To be successful in a professional exam like the Cisco 300-740 exam, you must know the criteria to pass it. You should know the type of Designing and Implementing Secure Cloud Access for Users and Endpoints questions, the pattern of the Designing and Implementing Secure Cloud Access for Users and Endpoints exam, and the time limit to complete the 300-740 Exam. All these factors help you pass the Cisco 300-740 exam. TroytecDumps is your reliable partner in getting your 300-740 certification. The Cisco 300-740 exam dumps help you achieve your professional goals.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Application and Data Security This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.
Topic 2	<ul style="list-style-type: none">Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 3	<ul style="list-style-type: none">Cloud Security Architecture: This section of the exam measures the skills of Cloud Security Architects and covers the fundamental components of the Cisco Security Reference Architecture. It introduces the role of threat intelligence in identifying and mitigating risks, the use of security operations tools for monitoring and response, and the mechanisms of user and device protection. It also includes strategies for securing cloud and on-premise networks, as well as safeguarding applications, workloads, and data across environments.
Topic 4	<ul style="list-style-type: none">SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.

Topic 5	<ul style="list-style-type: none"> • Visibility and Assurance: This section of the exam measures skills of Security Operations Center (SOC) Analysts and focuses on monitoring, diagnostics, and compliance. It explains the Cisco XDR solution, discusses visibility automation, and describes tools for traffic analysis and log management. The section also involves diagnosing application access issues, validating telemetry for behavior analysis, and verifying user access with tools like firewall logs, Duo, and Cisco Secure Workload.
Topic 6	<ul style="list-style-type: none"> • Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.

300-740 Exam Overviews | Interactive 300-740 Course

Our company made these 300-740 practice materials with accountability. We understand you can have more chances being accepted by other places and getting higher salary or acceptance. Our Designing and Implementing Secure Cloud Access for Users and Endpoints training materials are made by our responsible company which means you can gain many other benefits as well. We offer 300-740 free demos for your reference, and send you the new updates if our experts make them freely. If you fail the exam after using our 300-740 exam prep unfortunately, we will switch other versions for you or return full refund.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q169-Q174):

NEW QUESTION # 169

```

Ciscoasa# show vpn-sessiondb detail anyconnect
Username       : USER1                               Index       : 1
Assigned IP    : 10.1.2.3                             Public IP    : 4.5.6.1
Protocol       : AnyConnect-Parent SSL-Tunnel DTLS-Tunnel
License        : AnyConnect Premium
Bytes Tx       : 465106                               Bytes Rx    : 395293
Pkts Tx        : 3310                                Pkts Rx     : 4115
Group Policy   : PolicyAllow                          Tunnel-Group : Employee
Login Time     : 01:41:18 CEST Mon Mar 9 2020
Duration       : 0h:17m:45s
TCP Dst Port   : 443                                  Auth Mode    : userPassword
Idle Time Out  : 30 Minutes                           Idle TO Left : 12 Minutes

tunnel-group Employee webvpn-attributes
pre-fill-username ssl-client
secondary-pre-fill-username ssl-client
group-alias Employee enable

```

Refer to the exhibit. An engineer must implement a remote access VPN solution that provides user and device verification. The company uses Active Directory for user authentication and ID certificates for device identity. Users are currently able to connect using only a valid username and password, even if their computer is missing the required certificate. Which command from the Cisco ASA tunnel-group completes the requirement of verifying device identity in addition to user identity?

- A. authentication aaa certificate
- B. ldap-attribute-map PolicyAllow
- C. webvpn authorize-device
- D. authentication mfa

Answer: A

Explanation:

To enforce both user-based and device-based authentication on Cisco ASA, the tunnel group must include the command: authentication aaa certificate. This configuration requires that both a valid username/password (authenticated via AAA, such as Active Directory) and a trusted certificate (device identity) are present before allowing VPN access. Without this directive, only username/password credentials are validated, which leads to the scenario described in the question.

NEW QUESTION # 170

Which of the following are benefits of implementing cloud security policies for hybrid and multicloud environments?

- A. Improved compliance with regulatory requirements
- B. Increased complexity in management
- C. Enhanced agility and scalability
- D. Enhanced data sovereignty and privacy

Answer: A,C,D

NEW QUESTION # 171

Cisco Secure Cloud Insights aids in cloud security by:

- A. Decreasing the granularity of cloud asset monitoring
- B. Simplifying attack vectors for easier exploitation
- C. Focusing on non-cloud assets
- D. Offering visibility into cloud assets for improved governance and risk management

Answer: D

NEW QUESTION # 172

When determining security policies for network security edge to enforce application policy, which of the following considerations are important?

- A. The ability to inspect encrypted traffic
- B. The need to implement a simple, one-size-fits-all policy
- C. The use of static rules that do not adapt to changing threat landscapes
- D. The integration of threat intelligence for real-time decision making

Answer: A,D

NEW QUESTION # 173

Cloud (hybrid and multicloud) platform security policies should consider:

- A. The physical location of servers only
- B. Using a single cloud provider for all needs
- C. Ignoring encryption to enhance performance
- D. The specific security features and controls offered by third-party providers

Answer: D

NEW QUESTION # 174

.....

TroytecDumps helped many people taking IT certification exam who thought well of our exam dumps. 100% guarantee to pass IT certification test. It is the fact which is proved by many more candidates. If you are tired of preparing Cisco 300-740 Exam, you can choose TroytecDumps Cisco 300-740 certification training materials. Because of its high efficiency, you can achieve remarkable
