## CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q10-Q15):

### NEW QUESTION # 10

Which of the following will best prevent corporate data from being transmitted over the internet?

- A. Modify employee training documentation to point to https addresses instead of http.
- B. Contract a CSP partner for a direct access connection.**
- C. Deploy VLANs to segment the cloud traffic from the Internet.
- D. Use VDI over a WAN connection.

### Answer: B

Explanation:

Contracting a CSP partner for a direct access connection (such as Direct Connect in AWS or ExpressRoute in Azure) provides a dedicated, private network connection between the corporate data center and the cloud provider's infrastructure, bypassing the public internet. This ensures that corporate data is not transmitted over the internet, enhancing security and reducing the risk of data exposure.

### NEW QUESTION # 11

A company's finance department wants to be able to view the consumption of cloud resources so it can prepare weekly reports for the Chief Financial Officer (CFO). Which of the following company policies should best be referenced to gain the CFO's approval for this request?

- A. Communication
- B. Access and control**
- C. Change management
- D. Department-specific

### Answer: B

Explanation:

The Access and control policy defines who has permission to access specific resources and data within the company. In this case, it would govern how the finance department can access the cloud resource consumption data to prepare reports for the CFO. The policy should ensure that the finance team has the necessary permissions while maintaining appropriate security and access controls.

### NEW QUESTION # 12

A systems administrator is reviewing a disaster recovery option that requires little to no downtime in the event of a natural disaster. Which of the following BEST meets this requirement?

- A. Configure geo-redundancy.
- B. Configure high availability.
- C. Configure availability zones.
- D. Configure auto-scaling.

**Answer: A**

Explanation:

Geo-redundant storage keeps copies of data in different regions, which is resilient against a regional disaster.

#### NEW QUESTION # 13

Company A uses an outside vendor for support of its internal network. Company B's networking equipment is housed in a datacenter in another country. Company C has an internal network infrastructure, but its software runs from an on-demand self-service third-party datacenter.

Company D uses its own IT staff to support an internal network. Which of the following companies MUST be using cloud computing?

- A. Company D
- B. Company C
- C. Company B
- D. Company A

**Answer: C**

#### NEW QUESTION # 14

Which of the following cloud migration methods would be BEST suited for disaster recovery scenarios?

- A. Phased
- B. Replatforming
- C. Rip and replace
- D. Lift and shift

**Answer: B**

#### NEW QUESTION # 15
