

Pass Guaranteed 2026 Marvelous VMware Valid 2V0-17.25 Exam Sims

P.S. Free 2026 VMware 2V0-17.25 dumps are available on Google Drive shared by Exam4Free: https://drive.google.com/open?id=1ZCuhnhQu6NDxil tmxSd_ WgEq-vv1pmp

Hundreds of applicants who register themselves for the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) certification exam, lack updated practice test questions to prepare successfully in a short time. As a result of which, they don't crack the VMware Cloud Foundation 9.0 Administrator (2V0-17.25) examination which causes a loss of time and money and sometimes loss of the encouragement to take the test for the second time. Exam4Free can save you from facing these issues with its real VMware 2V0-17.25 Exam Questions.

VMware 2V0-17.25 Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments. |
| Topic 2 | <ul style="list-style-type: none"> VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment. |
| Topic 3 | <ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies. |

| | |
|---------|---|
| Topic 4 | <ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation. |

Pass Guaranteed Quiz 2026 2V0-17.25: VMware Cloud Foundation 9.0 Administrator Newest Valid Exam Sims

Passing the 2V0-17.25 exam in the shortest time is the voice of all the examinees. But how to select the most valuable information in overwhelming learning materials is a headache thing for all examiners. After our unremitting efforts, our 2V0-17.25 learning guide comes in everybody's expectation. Our professional experts not only have simplified the content and grasp the key points for our customers, but also recompiled the 2V0-17.25 Preparation materials into simple language, you will get a leisure study experience as well as a doomed success on your coming 2V0-17.25 exam.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q96-Q101):

NEW QUESTION # 96

An administrator has been tasked with deploying a new instance of VMware Cloud Foundation (VCF) in a dark site. How should the administrator download VCF binaries prior to starting the installation?

- A. Use Broadcom Downloads
- B. Use SDDC Manager
- **C. Use the VCF Download Tool**
- D. Use the VCF Installer

Answer: C

Explanation:

For dark site (air-gapped) deployments, VMware Cloud Foundation requires the use of the VCF Download Tool to retrieve the required software bundles from a connected system before transferring them into the isolated environment.

The VCF 9.0 Installation Guide specifies:

"For deployments in disconnected or air-gapped environments, use the VCF Download Tool on a connected system to download required bundles and then transfer them to the target environment." The VCF Installer (A) consumes bundles but does not download them

SDDC Manager (B) can download bundles only in connected mode.

Broadcom Downloads (D) is the source portal, but not the supported workflow tool for preparing offline repositories.

Therefore, the correct method for dark site deployments is to use the VCF Download Tool.

NEW QUESTION # 97

An administrator is responsible for managing a VMware Cloud Foundation (VCF) fleet. The administrator has been tasked with creating a solution that allows Kubernetes development teams to complete the self-service creation of Active Directory (AD) accounts with the following requirements:

- Only users within the Development tenant should be able to create user accounts.
- Users must be able to create and destroy user accounts in the development AD only.
- The administrator has already deployed a dedicated VCF Operations

Orchestrator for the Development tenant.

What four additional tasks must the administrator complete to meet the stated objective? (Choose four.)

- A. Configure the VCF Operations Orchestrator Active Directory plugin to connect to the production Active Directory.
- B. Configure the VCF Operations Orchestrator integration to utilize the embedded VCF Operations Orchestrator.
- **C. Create a Custom Resource object and select the appropriate VCF Operations Orchestrator workflows for object creation and destruction.**
- **D. Publish the Active Directory User creation workflow to the self-service catalog in VCF Automation through the Content Hub.**
- **E. Configure the VCF Operations Orchestrator integration to connect to the dedicated VCF Operations Orchestrator.**
- F. Publish the Active Directory User creation action to the self-service catalog in VCF Automation through the Content Hub.
- **G. Configure the VCF Operations Orchestrator Active Directory plugin to connect to the development Active Directory.**

Answer: C,D,E,G

Explanation:

Orchestrator Integration (B): The tenant must be connected to the dedicated Orchestrator instance rather than the embedded one.

Documentation notes: "Each tenant can integrate with its own Orchestrator endpoint for workflow execution." AD Plugin

Configuration (E): The Orchestrator Active Directory plugin must be configured against the development AD only, ensuring that the development team does not impact the production directory.

Publish Workflow (C): The AD user creation workflow must be published to the VCF Automation catalog using the Content Hub.

Actions alone are insufficient; workflows are the full automation logic exposed to end users.

