

Superb SPLK-3002 Exam Materials: Splunk IT Service Intelligence Certified Admin Donate You the Most Popular Training Dumps - Itexamguide

Learn SPLK-3002 Splunk IT Service Intelligence Certified Admin Practice Course

Latest Unique, Updated Real Exam Questions & Answers with 100% Guaranteed Success.

Please visit the product link - <https://www.educationry.com/?product=pass-splk-3002-splunk-it-service-intelligence-certified-admin-certification-exam-educationry>

We provide our clients with the best practice exams that are prepared by our professional and experienced authors. Our exam dumps are always up to date, which ensures you get the latest and most updated questions. Our exam dumps are provided in PDF format, which means that it is easy for you to download them and start using them immediately.

We offer our clients with real exam questions, so that they can get a clear idea about how their preparation will go in this particular subject. Our team of experts always try to keep their clients updated about the latest changes in the exam syllabus so that they can make sure their students are equipped with all the required skills before taking up their examinations. We also offer free updates on the latest version of our product after each release.

We have been able to establish ourselves as one of the leading companies in this industry because we have always offered quality service to all our clients.

Exam Dumps is a reliable and trustworthy website that provides the best exam dumps for the certification exams.

The exam dumps provided by Exam Dumps are verified by our experts who are working in various companies. They have collected the real questions from various IT companies and organizations. In this way, they can guarantee that your success rate will be 100 percent if you use our exam dump.

Our IT Certification exams are the best way to prepare for your certification. We are one of the most trusted names in the world of IT certification. Our full-length practice tests provide a realistic testing experience that mimics what you can expect when you sit for the actual certification exam.

In addition to our full-length practice tests, we have an extensive collection of free practice exam questions that cover all areas of the exam. You can download these practice exams as PDFs or as an online collection of PDFs that you can access 24/7 from any computer or mobile device.

We have been providing the best Real Exam dumps for the exam with 100 percent guaranteed success. Our products are highly recommended by our clients and they have been successfully used by them in the exam. You can easily become a successful candidate through the use of our products.

We are also offering you a 100% pass guarantee on all our products.

Our team has been working on developing various types of Real Exam preparation materials which are useful for all kinds of aspirants and professionals who want to get success in their exams.

2026 Latest Itexamguide SPLK-3002 PDF Dumps and SPLK-3002 Exam Engine Free Share: <https://drive.google.com/open?id=1O7ZzH6-mjF68V2Z1RAs70ZnPEsSvKiXw>

We are dedicated to providing an updated SPLK-3002 practice test material with these three formats: PDF, Web-Based practice exam, and Desktop practice test software. With our SPLK-3002 practice exam (desktop and web-based), you can evaluate and enhance your knowledge essential to crack the test. This step is critical to the success of your Splunk SPLK-3002 Exam Preparation, as these practice tests help you identify your strengths and weaknesses.

Splunk SPLK-3002 certification exam is designed to validate the skills and knowledge of IT professionals in managing and administering Splunk IT Service Intelligence (ITSI) environments. Splunk IT Service Intelligence Certified Admin certification is intended for individuals who have a good understanding of Splunk, ITSI, and the use of data analytics to deliver business value. SPLK-3002 exam is aimed at professionals who work with data analytics, IT operations, and business stakeholders to improve service delivery and customer satisfaction.

Splunk SPLK-3002 exam covers a range of topics related to Splunk ITSI, including data onboarding, data processing, creating and configuring service models, configuring KPIs, defining notable events, creating and managing glass tables, and using ITSI to troubleshoot IT issues. SPLK-3002 exam is designed to test the knowledge and skills needed to use Splunk ITSI to monitor and analyze IT services, as well as the ability to troubleshoot and resolve IT issues using ITSI. SPLK-3002 Exam also covers best practices for deploying and managing Splunk ITSI in production environments.

Splunk SPLK-3002 is a certification exam designed for IT professionals who want to demonstrate their expertise in managing Splunk IT Service Intelligence (ITSI) deployments. SPLK-3002 exam tests the candidates' proficiency in deploying, configuring,

and administering ITSI to monitor and analyze IT data for efficient service delivery. The Splunk ITSI Certified Admin certification validates the candidate's ability to use ITSI to collect, correlate, and analyze data from multiple sources to improve the performance and availability of critical IT services.

SPLK-3002 braindumps pdf, Splunk SPLK-3002 exam cram

If you are overwhelmed with the job at hand, and struggle to figure out how to prioritize your efforts, these would be the basic problem of low efficiency and production. You will never doubt anymore with our SPLK-3002 test prep. With our SPLK-3002 exam questions, you will not only get the SPLK-3002 Certification quickly, but also you can get the best and helpful knowledge. And that when you make a payment for our SPLK-3002 quiz torrent, you will possess this product in 5-10 minutes and enjoy the pleasure and satisfaction of your study time.

Splunk IT Service Intelligence Certified Admin Sample Questions (Q90-Q95):

NEW QUESTION # 90

Which of the following are characteristics of ITSI service dependencies? (select all that apply)

- A. Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score.
- B. It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service.
- C. If a primary service has a dependent service KPI and the KPI's importance level is changed, the dependency is broken.
- D. Impactful dependent services should only be configured to one primary service to avoid false negatives in Multi KPI Alerts.

