Axis ANVE 考試大綱：

主題	簡介
主題 1	Video Compression: This section of the exam measures skills of Network Engineers and System Designers and covers different video compression formats, their underlying principles, benefits, bitrate management, bandwidth requirements, and factors that influence bitrate.
主題 2	Electromagnetic Radiation: This section of the exam measures skills of System Designers and Pre-Sales Engineers and covers what a camera actually sees in terms of electromagnetic radiation, including visible light, infrared light, and thermal radiation, along with color management, lighting technologies, camera features related to light, and thermal imaging principles.
主題 3	Networking and Cybersecurity: This section of the exam measures skills of Network Administrators and Security Specialists and covers basic networking concepts for network video systems, devices and configurations needed to deliver video from source to destination, and cybersecurity measures to protect against unauthorized access.
主題 4	Camera Elements: This section of the exam measures skills of System Designers and Technical Support Engineers and covers how a camera produces video through its various components, focusing on imaging fundamentals and the question “How does a camera see?”, including optics, lenses, photographic elements, sensors, and other internal camera components.
主題 5	Integration: This section of the exam measures skills of Integration Engineers and System Integrators and covers enhancing network video systems through integration with video encoders, video management software (VMS), analytics, third-party devices, and other technologies.

最新的 Axis Certified Professional ANVE 免費考試真題 (Q156-Q161):

問題 #156

An installer is upgrading an installation with several analog PTZ cameras using Axis Q-line encoders. Which of the following options should be checked before proceeding?

- A. That H.264 compression is supported
- B. That the SD card is supported
- C. That the PTZ driver is supported
- D. That both D1 and 4CIF resolution are supported

答案：C

解題說明：

Before upgrading an installation with analog PTZ cameras using Axis Q-line encoders, it is crucial to check that the PTZ driver is supported. Ensuring compatibility of the PTZ driver with the encoder guarantees that all pan, tilt, and zoom functionalities will work correctly after the upgrade, maintaining the camera's full operational capabilities.

問題 #157

Match each product name with the right description. Drag each gray box from the left column to the matching blue box in the right column.

AXIS P3344-V	Network camera protected from dust, water and vibrations
AXIS M1031-W	Outdoor ready network camera
AXIS M3114-R	Vandal resistant network camera
AXIS Q6035-E	Wireless network camera

答案：

解題說明：

AXIS P3344-V	AXIS M3114-R
AXIS M1031-W	AXIS Q6035-E
AXIS M3114-R	AXIS P3344-V
AXIS Q6035-E	AXIS M1031-W

Explanation:

AXIS P3344-V	Network camera protected from dust, water and vibrations
AXIS M1031-W	Outdoor ready network camera
AXIS M3114-R	Vandal resistant network camera
AXIS Q6035-E	Wireless network camera

問題 #158

Which of these focal lengths has the shortest depth of field?

- A. 48 mm
- B. 6 mm
- C. 24 mm
- D. 12 mm

答案： A

解題說明：

"A longer focal length (such as 48 mm) results in a shorter depth of field compared to shorter focal lengths, meaning only a narrow range of distances will be in focus."

- Axis Communications Academy, Network Video Fundamentals, 2022

"Depth of field decreases as the focal length increases."

問題 #159

Thermal cameras use a different lens compared to visual cameras, why?

- A. The heat from the thermal camera is too much for a standard lens
- B. Standard lenses do not have the clarity required to work effectively
- C. Polarized lenses are required to cut out the glare on the sensor
- **D. Thermal radiation does not pass through a regular glass lens**

答案： D

解題說明：

"Thermal radiation does not pass through standard glass lenses, as glass is opaque to the long-wavelength infrared radiation detected by thermal sensors. Special materials such as germanium are used for thermal camera lenses because they allow infrared radiation to pass through."

- Axis Communications Academy, Thermal Imaging, 2022

"Conventional glass lenses are not suitable for thermal imaging cameras because they block the wavelengths of infrared energy that thermal sensors use. Therefore, thermal lenses are made from materials like germanium."

問題 #160

If using H.264 compression, in theory, what could a video containing no I-frames look like?

- A. All moving objects will be visible
- B. The first P-frame is visible during the whole video
- **C. A black image is visible during the whole video**
- D. All non-moving objects will be visible

答案： C

解題說明：

H.264 compression uses I-frames (intra-coded frames) as reference points, with P-frames (predictive frames) and B-frames (bi-directional frames) encoding only the changes from the previous frames. If a video contained no I-frames, there would be no reference frame for decoding, resulting in an inability to display any image.

This would theoretically result in a black image being visible during the whole video. Therefore, the correct answer is B. For more detailed information, refer to Axis Communications' technical notes on video compression.

問題 #161

.....

沒有人願意自己的人生平平淡淡，永遠在自己的小職位守著那份杯水車薪，等待著被裁員或者待崗或是讓時間悄無聲息的流逝而被退休。這樣的生活是在太沒有滋味了，難道你不想讓你的生活變得多滋多彩嗎？不要緊。今天我告訴你一個成功的捷徑，就是通過Axis的ANVE考試認證，有了這個認證，你就可以過著過著高級白領的生活了，成為一個實力派的IT專業人士，得到別人的敬重。而我們VCESoft將為你提供Axis的ANVE考試認證培訓資料，可以讓你毫不費力的實現這個美夢，你還在猶豫嗎？不要猶豫了，趕緊將VCESoft Axis的ANVE考試認證培訓資料加入購物車吧。
