Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q128-Q133):

NEW QUESTION # 128

ENISA: Lock-in is ranked as a high risk in ENISA research, a key underlying vulnerability causing lock in is:

- A. Audit or certification not available to customers
- B. Lack of information on jurisdictions
- C. Unclear asset ownership
- D. No source escrow agreement
- E. Lack of completeness and transparency in terms of use

Answer: E

NEW QUESTION # 129

Which of the following is a common security issue associated with serverless computing environments?

- A. Complex deployment pipelines
- B. Limited scalability
- C. High operational costs
- **D. Misconfigurations**

Answer: D

Explanation:

Serverless environments are vulnerable to misconfigurations, which can expose sensitive data and resources, making security configurations critical. Reference: [Security Guidance v5, Domain 8 - Cloud Workload Security][source 16].

NEW QUESTION # 130

Who is responsible for infrastructure security in Infrastructure as a service(IaaS) model?

- **A. Shared responsibility between cloud service provider and cloud service customer**
- B. Cloud Service provider
- C. Cloud Service User
- D. Cloud Service Architect

Answer: A

Explanation:

Infrastructure security is shared responsibility between cloud service provider and cloud customer.

NEW QUESTION # 131

What tool allows teams to easily locate and integrate with approved cloud services?

- **A. Service Registry**
- B. Contracts
- C. Risk Register
- D. Shared Responsibility Model

Answer: A

Explanation:

A Service Registry lists approved services, making it easy for teams to find and integrate compliant services. Reference: [CCSK Knowledge Guide, Domain 3 - Risk and Compliance Tools]

NEW QUESTION # 132

What is a key component of governance in the context of cybersecurity?

- **A. Defining roles and responsibilities**
- B. Enforcement of the Penetration Testing procedure
- C. Standardizing technical specifications for security control
- D. Defining tools and technologies

Answer: A

Explanation:

A key component of governance in cybersecurity is defining roles and responsibilities. Governance ensures that the right people within an organization are assigned specific duties related to security and that they are held accountable for those responsibilities. This helps establish clear lines of authority and accountability, ensuring that everyone knows what they are responsible for in terms of

security practices, policies, and procedures.

While standardizing technical specifications, defining tools and technologies, and enforcing penetration testing are important elements of a cybersecurity strategy, defining roles and responsibilities is essential for overall governance to ensure that security practices are consistently followed.

NEW QUESTION # 133

.....

With the help of our CCSK Latest Dumps Pdf, you just need to spend one or two days to practice the CCSK training materials. If you remember the key points of study guide, you will pass the real exam with hit-rate. You can trust us about the valid and accuracy of Cloud Security Alliance braindumps because it created by our experienced workers and based on the real questions.
