

# Exam ISACA CISA Questions Answers & New CISA Braindumps Sheet

## ISACA CISA SET Exam 121 Questions with Verified Answers

The internal audit dept. wrote some scripts that are used for continuous auditing of some information systems. The IT dept. asked for copies of the scripts so that they can use them for setting up a continuous monitoring process on key systems. Does sharing these scripts with IT affect the ability of the IS auditors to independently and objectively audit the IT functions?

- a. sharing scripts is not permitted because it gives IT ability to pre-audit systems and avoid an accurate comprehensive audit.
  - b. sharing scripts is required because IT must have ability to review all programs and software that run on IS system regardless of audit independence
  - c. sharing the scripts is permissible if IT recognizes that audit may still be conducted in areas not covered in scripts
  - d. sharing scripts is not permitted because the IS auditors who wrote scripts would not be permitted to audit any IS systems where the scripts are being used -
- CORRECT ANSWER c. sharing the scripts is permissible if IT recognizes that audit may still be conducted in areas not covered in scripts

IS audit can still review all aspects of the system. They may not be able to review the effectiveness of the scripts but they can still audit the systems.

Which of the following activities cause most security vulnerabilities in web servers?

- A. Acquisition
- B. Usage
- C. Configuration
- D. Maintenance - CORRECT ANSWER C. Configuration

The correct answer is configuration. The web server that an organization acquires is generic and must be customized during its configuration. Unnecessary software services and user accounts in the web server should be removed or redefined. The web server configuration scenarios should fit its established security policy.

One of the advantages of the CISA training test is that we are able to provide users with free pre-sale experience, the CISA study materials pages provide sample questions module, is mainly to let customers know our part of the subject, before buying it, users further use our CISA Exam Prep. At the same time, it is more convenient that the sample users we provide can be downloaded PDF demo for free, so the pre-sale experience is unique. So that you will know how efficiency our CISA learning materials are and determine to choose without any doubt.

ISACA CISA (Certified Information Systems Auditor) Exam is a globally recognized certification for professionals in the field of information systems auditing, control, and security. Certified Information Systems Auditor certification is offered by the Information Systems Audit and Control Association (ISACA), a professional association that provides education, training, and certification for IT professionals. The CISA certification is highly valued by employers and is considered a benchmark for IT audit, security, and governance professionals.

The CISA Certification Exam is a rigorous exam that requires a lot of preparation and study. ISACA recommends that candidates have at least five years of experience in information systems auditing, control, or security. Additionally, candidates must adhere to the ISACA Code of Professional Ethics, which requires them to maintain a high level of professionalism and integrity.

So clarity of our CISA training materials make us irreplaceable including all necessary information to convey the message in details to the readers. All necessary elements are included in our CISA practice materials. Effective CISA exam simulation can help increase your possibility of winning by establishing solid bond with you, help you gain more self-confidence and more success.

## ISACA Certified Information Systems Auditor Sample Questions (Q360-Q365):

### NEW QUESTION # 360

While auditing a small organization's data classification processes and procedures, an IS auditor noticed that data is often classified at the incorrect level. What is the MOST effective way for the organization to improve this situation?

- A. Have IT security staff conduct targeted training for data owners.
- B. Publish the data classification policy on the corporate web portal.
- C. Use automatic document classification based on content.
- **D. Conduct awareness presentations and seminars for information classification policies.**

**Answer: D**

### NEW QUESTION # 361

An organization's business continuity plan (BCP) should be:

- A. updated before an independent audit review.
- **B. updated based on changes to personnel and environments.**
- C. tested after an intrusion attempt into the organization's hot site.
- D. tested whenever new applications are implemented.

**Answer: B**

Explanation:

A BCP must stay current with organizational changes to ensure its effectiveness during a disruption.

Personnel changes and environmental updates are directly relevant to how the BCP would be executed.

### NEW QUESTION # 362

In a high-volume, real-time system, the MOST effective technique by which to continuously monitor and analyze transaction processing is:

- A. integrated test facility (ITF).
- B. parallel simulation.
- C. embedded audit modules.
- **D. transaction tagging.**

**Answer: D**

Explanation:

Explanation

Transaction tagging is a technique by which transactions are marked with unique identifiers or headers and traced through the system using agents or sensors at each processing point<sup>1</sup>. Transaction tagging allows for continuous monitoring and analysis of transaction processing in a high-volume, real-time system by providing visibility into the performance, availability, and reliability of each transaction and its components<sup>1</sup>. Transaction tagging can also help to identify and isolate errors, bottlenecks, anomalies, and security issues in the system<sup>1</sup>.

### NEW QUESTION # 363

To protect information assets, which of the following should be done FIRST?

- A. Back up data
- B. Encrypt data
- C. Restrict access to data
- **D. Classify data**

**Answer: D**

Explanation:

Section: Protection of Information Assets

#### NEW QUESTION # 364

An IS auditor has been asked to advise on the design and implementation of IT management best practices. Which of the following actions would impair the auditor's independence?

- A. Designing an embedded audit module
- **B. Implementing risk response on management's behalf**
- C. Providing consulting advice for managing applications
- D. Evaluating the risk management process

**Answer: B**

Explanation:

Section: Governance and Management of IT
