

# NCP-CI-AWS考試重點，NCP-CI-AWS考試證照

P.S. PDFExamDumps在Google Drive上分享了免費的2026 Nutanix NCP-CI-AWS考試題庫：[https://drive.google.com/open?id=1fF40FBocb0WXeihK4ytzC\\_3Tt4LpJcRj](https://drive.google.com/open?id=1fF40FBocb0WXeihK4ytzC_3Tt4LpJcRj)

PDFExamDumps 是個很好的為 Nutanix NCP-CI-AWS 認證考試提供方便的網站。根據過去的考試練習題和答案的研究，它能有效的捕捉 Nutanix NCP-CI-AWS 認證考試試題內容。我們提供的 NCP-CI-AWS 考試練習題與真實的考試題有緊密的相似性。而且 NCP-CI-AWS 考題一直備受考生的稱贊，很多考生使用後，都知道出題高，讓他們順利過關。

## Nutanix NCP-CI-AWS 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"> <li>Managing an NC2 on AWS Environment: This exam component tests your understanding of node and cluster management tasks, along with your ability to oversee cluster and cloud resource health.</li> </ul>
主題 2	<ul style="list-style-type: none"> <li>Deploying an NC2 on AWS Environment: This portion assesses your knowledge of cloud cluster deployment, cloud provider network configuration, and your skills in addressing cluster deployment challenges.</li> </ul>
主題 3	<ul style="list-style-type: none"> <li>Configuring an NC2 on AWS Environment: This section examines your proficiency in setting up cloud networking and security measures, as well as addressing connectivity issues.</li> </ul>
主題 4	<ul style="list-style-type: none"> <li>Prepare the AWS cloud environment: This exam segment evaluates your ability to set up the AWS cloud environment, initiate NC2 service subscription, establish implementation criteria, and recognize networking prerequisites.</li> </ul>

## 問題 #114

An administrator needs to recover a cluster protected using the Cluster Protect feature. The Prism Central instance was not on the failed cluster.

Which steps, in order, should the administrator perform to recover the cluster?

Step 1

Select

Select

Set the cluster to the Failed state using the NC2 console to start the recovery workflow

Redeploy the cluster using the NC2 console

Redeploy the Multicloud Snapshot Technology

Recover UVM data by running CLI commands

Select

Step 2

Select

Select

Set the cluster to the Failed state using the NC2 console to start the recovery workflow

Redeploy the cluster using the NC2 console

Redeploy the Multicloud Snapshot Technology

Recover UVM data by running CLI commands

Step 3

Select

Select

Set the cluster to the Failed state using the NC2 console to start the recovery workflow

Redeploy the cluster using the NC2 console

Redeploy the Multicloud Snapshot Technology

Recover UVM data by running CLI commands

Step 4

Select

Select

Set the cluster to the Failed state using the NC2 console to start the recovery workflow

