It will save your progress and give a report of your mistakes which will surely be beneficial for your overall exam preparation.

Salesforce Certified Slack Administrator Sample Questions (Q129-Q134):

NEW QUESTION # 129

Andrew is the Primary Org Owner for his company's Enterprise Grid org, which consists of three workspaces.

Frank, a new member of the IT department, will be responsible for inviting guests and managing one of the three workspaces' settings.

Which role should Andrew give Frank in Slack?

- A. Multi-channel Guest
- **B. Workspace Admin**
- C. Member
- D. Primary Org Owner

Answer: B

Explanation:

In Slack Enterprise Grid, a Workspace Admin is the correct role for someone managing settings and guest invitations for a specific workspace.

Slack documentation says:

"Workspace Admins can manage workspace-level settings, invite and manage guests, and perform administrative tasks for their designated workspace." Assigning Frank as a Workspace Admin gives him the necessary permissions to manage the workspace

without granting organization-wide control (which is reserved for Org Admins and Primary Org Owners).
Options like Member or Multi-Channel Guest do not have the needed permissions.
(Reference: Slack Administration Study Guide - Enterprise Grid Roles and Permissions)

-

NEW QUESTION # 130

When advising team members on the best practices of threading, what should you tell them is an effective way of using threads?

- A. To add responses such as "thank you" or "I'm looking into it" without cluttering the channel needlessly
- B. To ensure that others in a channel will be notified of new messages
- C. To make multiple discussions in the same channel easier to follow
- D. To use slash commands without disturbing the rest of the channel members

Answer: C

Explanation:

Slack encourages using threads to keep conversations organized and prevent clutter in busy channels.

Official Slack documentation says:

"Threads help organize conversations around specific messages, allowing multiple discussions to happen simultaneously within a single channel without causing confusion." While thanking or quick responses (Option B) can also be done in threads, the primary reason for using threads is to manage multiple discussions efficiently.

(Reference: Slack Administration Study Guide - Best Practices for Channel Communication and Threading)

-

NEW QUESTION # 131

You're a Slack admin creating a list of default prefixes. You want to provide employees with standard naming conventions to use when they create new channels.

After reviewing existing channels, you determine that there are three types of channels most often created: * Slack Connect channels for collaborating with partners.

* Channels for groups within a line of business.

* Channels to support collaboration on specific engagements.

What are the three best prefixes to add to your default list?

(Select the THREE best answers.)

- A. #help
- B. #slack
- C. announce
- D. #team-
- E. #ext-
- F. #proj-

Answer: D,E,F

Explanation:

Slack best practices for channel naming recommend:

"#team- for department or functional groups, #proj- for project-based collaboration, and #ext- for Slack Connect (external) channels."

#announce (B) is more suitable for announcement-type channels, not team/project work. #help (C) is generally for support channels.

#slack (E) is not a standard naming prefix.

(Reference: Slack Administration Study Guide - Channel Naming Conventions Best Practices)

-

NEW QUESTION # 132

You're an Org Owner for your company's Slack Enterprise Grid org. Your team wants to add standardized user attributes to members' profiles using existing Identity Provider (IdP) data.

What is the best method to enable this process?

(Select the best answer.)

- A. Use the SCIM API to sync attributes to your member profiles.
- B. Use the Analytics API to sync attributes to your analytics dashboard.
- C. Use the Custom Profile API to sync attributes to your analytics dashboard.
- D. Create custom profile fields for members to add standard attributes to their profile.

Answer: A

Explanation:

Slack's SCIM API documentation states:

"SCIM provisioning can be used to sync user attributes, like department, title, and location, from an Identity Provider to Slack profiles." Analytics API (A) and Custom Profile API (C) focus on reporting or manual updates, not syncing at scale.

Manual field creation (D) does not automate the syncing.

(Reference: Slack Administration Study Guide - SCIM Attribute Syncing)

-

NEW QUESTION # 133

What is a way to determine if an external person outside of your organization also uses Slack?

- A. Search for the person's email in the "People" section of your sidebar.
- B. Search for the person's email in the "Slack Connect" section of your sidebar.
- C. Invite them to a Slack Connect channel first to verify whether or not they use Slack.
- D. Ask your Workspace Primary Owner if they can confirm if the person uses Slack.

Answer: B

Explanation:

Slack Connect allows you to:

"Search for external users by entering their email address in the Slack Connect section of your sidebar to verify if their organization uses Slack." Inviting first (B) is less efficient. Asking your Workspace Owner (A) is manual. The "People" section (D) only searches internal directory members.

(Reference: Slack Administration Study Guide - Using Slack Connect Discovery)
