Through the feedback of many examinees who have used Prep4away's training program to pass some IT certification exams, it proves that using Prep4away's products to pass IT certification exams is very easy. Recently, Prep4away has developed the newest training solutions about the popular PCI SSC Certification QSA_New_V4 Exam, including some pertinent simulation tests that will help you consolidate related knowledge and let you be well ready for PCI SSC certification QSA_New_V4 exam.

PCI SSC QSA_New_V4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">PCI Validation Requirements: This section of the exam measures the skills of Compliance Analysts and evaluates the processes involved in validating PCI DSS compliance. Candidates must understand the different levels of merchant and service provider validation, including self-assessment questionnaires and external audits. One essential skill tested is determining the appropriate validation method based on business type.
Topic 2	<ul style="list-style-type: none">Real-World Case Studies: This section of the exam measures the skills of Cybersecurity Consultants and involves analyzing real-world breaches, compliance failures, and best practices in PCI DSS implementation. Candidates must review case studies to understand practical applications of security standards and identify lessons learned. One key skill evaluated is applying PCI DSS principles to prevent security breaches.
Topic 3	<ul style="list-style-type: none">PCI DSS Testing Procedures: This section of the exam measures the skills of PCI Compliance Auditors and covers the testing procedures required to assess compliance with the Payment Card Industry Data Security Standard (PCI DSS). Candidates must understand how to evaluate security controls, identify vulnerabilities, and ensure that organizations meet compliance requirements. One key skill evaluated is assessing security measures against PCI DSS standards.
Topic 4	<ul style="list-style-type: none">PCI Reporting Requirements: This section of the exam measures the skills of Risk Management Professionals and covers the reporting obligations associated with PCI DSS compliance. Candidates must be able to prepare and submit necessary documentation, such as Reports on Compliance (ROCs) and Self-Assessment Questionnaires (SAQs). One critical skill assessed is compiling and submitting accurate PCI compliance reports.

Topic 5	<ul style="list-style-type: none"> • Payment Brand Specific Requirements: This section of the exam measures the skills of Payment Security Specialists and focuses on the unique security and compliance requirements set by different payment brands, such as Visa, Mastercard, and American Express. Candidates must be familiar with the specific mandates and expectations of each brand when handling cardholder data. One skill assessed is identifying brand-specific compliance variations.

Efficient Exam QSA_New_V4 Questions Fee, Ensure to pass the QSA_New_V4 Exam

As is known to us, there are best sale and after-sale service of the QSA_New_V4 study materials all over the world in our company. Our company has employed a lot of excellent experts and professors in the field in the past years, in order to design the best and most suitable QSA_New_V4 study materials for all customers. More importantly, it is evident to all that the QSA_New_V4 study materials from our company have a high quality, and we can make sure that the quality of our products will be higher than other study materials in the market. If you want to pass the QSA_New_V4 Exam and get the related certification in the shortest time, choosing the QSA_New_V4 study materials from our company will be in the best interests of all people. We can make sure that it will be very easy for you to pass your exam and get the related certification in the shortest time that beyond your imagination.

PCI SSC Qualified Security Assessor V4 Exam Sample Questions (Q41-Q46):

NEW QUESTION # 41

The intent of assigning a risk ranking to vulnerabilities is to?

- A. Ensure that critical security patches are installed at least quarterly.
- **B. Prioritize the highest risk items so they can be addressed more quickly.**
- C. Replace the need for quarterly ASV scans.
- D. Ensure all vulnerabilities are addressed within 30 days.

Answer: B

Explanation:

PCI DSS Requirement 6.3.1 requires entities to assign a risk ranking to vulnerabilities (e.g., high, medium, low) to ensure that remediation efforts are prioritised. This risk-based approach helps organisations focus resources where they are most needed.

* Option A:#Incorrect. Timeframes depend on the severity and internal policy, not always 30 days.

* Option B:#Incorrect. Risk ranking supports remediation but doesn't replace scanning.

* Option C:#Correct. The purpose is to prioritise higher-risk items for faster action.

* Option D:#Incorrect. Patch frequency is addressed elsewhere (Requirement 6.3.3).

Reference:PCI DSS v4.0.1 - Requirement 6.3.1.

