100% Pass Microsoft - Trustable Latest MB-820 Exam Cram

Don't waste much more time on preparing for a test. Hurry to purchase It-Tests Microsoft MB-820 certification training dumps. With the exam dumps, you will know how to effectively prepare for your exam. This is precious tool that can let you sail through MB-820 test with no mistakes. Missing the chance, I am sure you must regret it. Thus, don't hesitate and act quickly.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q110-Q115):

NEW QUESTION # 110

A company plans to integrate tests with its build pipelines.

The company has two Docker sandbox environments: SandboxA and SandboxB.

You observe the following:

* SandboxA is configured without the Test Toolkit installed.

* SandboxB must be configured from scratch. The Test Toolkit must be installed in SandboxB during configuration.

You need to configure the sandbox environments.

How should you complete the cmdlets? To answer, select the appropriate options in the answer area.

□

Answer:

Explanation:

Explanation:

Based on the PowerShell script snippet you've provided and the scenario described, you need to configure Docker sandbox environments for a company with specific requirements for Test Toolkit installations.

For SandboxA, since it is configured without the Test Toolkit installed, you would typically use the PowerShell cmdlet `Install-TestToolkitToBcContainer` to install the Test Toolkit into the Business Central Docker container.

For SandboxB, which must be configured from scratch with the Test Toolkit installed during configuration, you would include the Test Toolkit as part of the New-BcContainer script block that creates the container.

The relevant cmdlets and parameters for SandboxB would include:

* -includeTestToolkit: This parameter ensures that the Test Toolkit is included during the creation of the new container.

Given the limited context from the image, here's how you should complete the cmdlets for SandboxB:

* Add -includeTestToolkit in the New-BcContainer script to ensure the Test Toolkit is installed when creating SandboxB.

* Since you are setting up SandboxB from scratch, you don't need to run Install-TestToolkitToBcContainer separately as the toolkit will be included at the time of container creation with the -includeTestToolkit parameter.

For the New-BcContainer cmdlet, you would fill in the placeholders with the appropriate values for artifactUrl, imageName, and licenseFile if they are required for your specific setup.

NEW QUESTION # 111

You need to create the Install codeunit that is required in the extension used for installing or updating the Housekeeping app.

Which data type or declaration should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 112

You need to select the appropriate page types to solve the reporting requirements.

Which page types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 113

A company is setting up a sandbox environment.

You observe the following issues in Visual Studio Code:

* When you open the User Settings window, no AL command is available

* In the Problems tab, the error 'The target page Customer List for the extension object is not found' is displayed.

You need to identify a solution for each issue.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 114

You are treating an app for Business Central.

You plan to specify the following parameters and properties of the server and app.

* Startup object type and object ID

* Runtime

* Dependencies

You need to configure the JSON file for the specified parameters and properties. Which JSON files should you configure? To answer, move the appropriate files to the correct object purposes. You may use each file once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

Each JSON file has its own purpose in Business Central extensions:

* app.json

* Purpose: This file holds metadata about the application and contains configuration settings for dependencies and startup object information.

* Startup object type and object ID should be configured here.

* launch.json

* Purpose: This file defines how to run and debug the application during development.

* Runtime settings are configured here.

Final Answer (Drag and Drop):

* Startup object type and object ID # app.json

* Runtime # launch.json

* Dependencies # app.json

NEW QUESTION # 115
