# Google Chrome-Enterprise-Administrator New Real Exam & Valid Chrome-Enterprise-Administrator Test Pdf

There may be some other study materials with higher profile and lower price than our products, but we can assure you that the passing rate of our Chrome-Enterprise-Administrator learning materials is much higher than theirs. And this is the most important. According to previous data, 98 % to 99 % of the people who use our Chrome-Enterprise-Administrator Training Questions passed the exam successfully. If you are willing to give us a trust on our Chrome-Enterprise-Administrator exam questions, we will give you a success.

## Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q32-Q37):

### NEW QUESTION # 32

An end user is returning from an extended leave of absence and finds their browser is no longer active. The administrator is not sure if the inactivity policy has been violated. What is the minimum action necessary to re-enroll this browser?

- A. Close and reopen Chrome
- B. Delete the browser from CEC and reopen Chrome
- C. Delete the device management token and reopen Chrome
- D. Verify the policy has been violated and then wipe the browser

**Answer: C**

Explanation:

If a browser becomes inactive due to policy, the device management token likely needs to be refreshed or re-established. Deleting the token and then reopening Chrome will typically trigger the browser to attempt re-enrollment and obtain a new token, bringing it back under management. Wiping the browser or deleting it from the CEC might be necessary in more severe cases but is not the minimum action. Simply closing and reopening Chrome might not be sufficient if the token has expired or been invalidated.

### NEW QUESTION # 33

A Chrome administrator's organization has recently introduced a new security compliance requirement that mandates all software, including web browsers, be updated within 48 hours of a security patch release. Which steps should the administrator take to ensure compliance with the new security requirement company-wide?

- A. Disable automatic updates and manually check all managed browsers for updates every 48 hours to comply with the new security requirements
- B. Implement a policy in the Google Admin console to force automatic updates and recommend Chrome relaunches to apply updates within the required timeframe
- C. Implement a policy in the Google Admin console to force automatic updates and ensure Chrome relaunches to apply updates within the required timeframe
- D. Rely on users to manually update their browsers within the required timeframe

**Answer: C**

Explanation:

To meet a strict 48-hour update requirement for security patches, the administrator must enforce automatic updates through the Google Admin console. Additionally, ensuring Chrome relaunches after updates are downloaded is crucial for applying the patches promptly. Recommending relaunches (option A) might not guarantee timely application. Relying on manual updates (option B) is unreliable and doesn't ensure compliance. Manually checking all browsers (option C) is not scalable or efficient for a company-wide deployment.

### NEW QUESTION # 34

The browser administrators at a company have configured the following extension policies:

Policy Name | Policy Value

----- | -----

ExtensionInstallAllowlist | [ "lpbdmiphcndhhacbfegbdmnoffaepiici",  
"gihagpmigkmdpbjkmolikibogeofcm", "enebfjnlbicamdncnfhlaapucdmkj",

```
"hhpkimhnadcdidjaejaegpeeiklohd", "bnp111beanipnjdckniakhniegbcobanno"] ] ExtensionInstallBlocklist | [ ]
ExtensionInstallForceList | [ "gihagpmigmndpbjkmolikibogeofcm;[https://clients2.google.com/service
/update2/crx](https://clients2.google.com/service/update2/crx)", "ufninibicajhgibfhjcgnimlmdhccodff;
[https://clients2.google.com/service/update2/crx](https://clients2.google.com/service/update2/crx)",
"hhpkimhnadcdidjaejaegpeeiklohd;[https://clients2.google.com/service/update2/crx](https://clients2.google
.com/service/update2/crx)" ]
```

An employee at the company wants to install an extension from the Chrome Web Store called "Grammar Friend" with the extension ID `ufninibicajhgibfhjcgnimlmdhccodff`. What will happen when the user goes to the Grammar Friend page in the Chrome Web Store?

- A. The "Remove from Chrome" button will be available because the extension is already installed.
- **B. A blue banner that says "This item's installation is required by your organization" will appear, and the "Remove from Chrome" button will be grayed out.**
- C. A red banner that says "Your administrator has blocked this item (ID ufninibicajhgibfhjcgnimlmdhccodff)" will appear, and the "Add to Chrome" button will be grayed out.
- D. The "Add to Chrome" button will be available to click, and the user can install the extension.

**Answer: B**

Explanation:

The extension ID `ufninibicajhgibfhjcgnimlmdhccodff` is present in the `ExtensionInstallForceList`.

Extensions in this list are automatically installed and cannot be removed by the user. Therefore, when the user visits the Chrome Web Store page for "Grammar Friend," they will see a blue banner indicating that the extension is required by their organization, and the "Remove from Chrome" button will be disabled. The "Add to Chrome" button will not be clickable in the standard way because it's already being force-installed.

#### NEW QUESTION # 35

A systems engineer recently cloud enrolled Chrome browsers, which were previously managed via group policy, and deployed a policy through Chrome Enterprise Core. However, the policy is not applying. After validating the policy via `chrome://policy`, the status shows a warning conflict. What is the best way to resolve this issue?

- A. Re-enroll the Chrome browser to reset the policy
- **B. Check and configure the precedence order**
- C. Adjust the policy merge list setting
- D. Restart the computer to apply the policy changes

**Answer: B**

Explanation:

A "warning conflict" in `chrome://policy` indicates that multiple policy sources are trying to control the same setting. Since the browsers were previously managed by Group Policy, there's likely a conflict between the cloud policy and the local Group Policy. The best way to resolve this is to **\*\*check and configure the precedence order\*\*** of policy sources. Ensure that Cloud Policy is set to have the desired precedence over Group Policy if that's the intention. Restarting the computer might apply existing policies but won't resolve the conflict in precedence. Adjusting a "policy merge list setting" is not a standard term for resolving this type of conflict. Re-enrolling might give a fresh start but doesn't address the underlying conflict in policy sources.

#### NEW QUESTION # 36

Users in the organization report that browsers force a restart after a new update has been downloaded, which interrupts their work day. What could an engineer do to improve the experience while maintaining security?

- A. Add a quiet period to the Relaunch notification
- B. Change Chrome browser updates to only occur when a user checks
- C. Set the auto update check policy to occur during core work hours
- **D. Create a relaunch window in Relaunch notification**

**Answer: D**

Explanation:

To minimize disruption while ensuring updates are applied, an engineer can configure a "Relaunch window" in the Relaunch

notification settings. This allows users to be prompted to restart within a specific timeframe that is less likely to interrupt their critical work hours, giving them more control over when the restart occurs after an update. Disabling automatic updates (option A) would compromise security. Adding a quiet period (option B) only suppresses notifications, not the forced restart. Setting the auto-update check policy to occur during core work hours (option C) affects when updates are downloaded, not when the restart occurs.

## NEW QUESTION # 37

.....

If you ask me why other site sell cheaper than your PracticeMaterial site, I just want to ask you whether you regard the quality of Chrome-Enterprise-Administrator exam bootcamp PDF as the most important or not. Sometime I even don't want to explain too much. Sometime low-price site sell old version but we sell new updated version. If you want to get the old version of Chrome-Enterprise-Administrator Exam Bootcamp PDF as practice materials, you purchase our new version we can send you old version free of charge, if this Google Chrome-Enterprise-Administrator exam has old version.
