Latest MB-500 Test Dumps - Real MB-500 Braindumps

itPass4sure's exam dumps guarantee your success with a promise of returning back the amount you paid. Such an in itself is the best proof of the unique quality of our product and its ultimate utility for you. Try MB-500 Dumps and ace your upcoming MB-500 certification test, securing the best percentage of your academic career. If you didn't pass MB-500 exam, we guarantee you will get full refund.

To prepare for the Microsoft MB-500 exam, candidates should have a working knowledge of Microsoft Dynamics 365 Finance and Operations, as well as experience with development tools such as Visual Studio and Microsoft SQL Server Management Studio. Candidates should also have experience with programming languages such as C# and X++. In addition, candidates should be familiar with development methodologies such as Agile and Waterfall, as well as with software testing and deployment practices. Successful completion of the Microsoft MB-500 exam demonstrates that a developer has the skills and knowledge necessary to create custom solutions that extend the functionality of Microsoft Dynamics 365 Finance and Operations.

Job roles and potential paycheck

After you pass the Microsoft MB-500 test with the Microsoft MB-300 exam, you will obtain the associate-level certification that will open a lot of new doors for you. Thus, you will be able to land a job as an MS Dynamics 365 Developer, a Microsoft Dynamics 365 Finance and Operations .NET Developer, a Dynamics 365 Finance & Operations Support Engineer, or a Dynamics 365 Finance and Operations Architect. Depending on the path you choose, you can earn about \$89,457 per annum.

Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q230-Q235):

NEW QUESTION # 230

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You must create a new attribute class in which to mark other classes in the ISV solution and their respective methods with the error levels Warning and Error. You have the following class: the numbers are included for reference only.)

☐ You need to ensure that the compiler will report an error if code calls the bike method.

Solution:

Create the following attribute class:

☐ Insert the following code at line 04:

☐ Does the solution meet the goal?

- A. No
- B. Yes

Answer: A

NEW QUESTION # 231

You need to implement the reporting requirements for the Vendor exclusion list.

Which options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

NEW QUESTION # 232

You are importing data packages into Dynamics 365 Finance from external systems.

You must import the data packages by using the Data management package REST API. You must check the status after the import is triggered.

You need to call the HTTP operations.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

☐

Answer:

Explanation:

☐ Explanation:

☐

NEW QUESTION # 233

You are creating entities that will have unmapped fields.

You need to determine which types of unmapped fields to use.

Which field types should you use? To answer, drag the appropriate field types to the correct requirements.

Each field type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐ Explanation:

Graphical user interface, text, application Description automatically generated

□

Box 1: Computed

Computed field: Value is generated by an SQL view computed column.

During read, data is computed by SQL and is fetched directly from the view.

Box 2: Computed

Box 3: Virtual

Virtual field:

Is a non-persisted field.

Is controlled by custom X++ code.

Read and write happens through custom X++ code.

Virtual fields are typically used for intake values that are calculated by using X++ code and can't be replaced by computed columns.

Box 4: Virtual

Virtual field is a non-persisted field.