Custom Resource Object (F): To enable developers to create and destroy AD accounts, a Custom Resource object must be created in VCF Automation and mapped to the Orchestrator workflows. This provides lifecycle capabilities (create/destroy) in the self-service catalog.

NEW QUESTION # 98

An administrator is troubleshooting a high CPU usage issue in a VMware Cloud Foundation environment running IaaS Control Plane. Several namespaces are reporting degraded performance.

What two steps should the administrator take to diagnose and potentially resolve the issue? (Choose two.)

- A. Upgrade the vSphere version to the latest release.
- **B. Review the CPU usage of the ESXi hosts to identify any that are overcommitted.**
- C. Reboot the supervisor cluster to clear any temporary issues.
- D. Reconfigure the DRS settings to be more aggressive in load balancing.
- **E. Check the resource limits and reservations set on the Kubernetes namespaces.**

Answer: B,E

Explanation:

The administrator should review the CPU usage of the ESXi hosts to identify if any hosts are overcommitted. Overcommitted hosts can lead to performance degradation across workloads.

Checking the resource limits and reservations on Kubernetes namespaces is crucial. If the resource limits are too low or improperly configured, it could cause degraded performance for workloads running in those namespaces.

NEW QUESTION # 99

What is the required update interval for VMware Cloud Foundation (VCF) licenses in connected mode to maintain the entitlement?

- A. 365 days
- B. 90 days
- **C. 180 days**
- D. 270 days

Answer: C

Explanation:

You must update your licenses at least once every 6 months (180 days). If license usage data is not submitted... your licenses are treated as expired, your hosts are disconnected from the vCenter instance, and you cannot start any workload operations.

This language is repeated in the Licensing Overview and Upgrade/Registration sections, confirming the 180-day requirement applies

to both connected and disconnected modes (in connected mode usage submission is automated, but you still must perform an update action).

NEW QUESTION # 100

An administrator is tasked to converge an existing VMware vSphere environment to VMware Cloud Foundation (VCF). The following information has been provided to the administrator for this task:

- * Three VMware vCenters in Enhanced Linked Mode.
- * Five vSphere clusters per vCenter.
- * Lifecycle Manager configured with baselines and images.
- * Each VMware ESX host has 10 Gbps uplinks.
- * All ESX hosts are configured with LACP.
- * All clusters within a vCenter share a single vSphere Distributed Switch.

Which two configurations need to be changed before the environment is converged? (Choose two.)

- **A. Enhanced Linked Mode needs to be deactivated.**
- B. All ESX hosts must have a minimum of 25 Gbps uplinks.
- **C. Lifecycle Manager needs to be configured with Images only.**
- D. Create a vSphere Standard Switch per host.
- E. Add an additional VMkernel interface per host for vMotion traffic.

Answer: A,C

Explanation:

The VCF 9.0 Convergence and Migration Guide outlines prerequisites and unsupported configurations when moving from a standalone vSphere deployment into VCF-managed workload domains.

* Enhanced Linked Mode (ELM) must be removed : VCF does not support multiple vCenters joined in Enhanced Linked Mode. Each workload domain has its own dedicated vCenter instance, managed by SDDC Manager. The documentation states: "Before convergence, Enhanced Linked Mode must be deactivated. VCF requires independent vCenters for each workload domain."

* Lifecycle Manager must use Images only : VCF lifecycle operations are exclusively image-based.

Baselines are not supported. "All clusters managed by VCF must be converted to vSphere Lifecycle Manager image-based lifecycle management prior to convergence." Other options are not required:

* 25 Gbps uplinks (A) are recommended for high throughput but not mandatory; 10 Gbps uplinks are supported.

* An additional vMotion VMkernel (C) is not required by default, as standard vMotion networking is included in convergence designs.

* vSphere Standard Switches (D) are not supported; VCF requires Distributed Switches, and existing vDS configurations can be adapted.

Therefore, the two configurations that must change are: Deactivate Enhanced Linked Mode (B) and switch Lifecycle Manager to Images only (E) .

References: VMware Cloud Foundation 9.0 Convergence and Migration Guide - Unsupported Configurations (ELM), Lifecycle Manager Requirements (Images only).

NEW QUESTION # 101

.....

We have three versions of 2V0-17.25 learning materials available, including PDF, Software and APP online. The most popular one is PDF version of 2V0-17.25 study guide can be printed into papers so that you are able to write some notes or highlight the emphasis. On the other hand, Software version of our 2V0-17.25 Practice Questions is also welcomed by customers, especially for windows users. As for PPT online version, as long as you download the app into your computer. You can enjoy the nice service from us.
