In order to avoid the occurrence of this phenomenon, the SAP Certified Associate - Process Data Analyst - SAP Signavio study question have corresponding products to each exam simulation test environment, users log on to their account on the platform, at the same time to choose what they want to attend the exam simulation questions, the C_SIGDA_2403 exam questions are automatically for the user presents the same as the actual test environment simulation test system, the software built-in timer function can help users better control over time, so as to achieve the systematic, keep up, as well as to improve the user's speed to solve the problem from the side with our C_SIGDA_2403 Test Guide.

SAP C_SIGDA_2403 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP Signavio Process Collaboration Hub: By covering this topic, you learn how to navigate through different process information and collaborate with other business users. Lastly, the topic delves into this navigation to share feedback on process content.
Topic 2	• Business Process Management: There are different areas of business process management. This topic explains those areas and also discusses the process levels and its architecture.
Topic 3	• SAP Signavio Process Intelligence: To explore and analyze a data set, this section discusses creating an investigation. It also discusses revealing inefficiencies in the process.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q36-Q41):

NEW QUESTION # 36
What color have blockers that have an information purpose?

- A. Green
- B. White
- C. Red
- D. Blue

Answer: D

NEW QUESTION # 37
What is the goal of Process Mining? Note: There are 2 correct answers to this question.

- A. To transform business data into actionable insights
- B. To create reports for analysis
- C. To simulate business processes
- D. To reveal the current state of processes in a system

Answer: A,D

Explanation:
The primary objectives of Process Mining are to provide transparency into actual process execution and enable data-driven improvements. The SAP Signavio documentation states:
* Option A (To reveal the current state of processes in a system):Process Mining analyzes event logs to reconstruct and visualize how processes are actually performed, revealing inefficiencies, deviations, or bottlenecks.
* Option C (To transform business data into actionable insights):By analyzing process data, Process Mining generates insights that guide process optimization, cost reduction, or compliance improvements, making data actionable for business decisions.
* Option B (To create reports for analysis)is incorrect because, while reports can be generated, the goal of Process Mining is broader, focusing on process transparency and improvement, not just reporting.
Reference:SAP Signavio Process Intelligence Documentation, section on "Objectives of Process Mining"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Process Mining Goals.

NEW QUESTION # 38
When managing SAP Signavio Process Manager, what are essential aspects to consider for ensuring data security? (Choose two)

- A. Encryption of stored data
- B. Regular updates to process models
- C. Role-based access to process information
- D. Use of strong passwords for database access

Answer: A,C

NEW QUESTION # 39
What is the benefit of the Process Funnel Widget?

- A. To visualize the revenues each region produces
- B. To visualize the process conformance and non-compliant steps
- C. To visualize the different variants of the process
- D. To visualize the data 'traffic' along a process path

Answer: D

Explanation:
The Process Funnel Widget in SAP Signavio Process Intelligence is designed to show the progression of cases through a process.

The documentation states:
* Option B (To visualize the data 'traffic' along a process path):The Process Funnel Widget visualizes the flow of cases through process steps, highlighting drop-off points and bottlenecks, effectively showing the "traffic" or volume of cases at each stage.
* Option A (To visualize the different variants of the process)is incorrect as variants are visualized using the Variant Explorer Widget.
* Option C (To visualize the process conformance and non-compliant steps)is incorrect because conformance is analyzed using the Process Conformance Widget.
Reference:SAP Signavio Process Intelligence Widget Documentation, section on Process Funnel Widget; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Widget Functionality.

NEW QUESTION # 40

What are the typical roles required in Process Mining projects? Note: There are 3 correct answers to this question.

- A. Process Manager
- B. Data & IT Expert
- C. Project Lead
- D. Process Analyst
- E. Process Owner

Answer: B,D,E

Explanation:
Process Mining projects require a combination of technical, analytical, and process-specific expertise.
According to the SAP Signavio documentation:
* Option A (Data & IT Expert):This role is responsible for extracting and preparing data from source systems, configuring ETL pipelines, and ensuring data quality for Process Mining analysis.
* Option C (Process Analyst):The Process Analyst interprets Process Mining results, identifies improvement opportunities, and translates insights into actionable recommendations.
* Option E (Process Owner):The Process Owner provides domain knowledge, defines analysis objectives, and ensures that Process Mining outcomes align with business goals.
* Option B (Project Lead)is incorrect as, while a project lead may oversee the project, it is not a role specifically required for Process Mining tasks.
Reference:SAP Signavio Process Intelligence Documentation, section on "Roles in ProcessMining Projects"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 5: Process Mining Team Structure.

NEW QUESTION # 41