Redeploy the cluster using the NC2 console

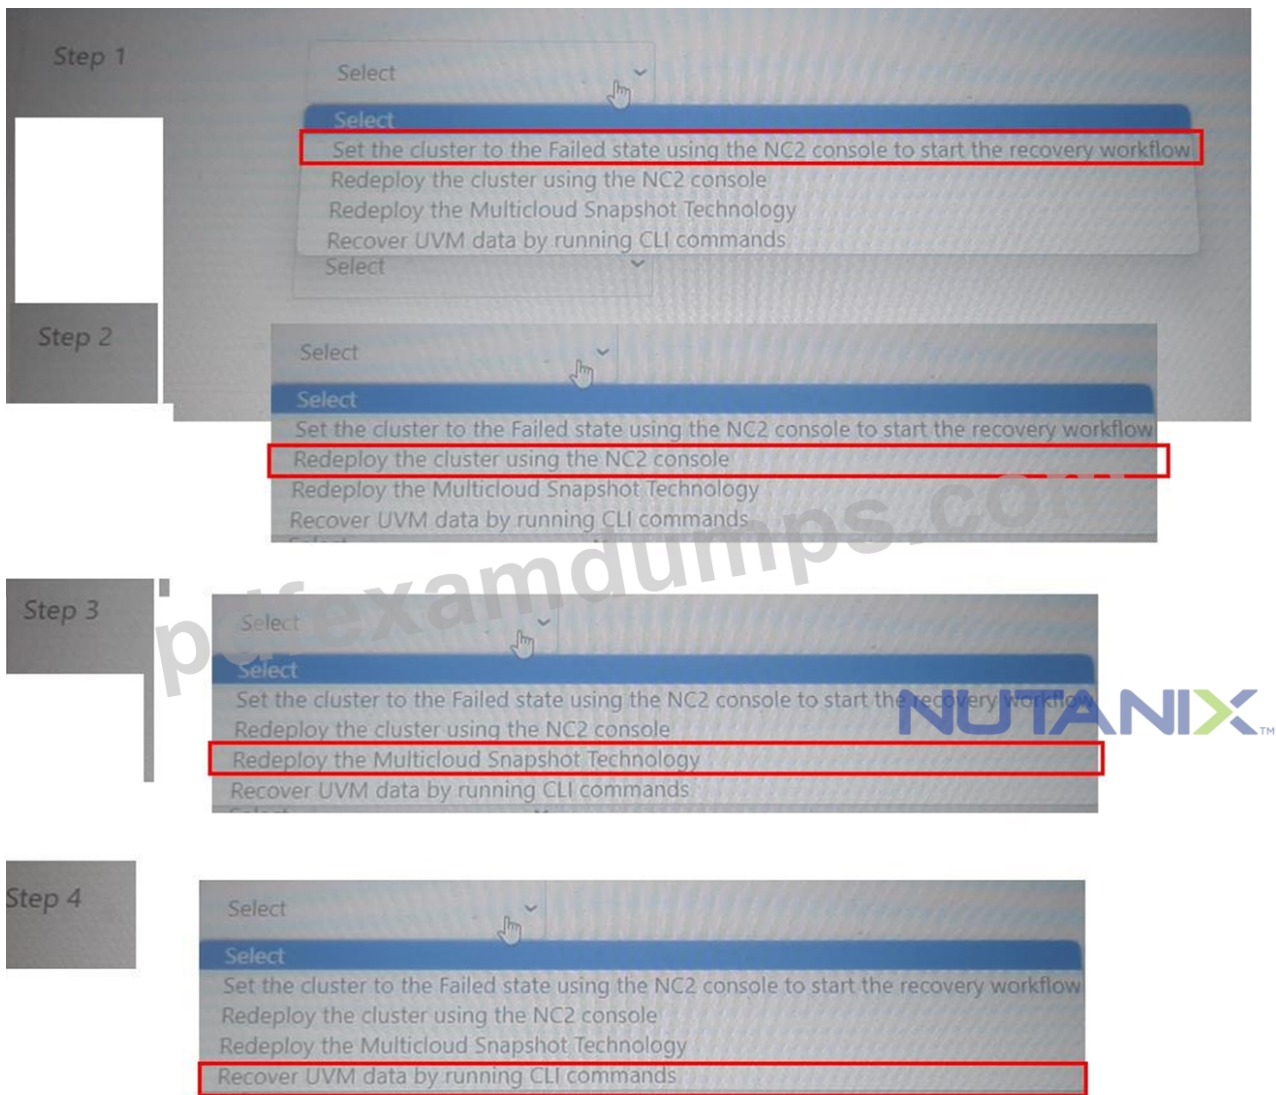

Redeploy the Multicloud Snapshot Technology

Recover UVM data by running CLI commands

NUTANIX

答案:

解題說明:

### 問題 #115

An administrator has noticed the company's NC2 free trial expired 60 days ago.  
What should the administrator do to continue using all of the NC2 features on existing clusters?

- A. Contact the AWS cloud vendor.
- **B. Switch to a paid subscription plan.**
- C. Contact Nutanix support to redeploy the cluster.
- D. Nothing. The clusters will have full feature support.

答案: B

解題說明:

\* After the NC2 free trial expires, to continue using all features of NC2 on existing clusters, the administrator needs to switch to a paid subscription plan.

\* A paid subscription ensures uninterrupted access to the full range of features and support for NC2 clusters.

\* Without switching to a paid plan, the features might be limited, and support may not be available, impacting the cluster's operations and management.

Refer to the Nutanix billing and subscription documentation for details on switching from a trial to a paid plan and the benefits associated with paid subscriptions.

### 問題 #116

If an administrator deploys an NC2 cluster using an existing AWS network, in which type of subnet should the administrator deploy

the NAT Gateway?

- A. VPN-only subnet
- **B. Public subnet**
- C. Private subnet
- D. Isolated subnet

**答案： B**

解題說明：

To deploy an NC2 cluster using an existing AWS network, the NAT Gateway should be placed in a public subnet. A public subnet is one that has a route to an Internet Gateway, allowing the NAT Gateway to provide outbound internet access for resources in private subnets. The NAT Gateway is used to enable instances in private subnets to access the internet while keeping them secure by not exposing them directly to the public internet.

**問題 #117**

In which two ways should an NC2 on AWS cluster be hibernated manually? (Choose two.)

- **A. Log into NC2 console, find the cluster name and select Hibernate/Resume from the ellipses.**
- **B. Select the cluster under NC2 console and Select Hibernate/Resume on the cluster sur page.**
- C. Log into Prism, Central, navigate to Planning, find hibernate and resume.
- D. Log into Prism Element navigate to Settings and select Hibernate/Resume.

**答案： A,B**

**問題 #118**

An administrator is planning to leverage NC2 on AWS for an elastic DR scenario where the initial cluster is using I3en.metal. Which two additional node types are supported for cluster expansion? (Choose two.)

- A. m5d.metal
- **B. I3.metal**
- C. Z1d.metal
- **D. i4i.metal**

**答案： B,D**

解題說明：

When planning to leverage NC2 on AWS for an elastic DR scenario where the initial cluster is using I3en.metal, the following additional node types are supported for cluster expansion:

I3.metal: These instances provide high IOPS and low latency with NVMe SSDs, making them suitable for storage-intensive applications.

i4i.metal: These instances offer higher performance with AWS Nitro SSDs, improved network bandwidth, and better compute performance compared to the I3.metal instances.