Answer: A,B

Explanation:

In the context of Splunk IT Service Intelligence (ITSI), service dependencies allow for the modeling of relationships between services, where the health of one service (dependent) can affect the health of another (primary).

B) It is best practice to use the dependent service's built-in 'ServiceHealthScore' KPI to reflect impact to the primary service: Utilizing the 'ServiceHealthScore' KPI of a dependent service as part of the primary service's health calculation is a recommended practice. This approach ensures that changes in the health of the dependent service directly influence the primary service's overall health score, providing a more holistic view of service health within the IT environment.

C) Setting the dependent service KPI importance level will be treated as any other KPI in the primary service's health score: When a dependent service's KPI is incorporated into a primary service, the importance level assigned to this KPI is factored into the primary service's overall health score calculation just like any other KPI. This means that the impact of the dependent service on the primary service can be weighted according to the business significance of the relationship between the services.

The other options are not accurate representations of ITSI service dependencies. Changes in KPI importance levels do not break dependencies, and there is no restriction on configuring impactful dependent services to only one primary service, as dependencies can be complex and multi-layered across various services.

NEW QUESTION # 91

Which index is used to store KPI values?

- A. itsi_summary_metrics
- B. itsi_service_health
- C. itsi_metrics
- D. itsi_summary

Answer: A

Explanation:

The IT Service Intelligence (ITSI) metrics summary index, itsi_summary_metrics, is a metrics-based summary index that stores KPI data.

Reference:

A is the correct answer because the itsi_summary_metrics index is used to store KPI values in ITSI. This index improves the performance of the searches dispatched by ITSI, particularly for very large environments. Every KPI is summarized in both the itsi_summary events index and the itsi_summary_metrics metrics index. Reference: Overview of ITSI indexes

NEW QUESTION # 92

Which of the following are characteristics of service templates? (select all that apply)

- A. Service templates contain domain specific dashboards and deep dives.
- B. Service templates can contain specific or generic entity rules.
- C. Service templates can be modified after services are instantiated from it.
- D. Service templates contain KPIs and KPI thresholds.

Answer: B,D

Explanation:

Service templates in Splunk IT Service Intelligence (ITSI) are designed to streamline the creation of services by providing pre-defined configurations:

B) Service templates contain KPIs and KPI thresholds: This allows for the standardized deployment of services with predefined performance indicators and their associated thresholds, ensuring consistency across similar services.

C) Service templates can contain specific or generic entity rules: These rules define how entities are associated with services created from the template, allowing for both broad and targeted applicability.

While service templates contain configurations for KPIs, thresholds, and entity rules, the ability to modify templates after services have been instantiated from them is limited. Changes to a template do not retroactively affect services already created from that template. Moreover, service templates do not inherently contain domain-specific dashboards or deep dives; these are created separately within ITSI.

NEW QUESTION # 93

Which of the following statements is accurate when using multiple policies?

- A. New policies are applied before the default policy.
- B. New policies are applied after the default policy.
- C. An event can be processed by only a single policy.
- D. Policy processing is applied in a defined order.

Answer: D

Explanation:

In Splunk IT Service Intelligence (ITSI), when using multiple event management policies, it is important to understand that policy processing is applied in a defined order. This order is crucial because it determines how events are processed and aggregated, and which rules are applied to events first. The order of policies can be customized, allowing administrators to prioritize certain policies over others based on the specific needs and operational logic of their IT environment. This feature provides flexibility in event management, enabling more precise control over event processing and ensuring that the most critical events are handled according to the desired precedence. This structured approach to policy processing helps in maintaining the efficiency and effectiveness of event management within ITSI.

NEW QUESTION # 94

Which of the following is a best practice when configuring maintenance windows?

- A. Disable any glass tables that reference a KPI that is part of an open maintenance window.
- B. Give the maintenance window a buffer, for example, 15 minutes before and after actual maintenance work.
- C. Develop a strategy for configuring a service's notable event generation when the service's maintenance window is open.
- D. Change the color of services and entities that are part of an open maintenance window in the service analyzer.

Answer: B

Explanation:

It's a best practice to schedule maintenance windows with a 15- to 30-minute time buffer before and after you start and stop your maintenance work.

Reference:

A maintenance window is a period of time when a service or entity is undergoing maintenance operations or does not require active monitoring. It is a best practice to schedule maintenance windows with a 15- to 30-minute time buffer before and after you start and stop your maintenance work. This gives the system an opportunity to catch up with the maintenance state and reduces the chances of

ITSI generating false positives during maintenance operations. For example, if a server will be shut down for maintenance at 1:00PM and restarted at 5:00PM, the ideal maintenance window is 12:30PM to 5:30PM. The 15- to 30-minute time buffer is a rough estimate based on 15 minutes being the time period over which most KPIs are configured to search data and identify alert triggers. Reference: Overview of maintenance windows in ITSI

NEW QUESTION # 95

.....

To pass the Splunk SPLK-3002 exam on the first try, candidates need Splunk IT Service Intelligence Certified Admin updated practice material. Preparing with real SPLK-3002 exam questions is one of the finest strategies for cracking the exam in one go. Students who study with SPLK-3002 Real Questions are more prepared for the exam, increasing their chances of succeeding. The SPLK-3002 exam preparation calls for a strong preparation and precise Splunk SPLK-3002 practice material.
