You can choose the device you feel convenient at any time. What is more, you can pass the SOA-C02 exam without difficulty.

Amazon AWS Certified SysOps Administrator - Associate (SOA-C02) Sample Questions (Q279-Q284):

NEW QUESTION # 279
A company uses an Amazon Simple Queue Service (Amazon SQS) standard queue with its application. The application sends messages to the queue with unique message bodies The company decides to switch to an SQS FIFO queue What must the company do to migrate to an SQS FIFO queue?

- A. Create a new SQS FIFO gueue Turn on content based deduplication on the new FIFO queue Update the application to include a message group ID in the messages
- B. Modify the queue type from SQS standard to SQS FIFO Update the application to send messages with identical message bodies and to include the DelaySeconds parameter in the messages
- C. Create a new SQS FIFO queue Update the application to include the DelaySeconds parameter in the messages
- D. Modify the queue type from SQS standard to SQS FIFO Turn off content-based deduplication on the queue Update the application to include a message group ID in the messages

Answer: A

Explanation:
FIFO queues don't support per-message delays, only per-queue delays. If your application sets the same value of the DelaySeconds parameter on each message, you must modify your application to remove the per-message delay and set DelaySeconds on the entire queue instead.
https://docs.aws.amazon.com/AWSSimpleQueueService/latest/SQSDeveloperGuide/FIFO-queues-moving.html

NEW QUESTION # 280
A company has a stateful web application that is hosted on Amazon EC2 instances in an Auto Scaling group. The instances run behind an Application Load Balancer (ALB) that has a single target group. The ALB is configured as the origin in an Amazon CloudFront distribution. Users are reporting random logouts from the web application.
Which combination of actions should a SysOps administrator take to resolve this problem? (Select TWO.)

- A. Enable group-level stickiness on the ALB listener rule.
- B. Enable sticky sessions on the ALB target group.
- C. Configure header forwarding in the CloudFront distribution cache behavior.
- D. Configure cookie forwarding in the CloudFront distribution cache behavior.
- E. Change to the least outstanding requests algorithm on the ALB target group.

Answer: B,D

NEW QUESTION # 281
A company is managing multiple AWS accounts in AWS Organizations. The company is reviewing internal security of Its AWS environment. The company's security administrator has their own AWS account and wants to review the VPC configuration of developer AWS accounts.
Which solution will meet these requirements in the MOST secure manner?

- A. Create an IAM policy m each developer account that has read-only access related to VPC resources.
  Assign the policy to a cross-account IAM role.Ask the security administrator to assume the role from their account
- B. Create an IAM policy in each developer account that has administrator access to all Amazon EC2 actions, including VPC actions.
  Assign the policy to an IAM user.
  Share the user credentials with the security administrator
- C. Create an IAM policy in each developer account that has read-only access related to VPC resources.
  Assign the policy to an IAM user.
  Share the user credentials with the security administrator

- D. Create an IAM policy in each developer account that has administrator access related to VPC resources.
  Assign the policy to a cross-account IAM role.
  Ask the security administrator to assume the role from their account

Answer: A

NEW QUESTION # 282

A company needs to view a list of security groups that are open to the internet on port 3389.
What should a SysOps administrator do to meet this requirement?

- A. Use AWS Trusted Advisor to find security groups that allow unrestricted access on port 3389
- B. Configure Amazon GuardDuty to scan security groups and report unrestricted access on port 3389.
- C. Use AWS Identity and Access Management Access Analyzer to find any instances that have unrestricted access on port 3389.
- D. Configure a service control policy (SCP) to identify security groups that allow unrestricted access on port 3389.

Answer: A

NEW QUESTION # 283

A company made a configuration change to an Amazon EC2 Auto Scaling group that hosts a production application. The change affected the number of available EC2 instances and caused the application to be slow to respond.
The company needs a solution to provide an email notification when a management change occurs to the Auto Scaling group. The company has already set up a trail in AWS CloudTrail to log management write changes.
A SysOps administrator creates an Amazon Simple Notification Service (Amazon SNS) topic that has the appropriate subscribers.
What should the SysOps administrator do next to meet this requirement?

- A. Store all CloudTrail management events in an Amazon S3 bucket. Use S3 Event Notifications to publish a message to the SNS topic when a change to the Auto Scaling group is detected.
- B. Use AWS Config to monitor the trail for changes to the Auto Scaling group. Configure AWS Config to publish a message to the SNS topic when a change is detected.
- C. Create an Amazon EventBridge rule to run in response to CloudTrail management write events that involve the Auto Scaling group. Configure the EventBridge rule to publish a message to the SNS topic when a change is detected.
- D. Use AWS Security Hub to monitor the trail for changes to the Auto Scaling group. Configure Security Hub to publish a message to the SNS topic when a change is detected.

Answer: C

Explanation:
CloudTrail already logs the management write events. An Amazon EventBridge rule can filter for those specific Auto Scaling group API calls and immediately trigger the SNS topic, giving near- real-time email notifications of configuration changes.

NEW QUESTION # 284

......

In the Import window, some of the same Import Browser settings SOA-C02 are available, such as the master file name and where to store files, Mutes that track's audio during playback.

In a word, you can try our free SOA-C02 study guide demo before purchasing, AWS Certified SysOps Administrator - Associate (SOA-C02) Pdf After the researches of many years, we found only the true subject of past-year exam was authoritative and had time-validity, For your benefit, ITExamDownload is putting forth you to attempt the free demo and Amazon SOA-C02 Exam Dumps the best quality highlights of the item, because nobody gives this facility only the ITExamDownload SOA-C02 Free Learning provide this facility.

100% Pass Updated Amazon - SOA-C02 - AWS Certified SysOps Administrator - Associate (SOA-C02) Hot Questions
