SAP C_SIGDA_2403 Exam Syllabus Topics:

Topic	Details
Topic 1	• Business Process Management: There are different areas of business process management. This topic explains those areas and also discusses the process levels and its architecture.
Topic 2	• Process Mining: Its primary focus is discussing fundamentals of process mining. Furthermore, the topic explores pointing out the basic data requirements in process mining projects.

Topic 3	• SAP Signavio Process Intelligence: To explore and analyze a data set, this section discusses creating an investigation. It also discusses revealing inefficiencies in the process.
Topic 4	• Plug & Gain: In this topic, you encounter questions about sub-topics of pain and gain.
Topic 5	• SiGNAL: This topic explains how to use SiGNAL as query language. It also discusses how process data and analyze it in more depth.
Topic 6	• SAP Signavio Process Collaboration Hub: By covering this topic, you learn how to navigate through different process information and collaborate with other business users. Lastly, the topic delves into this navigation to share feedback on process content.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which components are included to configure ETL data pipelines in SAP Signavio Process Intelligence? Note: There are 3 correct answers to this question.

Answer:

Explanation:
A,C,D

NEW QUESTION # 48

What benefits do Workflow Management Systems offer? (Choose two)

- A. Automation of manual processes
- B. Increased employee satisfaction
- C. Enhanced data visualization
- D. Simplification of recurring procedures

Answer: A,D

NEW QUESTION # 49

What is the Share button used for in the Graphical Editor?

- A. To transfer the process to another system
- B. To publish a specific process to the Collaboration Hub
- C. To create a PDF File to share with others
- D. To invite stakeholders to provide feedback on a specific process

Answer: B

Explanation:

The Share button in the Graphical Editor of SAP Signavio is primarily used to publish a specific process to the Collaboration Hub. This feature is essential for sharing updated processes with a broader audience, including stakeholders who may not have access to the modeling environment but need to understand or provide feedback on the processes. It's a critical tool for enhancing collaboration and ensuring that process knowledge is disseminated across the organization. The other options, such as creating a PDF, transferring the process to another system, or inviting stakeholders for feedback, are not the primary functions of the Share button. NEW QUESTION # 50

What are the benefits of using a data model in the ETL Data Pipeline configuration? Note: There are 2 correct answers to this

question.

- A. Defines which process KPIs are related to which data table
- **B. Defines where to load the data**
- **C. Defines how ETL extracts and transforms data**
- D. Defines which process models are connected to the data

Answer: B,C

Explanation:

The data model in the ETL Data Pipeline configuration of SAP Signavio Process Intelligence defines the structure and processing rules for data used in process mining. The SAP Signavio ETL Guide clarifies:

* Option C (Defines how ETL extracts and transforms data): The data model specifies the schema for the event log and case attributes, guiding the extraction and transformation processes to ensure data is formatted correctly for analysis.

* Option D (Defines where to load the data): The data model determines the target tables or structures in Process Intelligence where transformed data is loaded, ensuring it is accessible for analysis.

* Option A (Defines which process KPIs are related to which data table) is incorrect because KPIs are defined in metrics or widgets, not directly in the data model, though the model supports the data used for KPIs.
