Free PDF 2026 Adobe AD0-E117 Perfect Training Solutions

As the saying goes, practice makes perfect. We are now engaged in the pursuit of Craftsman spirit in all walks of life. Professional and mature talents are needed in each field, similarly, only high-quality and high-precision Adobe Experience Manager Architect Master qualification question can enable learners to be confident to take the qualification examination so that they can get the certificate successfully, and our AD0-E117 Learning Materials are such high-quality learning materials, it can meet the user to learn the most popular test site knowledge. Because our experts have extracted the frequent annual test centers are summarized to provide users with reference.

Adobe AD0-E117 (Adobe Experience Manager Architect Master) Certification Exam is designed to test the knowledge and skills of professionals in the field of Adobe Experience Manager. Adobe Experience Manager Architect Master certification exam is intended for experienced architects and developers who have already acquired a deep understanding of Adobe Experience Manager and have worked on several projects involving the platform. AD0-E117 Exam aims to assess the ability of candidates to design and implement complex solutions in Adobe Experience Manager, and to ensure that they possess the necessary skills and knowledge to provide clients with effective solutions that meet their business requirements.

Adobe Experience Manager Architect Master Sample Questions (Q32-Q37):

NEW QUESTION # 32
A new AEM Sites implementation includes a component that lists the 10 most recently published PDF documents in AEM Assets. The component works as expected during development and passes QA testing. The business starts to use it while entering content and uploading assets in preparation for go-live. A few days later, the component's PDF list is empty.
What is the most likely cause of the issue?

- A. A PDF with too large file size has been uploaded.
- B. The component is missing a matching Oak index.
- C. The component is missing the HTL display context to escape the PDF title.
- D. A PDF with incorrect MIME type has been uploaded.

Answer: B

Explanation:
"the component is missing a matching Oak index that can efficiently query the PDF documents by their last modified date".

NEW QUESTION # 33
A client has set up branded error pages in AEM to be presented in case of HTTP 400 and HTTP 500 errors on an AEM hosted website. The website pages are under "/content/xbrand/fr/fr/" directory. The error pages are located under "/content/xbrand/fr/fr/error-docs/". The architect notices that the error pages are being invalidated too whenever any other site page is published. Which solution would prevent the error pages from invalidating when publishing any other site page?

- A. Add error pages to the /rule property of dispatcher.any to prevent from invalidation
- B. Add error pages to the /filter property of dispatcher.any to prevent from invalidation
- C. Add error pages to the /invalidate property of dispatcher.any to prevent from invalidation

Answer: B

NEW QUESTION # 34
A retail customer with an international presence and both in-store and online sales needs a new assets platform. The customer decides to use AEM assets. The customer's sites will continue to run on their proprietary CMS for websites.
The customer wants to be able to scale the platform for spikes in user traffic such as on local sales or online marketing campaigns. Under some circumstances, the customer also has a higher load of editors for a certain period of time.
Which architecture should an Architect use for this business case?

- A. An AEM as a Cloud Service Sites with Dynamic Media
- B. An AEM as a Cloud Service Assets setup using the combined CDN for delivery
- C. An AEM Assets setup on Adobe Managed Services with Cloud Manager
- D. An AEM Publish instance on Adobe Managed Services with auto scaling

Answer: B

Explanation:

"using AEM as a Cloud Service Assets setup using the combined CDN for delivery can provide scalability, performance, and security for asset delivery".

NEW QUESTION # 35

A client is modernizing some of their AEM sites to go from static to editable templates so they can use the latest features around has the following parameters:
* The client currently has a dozen static templates that they want to move to editable templates.
* The existing pages use the parsys paragraph system for storing components.
* Each page based on one of the static templates has its own custom properties tab that is unique for that template type.
* The client wants template authors to be able to create the editable templates.
Which approach should an Architect use to meet these requirements?

- A. 1. Use a new page component for editable templates based on the core components page component
  2. Migrate page properties to respective components dialogues
- B. 1. Use the same page components for editable templates
  2. Use a new template type for each static template
- C. 1. Use a new page component for editable templates based on the core components page component
  2. Convert page properties to policies
- D. 1. Use the same page components for editable templates
  2. Create a new editable template based on each of the existing page components

Answer: D

NEW QUESTION # 36

A news agency editor wants to publish news articles to an intermediate Publish (preview) instance for internal review before publishing the article to production Publish instance.
Which two steps should the Architect recommend? (Choose two.)

- A. Set up a new replication agent for preview server
- B. Create a separate live copy to preview content
- C. Create a custom publish workflow
- D. Create a closed user group (CUG) for editors
- E. Create a reverse replication agent on preview server

Answer: A,B

Explanation:
Create a separate live copy to preview content and set up a new replication agent for preview server1
. According to Adobe Experience Manager documentation4, a live copy is used to create a local copy of content from another site that can be modified independently. A replication agent is used to publish content from an author instance to a publish instance. Creating a reverse replication agent on preview server (B) is not necessary as reverse replication is not supported by AEM as a Cloud Service1. Creating a custom publish workflow (E) is also not necessary as workflows are handled by AEM Cloud Service automatically1.