NEW QUESTION # 42

Which of the following is required to be included in an incident response plan?

- **A. Procedures for responding to the detection of unauthorized wireless access points.**
- B. Procedures for notifying PCI SSC of the security incident.
- C. Procedures for launching a reverse-attack on the individual(s) responsible for the security incident.
- D. Procedures for securely deleting incident response records immediately upon resolution of the incident.

Answer: A

Explanation:

According to Requirement 12.10.1, an effective incident response plan (IRP) must include steps to detect, respond to, and contain incidents such as unauthorised wireless access points. PCI DSS 12.1.2.1 also mandates quarterly rogue AP detection.

* Option A:#Incorrect. Notification to PCI SSC is not required; notification goes to acquirers/payment brands.

* Option B:#Correct. The IRP must include response to unauthorised wireless access detection.

- * Option C:#Incorrect. Records must be retained, not deleted.
- * Option D:#Incorrect. Retaliatory or offensive actions are not allowed or recommended.

NEW QUESTION # 43

Which statement about PAN is true?

- A. It must be protected with strong cryptography for transmission over private wired networks.
- B. It must be protected with strong cryptography for transmission over private wireless networks.
- C. It does not require protection for transmission over public wireless networks.
- D. It does not require protection for transmission over public wired networks.

Answer: B

Explanation:

Requirement 4.2.1.1 states that PAN must be protected with strong cryptography whenever transmitted over open or public networks, including private wireless where security is not assured. While not all private wired networks require encryption, wireless is generally considered untrusted.

- * Option A:#Correct. PAN must be encrypted over private wireless networks due to potential interception risks.
- * Option B:#Incorrect. Private wired networks typically don't require encryption unless they're untrusted.
- * Option C & D:#Incorrect. PAN always requires protection over public networks.

Reference: PCI DSS v4.0.1 - Requirement 4.2.1.1.

NEW QUESTION # 44

Where can live PANs be used for testing?

- A. Testing with live PANs must only be performed in the OSA Company environment.
- B. Pre-production (test) environments only if located outside the CDE.
- C. Production (live) environments only.
- D. Pre-production environments that are located within the CDE.

Answer: D

Explanation:

Testing with Live PANs

* PCI DSS Requirement 6.4.3 requires that live PANs (Primary Account Numbers) only be used in secure and controlled environments within the CDE.

* Pre-production environments located within the CDE must adhere to all PCI DSS requirements for security and monitoring.

Prohibited Uses

* Testing with live PANs in environments outside the CDE violates PCI DSS. Only simulated data should be used in less secure testing environments.

Incorrect Options

- * Option A: Production environments are for real transactions, not testing.
- * Option B: Test environments outside the CDE are insecure for live PANs.
- * Option D: The QSA environment is irrelevant to the organization's CDE testing controls.

NEW QUESTION # 45

In the ROC Reporting Template, which of the following is the best approach for a response where the requirement was "In Place"?

- A. Details of the entity's project plan for implementing the requirement.
- B. Details of the entity's reason for not implementing the requirement
- C. Details of how the assessor observed the entity's systems were not compliant with the requirement
- D. Details of how the assessor observed the entity's systems were compliant with the requirement.

Answer: D

Explanation:

PCI DSS Reporting Expectations:

- * When documenting that a requirement is "In Place," the ROC must clearly describe how compliance was validated by the

assessor. This involves detailing the evidence observed, such as system configurations, documentation, and personnel interviews. ROC Documentation Guidelines:

* The ROC Reporting Template specifies that each "In Place" response must include evidence demonstrating compliance with the requirement, such as testing observations and validation of implemented controls.

Eliminating Incorrect Options:

* A: Project plans are not sufficient to demonstrate current compliance.

* C/D: Responses discussing non-implementation or non-compliance are irrelevant when the requirement is "In Place." PCI DSS v4.0 ROC Template Guidance:

* Appendix sections in the ROC provide specific instructions for assessors to document the testing performed, evidence reviewed, and results.

NEW QUESTION # 46

.....

Our QSA_New_V4 question torrent not only have reasonable price but also can support practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the QSA_New_V4 Exam Question can be said to have high quality performance. We can sure that you will never regret to download and learn our QSA_New_V4 study material, and you will pass the QSA_New_V4 exam at your first try.
