ISQI ISTQB Certified Tester - Foundation Level Extension - Agile Tester Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which of the following is NOT a statement of value from the Agile Manifesto?

- A. Processes and tools over individuals and interactions.
- B. Working software over comprehensive documentation
- C. Responding to change over following a plan.
- D. Customer collaboration over contract negotiation.

Answer: A

Explanation:

The Agile Manifesto is a declaration of four values and twelve principles that guide the Agile software development approach¹². The four values of the Agile Manifesto are¹²:

- * Individuals and interactions over processes and tools
- * Working software over comprehensive documentation
- * Customer collaboration over contract negotiation
- * Responding to change over following a plan

These values emphasize the importance of human collaboration, working product, customer feedback, and adaptability over rigid processes, extensive documentation, fixed contracts, and predefined plans. The values do not imply that the items on the right are not important, but rather that the items on the left are more important and should be prioritized.

Therefore, the statement that is NOT a value from the Agile Manifesto is B, as it contradicts the first value of the Agile Manifesto.

The correct statement should be "Individuals and interactions over processes and tools". References: ISTQB Foundation Level Agile Tester Extension Syllabus¹, page 10; ISTQB Agile Tester Sample Exam², question 1.

NEW QUESTION # 38

You have been asked to execute an exploratory testing session on Park & Ride system. The test charter has been titled as "Buy a bus ticket". As a result, a number of defects were reported, the titles of which are listed below.

Which defect is out of scope for the given test charter?

- A. Failed to buy a bus ticket after 18:00.
- B. **Payment for parking ticket is restricted to cash only (no credit card supported).**
- C. Price for a bus ticket was calculated incorrectly.
- D. Failed to buy a bus ticket when the network connection to the Central System is down.

Answer: B

Explanation:

Explanation

The test charter for the exploratory testing session is focused on buying a bus ticket, not a parking ticket.

Therefore, any defect related to the payment for parking ticket is out of scope for the given test charter. The other defects are related to the functionality, usability, or reliability of buying a bus ticket, which are in scope for the test charter. NEW QUESTION # 39

Which of the following is NOT a typical task performed by the tester within an Agile team?

- A. Ensuring the appropriate testing tasks are scheduled during iteration planning.
- B. Suggesting improvements in team retrospectives.
- C. **Ensuring all project status meetings are held according to the plan.**
- D. Working with business stakeholders to clarify requirements.

Answer: C

Explanation:

The tester within an Agile team is not responsible for ensuring all project status meetings are held according to the plan. This is typically a task for the Scrum Master, who facilitates the meetings and ensures that the team follows the Agile principles and practices. The tester within an Agile team is responsible for ensuring the appropriate testing tasks are scheduled during iteration planning, suggesting improvements in team retrospectives, and working with business stakeholders to clarify requirements. These are all tasks that contribute to the quality of the software and the testing process, as well as the collaboration and communication within the team and with the customers. References: ISTQB Foundation Level Agile Tester Syllabus, Section 2.3.1, page 171; ISTQB Foundation Level Agile Tester Sample Exam Questions, Question 2.3.1-1, page 82

NEW QUESTION # 40

Which agile development approach incorporates the following practices:

- * a project is divided into iterations called sprints
- * each sprint results in a potentially releasable/shippable product?

- A. Extreme Programming
- **B. Scrum**
- C. Kanban
- D. Continuous Integration

Answer: B

Explanation:

Explanation

Scrum is an agile development approach that incorporates the following practices:

a project is divided into iterations called sprints, which are typically 2-4 weeks long each sprint starts with a planning meeting, where the team selects a subset of user stories from the product backlog to work on each sprint ends with a review meeting, where the team demonstrates the potentially releasable/shippable product increment to the stakeholders and collects feedback each sprint also includes a retrospective meeting, where the team reflects on the process and identifies areas for improvement

NEW QUESTION # 41

Consider the following acceptance criterion associated to a user story:

"A maximum of 0.0002 failures per hour in the specified operational conditions over at least ten days of testing must be achieved."

Which of the following aspects of testability is best described in this acceptance criterion?

- A. Functional behavior
- B. External interfaces
- C. Scenarios
- **D. Quality characteristics**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From CTFL-AT Syllabus v4.0, Section 2.1 Acceptance Criteria and Testability, and Section 3.1:

"Acceptance criteria may also address non-functional quality characteristics such as reliability, performance, and usability." The criterion references failure rate over time, which is a reliability attribute, making Option D (Quality characteristics) the correct answer.

* Option A(Scenarios) refers to usage paths.

* Option Brefers to functional correctness.

* Option Crefers to interface interaction points.
