B. Use a Visualforce Page with the categories, labels, and the required validation
- C. Use Block elements to group and required property checked in some of the inputs
- D. Use a template for each category and add custom code for the required validation

Answer: C

Explanation:
The consultant can improve the user experience of the OmniScript by using a Section element to break the information and a Headline element to add the title and a required icon in the input. A Section element can group related fields and elements in a logical way, making it easier for the user to navigate and fill the information. A Headline element can display a label and an icon for each field, indicating which ones are mandatory. This way, the OmniScript can display the information in a specific order and prevent errors and failures

NEW QUESTION # 61

A company has a requirement to create a 360° view of their customers using FlexCards. At this company, customer data is stored in Salesforce but also in external legacy systems. A consultant reviews the use cases needed and recommends a FlexCard canvas that contains 5 child FlexCards inside the state of the parent FlexCard.
How many different data sources can be configured using FlexCards in this scenario?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
The number of different data sources that can be configured using FlexCards in this scenario is 6. A FlexCard can have one data source per state, and a state can have multiple child FlexCards, each with its own data source. Therefore, the parent FlexCard can have one data source for its state, and each of the 5 child FlexCards can have a different data source, making a total of 6 data sources

NEW QUESTION # 62

A company wants to create a guided process for their customers. The process needs to retrieve data from Salesforce as well as external systems, and the steps of the process will branch depending on input from the user. Users will complete the process in a

single session.
How should the consultant design the solution to meet these requirements?

- A. FlexCards and DataRaptors
- B. OmniScripts and DataRaptors
- C. FlexCards and Integration Procedures
- D. OmniScripts and Integration Procedures

Answer: D

Explanation:
The consultant should design the solution using OmniScripts and Integration Procedures to meet these requirements. An OmniScript is a tool that can design customer interactions using elements and actions. The consultant can use an OmniScript to create the guided process for the customers. An Integration Procedure is a tool that can execute multiple DataRaptor actions, such as Extract, Transform, and Load, and also invoke REST or SOAP services. The consultant can use Integration Procedures to retrieve data from Salesforce as well as external systems, and store it in a JSON object for display or processing in the OmniScript

NEW QUESTION # 63
What is the purpose of the Messaging element in OmniScript?

- A. Send email/text to users based on logical conditions
- B. Display a custom styled message
- C. Display warning to users based on logical conditions
- D. Trigger an event to external data sources based on logical conditions

Answer: C

Explanation:
The purpose of the Messaging element in OmniScript is to display a warning to users based on logical conditions. A Messaging element can show a message with an icon and a color, such as red for error or green for success. The message can be configured to appear or disappear based on certain criteria, such as field values or user actions

NEW QUESTION # 64
......

The Actual4Dumps is a reliable platform that is committed to making your preparation for the Salesforce Plat-Con-201 examination easier and more effective. To meet this objective, the Actual4Dumps is offering updated and real Salesforce Certified Omnistudio Consultant Plat-Con-201 exam dumps. These Salesforce Plat-Con-201 Exam Questions are approved by experts. They work together and analyze the examination content to compile most probable Plat-Con-201 real dumps in three formats. These Salesforce Exams questions will surely appear in the next Salesforce Plat-Con-201 test.
