

# C1000-173 Exam Topics & Reliable C1000-173 Exam Questions

DOWNLOAD the newest DumpsFree C1000-173 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1EM-m7CoiWexRXiSoNmyLwbs\\_ILpNMG80](https://drive.google.com/open?id=1EM-m7CoiWexRXiSoNmyLwbs_ILpNMG80)

We apply international recognition third party for payment for C1000-173 exam materials, therefore, if you choose us, your money safety will be guaranteed. The third party will guarantee your interests. Besides, C1000-173 exam materials of us is high-quality, they will help you pass the exam successfully. We also pass guarantee and money back guarantee if you fail to pass the exam. C1000-173 Exam Braindumps offer you free update for one year, and in the following year, you can know the latest information for the exam. The latest version for C1000-173 will be sent to your email automatically.

## IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Architect with Data Source Services: This domain measures expertise of a Data Integration Architect and includes architecting solutions with data replication technologies to synchronize data across systems. IBM Data Virtualization architecture enables access to and querying of disparate data sources without data movement. Architecting with watsonx.data focuses on building intelligent data lakes and query engines. Architecting with Db2-related services involves designing scalable data management and processing architectures using IBM's Db2 platforms.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes</li> <li>OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.</li> </ul>

## Reliable IBM C1000-173 Exam Questions - Reliable C1000-173 Test Topics

Not only our IBM C1000-173 study guide has the advantage of high-quality, but also has reasonable prices that are accessible for every one of you. So it is incumbent upon us to support you. On the other side, we know the consumers are vulnerable for many exam candidates are susceptible to ads that boost about IBM C1000-173 skills their practice with low quality which may confuse exam candidates like you, so we are trying hard to promote our high quality C1000-173 study guide to more people.

### IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q114-Q119):

#### NEW QUESTION # 114

When creating a Db2 Big SQL service instance, which two service resource items should be taken into account when sizing the cluster?

- A. Number of physical cores
- B. Amount of memory
- C. Number of workers
- D. Number of virtual cores
- E. Maximum expected throughput

**Answer: B,C**

Explanation:

When provisioning a Db2 Big SQL service instance in IBM Cloud Pak for Data, key considerations include the amount of memory available per worker node and the total number of worker nodes. These factors directly affect query execution parallelism and system capacity. The system does not distinguish between physical and virtual cores at the configuration level. Throughput is an outcome of sizing, not a direct sizing parameter. Therefore, memory and number of workers are the two most critical sizing metrics.

#### NEW QUESTION # 115

Which architectural consideration is crucial when deploying IBM Cloud Pak for Data on Red Hat OpenShift to ensure high availability?

- A. Network latency
- B. Resource quotas
- C. Storage class performance
- D. Pod colocation

**Answer: C**

#### NEW QUESTION # 116

In the context of auditing, what does immutable logging ensure?

- A. High availability
- B. Log storage optimization

- C. User authentication
- **D. Non-repudiation**

**Answer: D**

#### NEW QUESTION # 117

What is a key feature of Data Replication on Cloud Pak for Data?

- A. Lack of integration with platform security
- B. Difficult to use interface
- **C. Agentless architecture**
- D. Requires complex agent-based architectures

**Answer: C**

#### NEW QUESTION # 118

Which two features are valid only when deploying Cloud Pak for Data on-premises?

- A. Compute resources are automatically scaled.
- **B. The number of OpenShift nodes is configured by the administrator.**
- C. Services are automatically updated.
- D. Network security is managed by IBM.
- **E. Persistent storage is always used.**

**Answer: B,E**

Explanation:

In on-premises deployments of IBM Cloud Pak for Data:

Administrators have full control over the number of OpenShift nodes, unlike cloud-managed environments where node scaling may be automatic or abstracted. Persistent storage is always required and configured by the infrastructure team to meet service requirements and ensure data availability.

Auto-scaling of compute and automatic updates of services are not handled by IBM in on-prem setups. Network security responsibilities also lie with the deploying organization, not IBM, in an on-premises model.

#### NEW QUESTION # 119

.....

Now, I am glad to introduce a secret weapon for all of the candidates to pass the exam as well as get the related certification without any more ado-- our C1000-173 study braindumps. You can only get the most useful and efficient C1000-173 Guide materials with the most affordable price from our company, since we aim to help as many people as possible rather than earning as much money as possible. You will be much awarded with our C1000-173 learning engine.
