CTFL-UT Demo Test offer you accurate Test Result to pass ISQI ISTQB Certified Tester-Foundation Level - Usability Testing exam

Our CTFL-UT training guide is not difficult for you. We have simplified all difficult knowledge. So you will enjoy learning our CTFL-

ISQI ISTQB Certified Tester-Foundation Level - Usability Testing Sample Questions (Q34-Q39):

NEW QUESTION # 34
You're asked to evaluate the direct interaction between ordinary users and the software product. Which kinds of evaluations would be suited for that?

- A. Usability maturity assessment
- B. Accessibility evaluation
- C. Usability evaluation
- D. Risk assessment

Answer: C

Explanation:
A usability evaluation is specifically designed to assess how real users interact with a software product. It focuses on effectiveness, efficiency, and user satisfaction in completing tasks. This may involve usability testing, expert reviews, or heuristic evaluations. The goal is to identify any usability problems and understand user behavior during real use.
Option A (Accessibility evaluation) targets inclusivity for users with disabilities, not general user interaction.
Option B (Usability maturity assessment) evaluates the organization's usability practices, and Option C (Risk assessment) evaluates potential project or system risks. Only option D directly involves observing and measuring user interaction.

##

NEW QUESTION # 35
Which of the following are advantages of using a usability lab?
i. The context is natural
ii. Test sessions are easy to observe
iii. Inexpensive setup
iv. Similar conditions for all sessions
v. Easy recording of sessions

- A. ii & iv are true, i, iii & v are false
- B. ii, iv & v are true, i & iii are false
- C. i, ii & v are true, iii & iv are false
- D. iii, iv & v are true, i & ii are false

Answer: B

Explanation:
Usability labs provide a controlled environment that offers several advantages for observing and recording usability test sessions. Specifically, they allow for easy observation of participants (ii), standardized conditions for each session (iv), and facilitate audio and video recording for detailed analysis (v). However, the context is not natural (i), because the lab is an artificial setting rather than the user's actual environment.
Also, setting up a professional usability lab is not inexpensive (iii); it typically involves significant costs for equipment, space, and staffing. Therefore, options ii, iv, and v are true, while i and iii are false.

##

NEW QUESTION # 36

Which of the following statements about usability test scripts is wrong?

- A. It contains answers to the test questions.
- B. It contains pre-session interview questions.
- C. It contains post-session interview questions.
- D. It is a checklist used by the moderator of a usability test.

Answer: A

Explanation:

A usability test script is a structured document used by the moderator to ensure consistency across test sessions. It typically includes pre-session briefing text, pre- and post-session interview questions, and the specific usability tasks to be performed. However, it does not include answers to the test questions, as usability tests focus on observing user behavior and performance-not testing users' knowledge. Providing answers would bias results and invalidate findings. Thus, option D is incorrect and the best choice.

Usability.gov: Creating a Test Script
Nielsen Norman Group: Usability Testing Tools and Documentation
ISO 25062 - Guidelines for Usability Reporting
###

NEW QUESTION # 37

A "usability requirement" is:

- A. A requirement needed to define the size of a mobile phone used in a usability test
- B. A requirement how to conduct a usability test
- C. A requirement needed for a usability tester
- D. A requirement on the usability of a component or system

Answer: D

Explanation:

A usability requirement specifies how usable a product or component must be, often in terms of effectiveness, efficiency, and user satisfaction, as defined in ISO 9241-11. These requirements ensure that the product meets specific human-centered design goals, such as allowing users to complete tasks accurately and quickly.
Options A and C describe procedural or test setup elements, not actual usability requirements. Option B refers to personnel qualifications, which are not the same as usability requirements related to system behavior or performance.
References:
ISO 9241-11:2018 - Usability: Definitions and Concepts
ISO/IEC 25010:2011 - Product Quality Model (Usability as a quality characteristic) Usability.gov: Defining Usability Requirements
###

NEW QUESTION # 38

What does the Equality Act address?

- A. It obligates organizations to make sites accessible at all costs
- B. It states that websites have to adhere to the WCAG conformity level AA
- C. It protects people from discrimination in the workplace and in wider society
- D. It states that websites have to adhere to the WCAG conformity level A

Answer: C

Explanation:

The Equality Act 2010 (UK) is legislation designed to protect individuals from discrimination in various areas, including employment and access to goods and services-this includes digital products like websites.
While it does not directly mandate WCAG compliance levels (A or AA), it implies that digital services must be accessible to users with disabilities. Organizations are required to make "reasonable adjustments" to avoid discrimination. Therefore, the most accurate and comprehensive answer is B.
