

# C\_ACDET\_2506 높은 통과율 시험덤프자료 - C\_ACDET\_2506 유효한 최신버전덤프

참고: KoreaDumps에서 Google Drive로 공유하는 무료, 최신 C\_ACDET\_2506 시험 문제집이 있습니다:  
<https://drive.google.com/open?id=1Dcx44jCiqFrCmew2S8zJujzQ5gpn4>

SAP C\_ACDET\_2506 인증 시험은 전문적인 관련 지식을 테스트하는 인증 시험입니다. KoreaDumps는 여러분이 SAP C\_ACDET\_2506 인증 시험을 통과할 수 있도록 도와주는 사이트입니다. 여러분은 응시 전 저희의 문제와 답만 잘 파악한다면 빠른 시일 내에 많은 성과가 있을 것입니다.

## SAP C\_ACDET\_2506 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>
주제 2	<ul style="list-style-type: none"> <li>• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>

## C\_ACDET\_2506 유효한 최신버전 덤프 & C\_ACDET\_2506 시험패스보장덤프

KoreaDumps에서는 SAP 인증 C\_ACDET\_2506 시험 대비 덤프를 발췌하여 제공해드립니다. SAP 인증 C\_ACDET\_2506

시험대비덤프에는 시험문제의 모든 예상문제와 시험유형이 포함되어있어 시험준비자료로서 가장 좋은 선택입니다. KoreaDumps에서 제공해드리는 전면적인SAP 인증C\_ACDET\_2506시험대비덤프로SAP 인증C\_ACDET\_2506시험준비공부를 해보세요. 통과율이 100%입니다.

## 최신 SAP Certified Associate C\_ACDET\_2506 무료샘플문제 (Q17-Q22):

### 질문 # 17

If you add a custom field to the ContractWorkspace class, which other class(es) will that field be added to?

- A. AbstractContractWorkspace
- **B. InternalContractWorkspace and SalesContractWorkspace**
- C. SalesContractRequest and InternalContractRequest
- D. ContractRequest

정답: B

#### 설명:

TheContractWorkspace class is a parent class to both InternalContractWorkspace and SalesContractWorkspaceclasses in SAP Ariba. When a custom field is added to ContractWorkspace, it automatically inherits down to both these subclasses, making the field available in both internal and sales contract workspace types. It does not propagate upward to AbstractContractWorkspace or into contract request classes. This inheritance model is part ofSAP Ariba's class hierarchy to ensure consistent data structures across related contract objects.

### 질문 # 18

How can you set the order of your custom Contract Workspace fields? (Select 2 correct answers)

- A. Fields are presented in alphabetical order of the field label.
- **B. Select Field Configuration, find the class, and select the Layout tab. Drag and drop the order of the fields, then publish.**
- C. Navigate to the UI where the class is presented, select Customize in the banner, edit, and drag and drop fields, then publish.
- **D. Select Field Configuration and under the Advanced tab set the Sequence property, then publish.**

정답: B,D

#### 설명:

Custom Contract Workspace field order can be controlled through two methods:

\* Using the Layout tab in Field Configuration,where fields can be dragged and dropped to reorder them visually, followed by publishing the changes.

\* Using the Sequence property under the Advanced tab,assigning numeric values that define the sort order, with lower numbers appearing first.Option B is incorrect because UI banner customization does not manage field order in Contract Workspace screens. Option C is incorrect; field order is controlled by explicit settings, not alphabetical label order.

### 질문 # 19

Which of the following languages is used to define defaults on fields within SAP Ariba?

- A. ABAP
- **B. Ariba expression language**
- C. Python
- D. JavaScript

정답: B

#### 설명:

SAP Ariba uses its proprietaryAriba expression language, based on OGNL (Object-Graph Navigation Language), to define default value expressions on fields. This language supports logical conditions, comparisons, and public Java method calls to create dynamic defaulting logic. ABAP, Python, and JavaScript are not supported languages for field default expressions in SAP Ariba. This expression language provides a concise and powerful way to tailor defaults based on context.

### 질문 # 20

While working on editing a field for a customer, you notice that "Editable in full Contract Amendment" is not an option available in the advanced tab of field configuration. What is likely the cause for this behavior?  
(Select 2 correct answers)

- A. The field you are customizing is standard and therefore cannot be changed.
- B. The contract must be in an amendment state for this option to be visible in customizing.
- C. A customization is in flight and needs to be cleared and reset prior to making this change.
- D. The field you are customizing is not in the contract workspace or request classes.

정답: B,D

설명:

The "Editable in full Contract Amendment" option in SAP Ariba is available only when the contract is in an amendment status, meaning this option appears contextually when the contract supports amendment workflows. If the contract is not in amendment state, the option remains hidden (A).

Additionally, this option is only relevant for fields that belong to the Contract Workspace or Request field classes; fields outside these classes will not show amendment-specific editability options (C).

The presence or absence of this option is not related to ongoing customizations needing reset (B), nor is it restricted solely to custom or standard fields (D), as standard fields can also have this option if class-applicable.

### 질문 # 21

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Setup
- B. Realize
- C. Deploy
- D. Configure

정답: B

### 질문 # 22
