Exam C-SEC-2405 Cram | Reliable C-SEC-2405 Source

There are different versions of our C-SEC-2405 learning materials: PDF version, Soft version and APP version. Whether you like to study on the computer or like to read paper materials, our C-SEC-2405 learning materials can meet your needs. If you are used to reading paper study materials for most of the time, you can eliminate your concerns. Our C-SEC-2405 Exam Quiz takes full account of customers' needs in this area. Because our versions of the C-SEC-2405 learning material is available for customers to study, so that your free time is fully utilized, and you can often consolidate your knowledge.

SAP C-SEC-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	• Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.
Topic 2	• User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
Topic 3	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.
Topic 4	• Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
Topic 5	• Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.

2026 Realistic SAP Exam C-SEC-2405 Cram

Our company is professional brand established for compiling C-SEC-2405 exam materials for candidates, and we aim to help you to pass the examination as well as getting the related certification in a more efficient and easier way. Owing to the superior quality and reasonable price of our C-SEC-2405 Exam Materials, our company has become a top-notch one in the international market. Our C-SEC-2405 exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in the following respects.

SAP Certified Associate - Security Administrator Sample Questions (Q52-Q57):

NEW QUESTION # 52
In the administration console of the Cloud Identity Services, which system property types can you add? Note:
There are 2 correct answers to this question.

- A. Default
- B. Credential
- C. Internal
- D. Standard

Answer: C,D

NEW QUESTION # 53
Which cloud-based SAP solution helps organizations control their data across various cloud platforms and on- premise data sources?

- A. SAP Identity Access Governance
- B. SAP Privacy Governance
- C. SAP Information Steward
- D. SAP Data Custodian

Answer: D

Explanation:
SAP Data Custodian is the cloud-based SAP solution designed to help organizations control their data across various cloud platforms and on-premise data sources. It provides a centralized framework for data governance, enabling organizations to monitor, manage, and secure data throughout its lifecycle, regardless of where it resides. SAP Data Custodian ensures compliance with data protection regulations by offering tools for data discovery, classification, and access control, making it ideal for hybrid environments. In contrast, SAP Identity Access Governance focuses on managing user access and permissions, SAP Information Steward is used for data quality and profiling, and SAP Privacy Governance addresses privacy compliance.
SAP Data Custodian's unique capability to unify data control across diverse platforms makes it the correct choice for comprehensive data management and security.

NEW QUESTION # 54
Which of the following user types are excluded from some general password-related rules, such as password validity or initial password? Note: There are 2 correct answers to this question.

- A. Communication
- B. System
- C. Dialog
- D. Service

Answer: B,D

Explanation:

In SAP S/4HANA, Service and System user types are excluded from some general password-related rules, such as password validity periods or initial password requirements. Service Users, often used for web-based access or anonymous logons, do not require frequent password changes or initial password setups, as their access is typically managed via certificates or system configurations, reducing administrative overhead.

System Users, designed for background processes like batch jobs, also bypass these rules, as they are not intended for human interaction and often use system-generated or fixed credentials for automated tasks.

Dialog Users, used for interactive human access, are subject to strict password policies, including validity and initial password requirements, to ensure security. Communication Users, used for machine-to-machine interactions, may have specific authentication mechanisms but are generally subject to password policies unless otherwise configured. Excluding Service and System Users from these rules supports operational efficiency while maintaining security, as their non-interactive nature reduces the need for frequent password management.

NEW QUESTION # 55

Which of the following allow you to control the assignment of table authorization groups? Note: There are 2 correct answers to this question.

- A. V_DDAT_54
- B. PRGN_CUST
- C. V_BRG_54
- D. SSM_CUST

Answer: A,C

Explanation:
In SAP systems, table authorization groups are controlled using views V_DDAT_54 and V_BRG_54.
V_DDAT_54 is a maintenance view that allows administrators to assign tables to authorization groups, defining which groups protect specific tables and ensuring that access is restricted to authorized users.
V_BRG_54 is another view used to manage table authorization groups, particularly for assigning and maintaining group definitions that link to authorization objects like S_TABU_DIS. These views enable granular control over table access, supporting data security and compliance. PRGN_CUST is a customizing table for role and authorization settings, not specifically for table authorization groups, and SSM_CUST is related to system settings, not table access control. By using V_DDAT_54 and V_BRG_54, SAP provides a structured approach to managing table authorizations, ensuring that sensitive data in tables is protected against unauthorized access while allowing efficient administration of access controls.

NEW QUESTION # 56

If you want to evaluate catalog menu entries and authorization default values of IWSG and IWSV applications, which SUIM reports would you use? Note: There are 2 correct answers to this question.

- A. Search Applications in Roles
- B. Roles By Authorization Object
- C. Search Startable Applications in Roles
- D. Roles By Transaction Assignment in Menu

Answer: A,C

Explanation:
To evaluate catalog menu entries and authorization default values for IWSG and IWSV applications, use the following SUIM reports:
* Search Startable Applications in Roles (A):
* Lists applications that can be started within a role, aiding in evaluating role scope.
* Search Applications in Roles (B):
* Provides insights into which applications are available in specific roles, helping ensure proper authorization configuration.
SAP Security References:
* SAP Documentation: SUIM Reports Overview
* SAP Help Portal: Role and Authorization Management in SUIM

NEW QUESTION # 57

......

With the rapid development of the world economy and frequent contacts between different countries, the talent competition is increasing day by day, and the employment pressure is also increasing day by day.
