Free PDF Quiz 2026 1z0-071: Oracle Database SQL – The Best Test Guide Online

The content of 1z0-071 exam torrent is compiled by hundreds of industry experts based on the syllabus and the changing trend of industry theory. With 1z0-071 exam torrent, you no longer have to look at textbooks that make you want to sleep. You just need to do exercises to master all the important knowledge. At the same time, 1z0-071 prep torrent help you memorize knowledge points by correcting the wrong questions, which help you memorize more solidly than the way you read the book directly.

Oracle 1z0-071 Certification Exam is a rigorous test that requires candidates to prepare thoroughly. Oracle offers a range of resources to help candidates prepare for the exam, including training courses, study guides, and practice exams. Candidates are also encouraged to gain hands-on experience with Oracle databases to fully understand the concepts covered in the exam.

Oracle Database SQL Sample Questions (Q125-Q130):

NEW QUESTION # 125

View the Exhibit and examine the details of the PRODUCT_INFORMATION table.

You have the requirement to display PRODUCT_NAME and LIST_PRICE from the table where the CATEGORYID column has values 12 or 13, and the SUPPLIER_ID column has the value 102088. You executed the following SQL statement:

```
SELECT product_name, list_price  
FROM product_information
```

WHERE (category_id = 12 AND category_id = 13) AND supplier_id = 102088; Which statement is true regarding the execution of the query?

- A. It would not execute because the entire WHERE clause is not enclosed within parentheses.
- B. It would not execute because the same column has been used twice with the AND logical operator.
- **C. It would execute but would return no rows.**
- D. It would execute and return the desired.

Answer: C

NEW QUESTION # 126

A session's NLS_DATE_FORMAT is set to DD Mon YYYY .
Which two queries return the value 1 Jan 2019?

- **A. SELECT DATE '2019-01-01' FROM DUAL ;**
- B. SELECT '2019-01-01' FROM DUAL ; 2019-01-01
- C. SELECT TO_DATE('2019-01-01') FROM DUAL;
- D. SELECT TO_CHAR('2019-01-01') FROM DUAL; 2019-01-01
- E. SELECT to_date(' 2019-01-01 ', 'YYYY-MM-DD') FROM DUAL;

Answer: A

Explanation:

When the NLS_DATE_FORMAT is set to DD Mon YYYY, the database expects the date string to be in the format of day, abbreviated month name, and full year.

B). The query SELECT DATE '2019-01-01' FROM DUAL; correctly returns the value 1 Jan 2019 because the ANSI date literal DATE 'YYYY-MM-DD' is independent of the NLS_DATE_FORMAT parameter.

Option A is incorrect because the TO_DATE function requires the format model to match the string literal, which it does not in this case.

Option C is incorrect because TO_CHAR is used to convert a date to a string, not a string to a date.

Option D is incorrect because without specifying that the string is a date, the result is just a string and not a date value.

Option E is incorrect because TO_DATE without a format model relies on the NLS_DATE_FORMAT to interpret the string, and YYYY-MM-DD does not match DD Mon YYYY.

NEW QUESTION # 127

Examine the structure of the EMPLOYEEStable.

There is a parent/child relationship between EMPLOYEE_ID and MANAGER_ID.

You want to display the last names and manager IDs of employees who work for the same manager as the employee whose EMPLOYEE_ID is 123.

Which query provides the correct output?

- A. SELECT e.last_name, m.manager_id
FROM employees e RIGHT OUTER JOIN employees m
on (e.manager_id = m.employee_id)
AND e.employee_id = 123;
- B. SELECT e.last_name, m.manager_id
FROM employees e LEFT OUTER JOIN employees m
on (e.employee_id = m.manager_id)
WHERE e.employee_id = 123;
- **C. SELECT m.last_name, e.manager_id
FROM employees e LEFT OUTER JOIN employees m
on (e.manager_id = m.manager_id)
WHERE e.employee_id = 123;**
- D. SELECT e.last_name, e.manager_id
FROM employees e RIGHT OUTER JOIN employees m
on (e.employee_id = m.employee_id)
WHERE e.employee_id = 123;

Answer: C

NEW QUESTION # 128

Which two statements are true about substitution variables? (Choose two.)

- A. A substitution variable used to prompt for a column name must be enclosed in a single quotation marks
- B. A substitution variable prefixed with && prompts only once for a value in a session unless it is set to undefined in the session
- C. A substitution variable can be used with any clause in a SELECT statement
- D. A substitution variable prefixed with & always prompts only once for a value in a session
- E. A substitution variable can be used only in a SELECT statement
- F. A substitution variable used to prompt for a column name must be enclosed in double quotation marks

Answer: A,D

NEW QUESTION # 129

In which three situations does a new transaction always start?

- A. when issuing a CREATE TABLE statement after a SELECT statement was issued in the same session
- B. when issuing a CREATE INDEX statement after a CREATE TABLE statement completed successfully in the same session
- C. when issuing a SELECT FOR UPDATE statement after a CREATE TABLE AS SELECT statement was issued in the same session
- D. when issuing a TRUNCATE statement after a SELECT statement was issued in the same session
- E. when issuing a DML statement after a DML statement failed in the same session
- F. when issuing the first Data Manipulation Language (DML) statement after a COMMIT or ROLLBACK statement was issued in the same session

Answer: C,E,F
